	Preface	<i>IX</i>
	Abbreviations	<i>XI</i>
	Glossary	<i>XV</i>
	Introduction	<i>1</i>
Part I	Gene and Protein Structure	3
1	Gene Structure	5
1.1	Genomic Organization and Complexity	5
1.2	Restriction Fragment Length Polymorphisms	11
2	Developmental Expression	13
2.1	The TNAP Gene	13
2.2	The TSAP Genes	15
3	Gene Regulation	19
3.1	The TNAP Gene	19
3.2	The TSAP Genes	22
4	Protein Structure and Functional Domains	25
4.1	The Three-dimensional Structure of PLAP	25
4.1.1	Overview of the Structure	25
4.1.2	The Active Site	28
4.1.3	The Calcium Site	36
4.1.4	The Disulfide Bonds	38
4.1.5	The N-terminal Arm	38
4.1.6	The Crown Domain	41
4.1.7	The Monomer–Monomer Interface	46
4.1.8	The Noncatalytic Peripheral Binding Site	46
4.2	Genetic Polymorphism and Protein Variability	49

4.3	Post-translational Modifications	54
4.3.1	Glycosylation Sites	54
4.3.2	Ectoplasmic Localization of APs via a GPI Anchor	56
4.3.3	Nonenzymatic Glycation of APs	61
4.3.4	Quaternary Structure of APs	62
4.3.5	Subcellular Localization of APs	63
5	Enzymatic Properties	67
5.1	Catalytic Inhibition	67
5.1.1	Competitive and Noncompetitive Inhibitors of APs	69
5.1.2	Uncompetitive Inhibition	71
5.1.2.1	Mechanism of Inhibition in PLAP/GCAP	71
5.1.2.2	Inhibitor Binding in TNAP	76
5.2	Allosteric Behavior	80
5.3	Catalytic Efficiency of Mammalian APs	83
5.4	Substrate Specificities	85
5.5	APs as Members of a Superfamily of Enzymes	88
6	Epitope Maps	91
6.1	Epitopes in PLAP and GCAP	91
6.2	Epitopes in IAP	98
6.3	Discrimination Between Bone and Liver TNAP	99
Part II	<i>In Vivo</i> Functions	105
7	The <i>In Vivo</i> Role of TNAP	107
7.1	Function of TNAP in Bone	107
7.1.1	Hypophosphatasia	107
7.1.2	Hypophosphatasia Mutations	109
7.1.3	Variable Penetrance and Expressivity	123
7.2	Role of TNAP in Nonskeletal Tissues	124
7.3	Proposed Biological Functions of TSAPs	126
7.3.1	Proposed Functions of IAP	126
7.3.2	Putative Functions of GCAP and PLAP	128
8	Knockout Mouse Models	131
8.1	Phenotypic Abnormalities in <i>Akp2</i> ^{-/-} mice	131
8.1.1	Developmental and Skeletal Defects	131
8.1.2	Dental Abnormalities in <i>Akp2</i> ^{-/-} Mice	136
8.1.3	Deficient Mineralization by <i>Akp2</i> ^{-/-} Osteoblasts <i>In Vitro</i>	136
8.1.4	Metabolic Pathways Affected in <i>Akp2</i> ^{-/-} Mice	139
8.1.4.1	Neuro-physiological Abnormalities	139
8.1.4.2	The Function of TNAP in Bone Mineralization	141
8.1.4.3	Co-expression of TNAP and Fibrillar Collagens Restricts Calcification to Skeletal Tissues	148

8.1.4.4	Other Organs Affected in <i>Akp2</i> ^{-/-} Mice	152
8.2	Phenotypic Abnormalities in <i>Akp3</i> ^{-/-} Mice	154
8.3	Phenotypic Abnormalities in <i>Akp5</i> ^{-/-} Mice	160
Part III	AP Expression in Health and Disease	165
9	APs as Physiological and Disease Markers	167
9.1	Clinical Usefulness of TNAP	167
9.1.1	TNAP as a Marker of Bone Formation	167
9.1.2	TNAP and Bone Cancer or Bone Metastasis	173
9.1.3	TNAP Expression in Cholestasis	175
9.1.4	TNAP in Other Conditions	178
9.2	Clinical Usefulness of PLAP in Normal and Complicated Pregnancies	180
9.3	IAP Expression in Relation to ABO Status, Fat Feeding and Other Pathologies	182
9.4	Complexes of APs and Immunoglobulins	184
9.5	Hyperphosphatasia	185
10	Neoplastic Expression of PLAP, GCAP, IAP (Regan, Nagao, Kasahara) and TNAP Isozymes	187
10.1	Some History	187
10.2	GCAP as Marker for Testicular Cancer	189
10.3	Usefulness of PLAP/GCAP in Ovarian Cancer	194
10.4	Other Tumors	196
10.5	Immunolocalization and Immunotherapy of Tumors Using PLAP/GCAP as Targets	197
10.6	Tumoral Expression of IAP	204
Part IV	Uses of APs in Industry and Biotechnology	207
11	Applications of Recombinant APs	209
11.1	Expression of Recombinant APs	209
11.2	APs as <i>In Vitro</i> and <i>In Vivo</i> Reporters	213
11.3	APs as Molecular Biology and Diagnostic Reagents	218
12	Use of APs in Prodrug Converting Strategies	223
13	APs as Therapeutic Agents	227
13.1	In the Treatment of Hypophosphatasia	227
13.2	In the Treatment of CPPD Disease	231
13.3	Endotoxin Treatment	231
13.4	TNAP as Therapeutic Target for the Management of Ectopic Calcification	234

14	APs in the Food Industry	237
15	Veterinary Uses of AP Determinations	239
16	Methodologies	241
16.1	Amperometric, Spectrophotometric and Potentiometric Assays	241
16.2	Using Inhibitors and Heat Inactivation	244
16.3	Electrophoretic Methods	245
16.4	Lectin-based Assays	245
16.5	High-performance Liquid Chromatographic Methods	247
16.6	Specific Immunoassays with Polyclonal and MAbs	249
16.7	mRNA-based Assays	253
16.8	Histochemical and Immunohistochemical Detection	254
	References	257
	Index	315
