

CONTENTS

Preface	xi
Who Will Benefit from This Book?	xii
Who Is This Book Not For?	xiii
Organization of the Book	xiii
1 The Peer-to-Peer Architecture	1
1.1 Distributed Applications	1
1.1.1 A Distributed Computing Example	2
1.1.2 Client-Server Architecture	5
1.1.3 Peer-to-Peer Architecture	7
1.2 The Peer-to-Peer Software Structure	7
1.2.1 Base Overlay Layer	8
1.2.2 Middleware Functions	9
1.2.3 Application Layer	10
1.3 Comparison of Architectures	11
1.3.1 Ease of Development	12
1.3.2 Manageability	12
1.3.3 Scalability	13
1.3.4 Administrative Domains	15
1.3.5 Security	15
1.3.6 Reliability	16
	vii

viii CONTENTS

2	Peer Discovery and Overlay Formation	19
2.1	Discovery	20
2.1.1	Static Configuration	20
2.1.2	Centralized Directory	21
2.1.3	Using the Domain Name Service	23
2.1.4	Member Propagation Techniques with Initial Member Discovery	24
2.1.4.1	Member Propagation with Full Member List	25
2.1.4.2	Member Propagation with Partial Member List	25
2.1.4.3	Member Propagation with a Hint Server	26
2.2	Overlay Formation	27
2.2.1	Creating an Overlay Link	28
2.2.1.1	Communicating Across Firewalls	28
2.2.1.2	Communicating Across Two Firewalls	29
2.3	Topology Selection	31
2.3.1	Random Mesh Formation	32
2.3.2	Tiered Formation	33
2.3.3	Ordered Lattices	34
3	Application-Layer Multicast	37
3.1	General Multicast Techniques	38
3.1.1	Group Addressing	39
3.1.2	Group Maintenance	40
3.1.3	Message Forwarding Scheme	42
3.1.4	Multicast Routing	44
3.1.5	Secure Multicast	45
3.1.6	Reliable Multicast	46
3.1.7	Multicast Flow and Congestion Control	47
3.2	Network-Layer Multicast—IP Multicast	49
3.2.1	Problems with IP-Layer Multicast	50
3.3	Application-Layer Multicast	52
3.3.1	Broadcast Mechanisms in Peer-to-Peer Networks	52
3.3.2	Multicast in Peer-to-Peer Overlays	53
4	File-Sharing Applications	55
4.1	File-Sharing Overview	55

4.1.1	Disk Space Management	56
4.1.2	File Indexing	57
4.1.3	File Search/Retrieval	58
4.1.4	Access Control and Security	59
4.1.5	Anonymous File Retrieval	59
4.1.6	Search Acceleration Techniques	61
4.1.7	Digital Rights Management	62
4.2	Usage of File-Sharing Applications	63
4.2.1	Limitations of File-Sharing Applications	64
4.3	Preventing Unauthorized File Sharing	66
4.3.1	Firewall-Based Techniques	67
4.3.2	Asset Inventory	70
4.3.3	Port Scanning	71
4.3.4	Usage-Based Rate Control	72
4.3.5	Malicious Participation	73
5	File Storage Service	77
5.1	Handle Management	78
5.2	Retrieving Files with Handles	80
5.2.1	Circular Ring Routing	81
5.2.2	Plaxton Scheme	82
5.2.3	CAN Routing Algorithm	84
5.2.4	Modified Network Routing Schemes	85
5.2.5	Modified Broadcast	86
5.3	Miscellaneous Functions	87
5.3.1	Access Control	87
5.3.2	Availability and Reliability	89
5.4	Usage Scenarios	90
5.4.1	Distributed File Systems	91
5.4.2	Anonymous Publishing	92
6	Data Backup Service	95
6.1	The Traditional Data Management System	96
6.2	The Peer-to-Peer Data Management System	98
6.2.1	The Backup/Restore Manager	99
6.2.2	The Peer Searcher	100
6.2.3	The File Searcher	101
6.2.4	The Properties Manager	101
6.2.5	The Data Manager	102
6.2.6	The Schedule Manager	103
6.3	Security Issues	103

x	CONTENTS	
6.4	Hybrid Data Management Approach	105
6.5	Feasibility of Peer-to-Peer Data Backup Service	106
7	Peer-to-Peer Directory System	109
7.1	LDAP Directory Servers	110
7.2	Why Use Peer-to-Peer Directories?	112
7.3	A Peer-to-Peer Directory System	113
7.3.1	Schema Maintenance	114
7.3.2	Operation Processing	115
7.3.2.1	Local Placement of Records	116
7.3.2.2	Name Space Partitioning	118
7.3.3	Access Management	120
7.4	Example Applications of Peer-to-Peer Directory	121
8	Publish-Subscribe Middleware	123
8.1	Overview of Publish-Subscribe Systems	124
8.2	Server-Centric Publish-Subscribe Services	125
8.3	Peer-to-Peer Publish-Subscribe Services	127
8.3.1	Broadcast Scheme	128
8.3.2	Multicast Group Approach	129
8.4	Comparison of Approaches	130
8.5	Example Application	132
9	Collaborative Applications	135
9.1	General Issues	136
9.2	Instant Messaging	138
9.3	IP Telephony	140
9.4	Shared Collaboration Databases	142
9.5	Collaborative Content Hosting	145
9.6	Anonymous Web Surfing	147
10	Related Topics	151
10.1	Legacy Peer-to-Peer Applications	152
10.2	Grid Computing	154
	References	157
	Index	161
