Acknowledgments	xi
Introduction	xxiii
Chapter 1: Getting Started with ASP.NET 3.5	1
Microsoft Visual Web Developer	2
Getting Visual Web Developer	3
Installing Visual Web Developer Express Edition	3
Creating Your First ASP.NET 3.5 Web Site	5
An Introduction to ASP.NET 3.5	9
Understanding HTML	10
A First Look at ASP.NET Markup	14
A Tour of the IDE	15
The Main Development Area	15
Informational Windows	21
Customizing the IDE	22
Rearranging Windows	22
Modifying the Toolbox	23
Customizing the Document Window	25
Customizing Toolbars	25
Customizing Keyboard Shortcuts	26
Resetting Your Changes	27
The Sample Application	28
Practical Tips on Visual Web Developer	30
Summary	30
Exercises	31
Chapter 2: Building an ASP.NET Web Site	33
Creating Web Sites with VWD 2008	34
Different Project Types	34
Choosing the Right Web Site Template	35
Creating and Opening a New Web Site	36
Working with Files in Your Web Site	39
The Many File Types of an ASP.NET 3.5 Web Site	39
Adding Existing Files	43

Contents

Organizing Your Site	44
Special File Types	46
Working with Web Forms	47
The Different Views on Web Forms	47
Choosing between Code Behind and Pages with Inline Code	48
Adding Markup to Your Page	53
Connecting Pages	59
Practical Tips on Working with Web Forms	61
Summary	61
Exercises	62
Chapter 3: Designing Your Web Pages	63
Why Do You Need CSS?	63
Problems of HTML Formatting	64
How CSS Fixes Formatting Problems	65
An Introduction to CSS	65
CSS — The Language	69
The Style Sheet	69
Adding CSS to Your Pages	80
Working with CSS in Visual Web Developer	82
Creating New Styles in External Style Sheets	83
Creating Embedded and Inline Style Sheets	88
Applying Styles	94
Managing Styles	96
Practical Tips on Working with CSS	99
Summary	100
Exercises	100
Chapter 4: Working with ASP.NET Controls	103
Introduction to Server Controls	103
A Closer Look at ASP.NET Server Controls	107
Defining Controls in Your Pages	108
Common Properties for All Controls	108
Types of Controls	110
Standard Controls	111
HTML Controls	124
Data Controls	124
Validation Controls	125
Navigation Controls	125
Login Controls	125

Contents

Ajax Extensions	125
WebParts	125
The ASP.NET State Engine	126
What Is State and Why Is It Important?	126
How the State Engine Works	127
Not All Controls Rely on ViewState	131
A Note About ViewState and Performance	131
Practical Tips on Working with Controls	132
Summary	132
Exercises	133
Chapter 5: Programming Your ASP.NET Web Pages	135
Introduction to Programming	136
Data Types and Variables	136
Converting Data Types	140
Using Arrays and Collections	142
Statements	146
Operators	147
Making Decisions	154
Loops	161
Organizing Code	164
Methods: Functions and Subroutines	165
The App_Code Folder	167
Organizing Code with Namespaces	171
Writing Comments	173
Object Orientation Basics	176
Important OO Terminology	176
Events	188
Practical Tips on Programming	189
Summary	190
Exercises	191
Chapter 6: Creating Consistent Looking Web Sites	193
Consistent Page Layout with Master Pages	194
Creating Master Pages	196
Creating Content Pages	198
Using a Centralized Base Page	203
An Introduction to the ASP.NET Page Life Cycle	204
Implementing the Base Page	206
Creating Reusable Page Templates	210

Contents

Themes	214
Different Types of Themes	215
Choosing Between Theme and StyleSheetTheme	215
Applying Themes	215
Extending Themes	219
Dynamically Switching Themes	222
Skins	228
Creating a Skin File	229
Named Skins	231
A Final Note on Skins	232
Practical Tips on Creating Consistent Pages	232
Summary	233
Exercises	234
Chapter 7: Navigation	235
Different Ways to Move around Your Site	236
Understanding Absolute and Relative URLs	236
Understanding Default Documents	240
Using the Navigation Controls	241
Architecture of the Navigation Controls	242
Examining the Web.sitemap File	242
Using the Menu Control	244
Using the TreeView Control	253
Using the SiteMapPath Control	257
Programmatic Redirection	259
Programmatically Redirecting the Client to a Different Page	259
Server-Side Redirects	261
Practical Tips on Navigation	264
Summary	264
Exercises	265
Chapter 8: User Controls	267
Introduction to User Controls	267
Creating User Controls	268
Adding User Controls to a Content Page or Master Page	271
Site-Wide Registration of User Controls	274
User Control Caveats	275
Adding Logic to Your User Controls	277
Creating Your Own Data Types for Properties	277

Contents

Implementing ViewState Properties	283
ViewState Considerations	288
Practical Tips on User Controls	289
Summary	289
Exercises	290
Chapter 9: Validating User Input	291
Gathering Data from the User	292
Validating User Input in Web Forms	293
Processing Data at the Server	307
Sending E-mail from Your Web Site	307
Reading from Text Files	313
Practical Tips on Validating Data	318
Summary	318
Exercises	319
Chapter 10: ASP.NET AJAX	321
Introducing Ajax	322
Using ASP.NET AJAX in Your Projects	323
Creating Flicker-Free Pages	323
Providing Feedback to Users	328
Using the Timer Control	332
Using Web Services in Ajax Web Sites	337
What Are Web Services?	337
Creating Web Services	338
Using Web Services in Your Ajax Web Site	342
This Is Just the Beginning	349
Practical Ajax Tips	349
Summary	350
Exercises	351
Chapter 11: Introduction to Databases	353
What Is a Database?	354
Different Kinds of Relational Databases	355
Using SQL to Work with Database Data	355
Retrieving and Manipulating Data	358
Creating Your Own Tables	371
Data Types in SQL Server	371

Contents

Understanding Primary Keys and Identities	373
Creating Relationships Between Tables	377
Practical Database Tips	380
Summary	381
Exercises	381
Chapter 12: Displaying and Updating Data	383
Data Controls	383
Data-Bound Controls	384
Data Source Controls	386
Data Source and Data-Bound Controls Working Together	386
Displaying and Editing Data with GridView	386
Inserting Data with DetailsView	392
Storing Your Connection Strings in web.config	395
Filtering Data	397
Customizing the Appearance of the Data Controls	403
Configuring Columns or Fields of Data-Bound Controls	403
Updating and Inserting Data	409
Using DetailsView to Insert and Update Data	409
Practical Tips for Displaying and Updating Data	422
Summary	423
Exercises	423
Chapter 13: LINQ	425
Introducing LINQ	426
Different Types of LINQ	427
Introducing LINQ to SQL	427
Mapping Your Data Model to an Object Model	428
Introducing Query Syntax	433
Standard Query Operators	433
Shaping Data with Anonymous Types	437
Using Server Controls with LINQ Queries	443
New Controls Introduced in ASP.NET 3.5	443
A Few Notes about Performance	471
Practical LINQ Tips	472
Summary	472
Exercises	473

Contents

Chapter 14: Presenting Data — Advanced Topics	475
Formatting Your Controls Using Styles	476
An Introduction to Styles	477
Combining Styles, Themes, and Skins	481
Handling Events	485
The ASP.NET Page and Controls Life Cycles Revisited	485
Handling Errors that Occur in the Data Source Controls	498
Caching	502
Common Pitfalls with Caching Data	503
Different Ways to Cache Data in ASP.NET Web Applications	505
Practical Data Tips	513
Summary	514
Exercises	515
Chapter 15: Security in Your ASP.NET 3.5 Web Site	517
Introducing Security	518
Identity: Who Are You?	518
Authentication: How Can You Prove Who You Are?	518
Authorization: What Are You Allowed to Do?	518
An Introduction to the ASP.NET Application Services	519
Introducing the Login Controls	520
The Login Controls	525
Configuring Your Web Application	537
The Role Manager	541
Configuring the Role Manager	541
Managing Users with the WSAT	542
Configuring the Web Application to Work with Roles	546
Programmatically Checking Roles	551
Practical Security Tips	554
Summary	555
Exercises	555
Chapter 16: Personalizing Web Sites	557
Understanding Profile	558
Configuring the Profile	558
Using the Profile	565

Contents

Other Ways of Dealing with Profile	583
Anonymous Identification	583
Cleaning Up Old Anonymous Profiles	584
Looking at Other Users' Profiles	585
Practical Personalization Tips	589
Summary	589
Exercises	590
Chapter 17: Exception Handling, Debugging, and Tracing	591
Exception Handling	592
Different Types of Errors	592
Catching and Handling Exceptions	594
Global Error Handling and Custom Error Pages	601
The Basics of Debugging	607
Tools Support for Debugging	611
Moving around in Debugged Code	611
Debugging Windows	612
Debugging Client-Side Script	618
Tracing Your ASP.NET Web Pages	621
Using the Standard Tracing Capabilities	622
Adding Your Own Information to the Trace	626
Tracing and Performance	628
A Security Warning	628
Practical Debugging Tips	628
Summary	629
Exercises	630
Chapter 18: Deploying Your Web Site	631
Preparing Your Web Site for Deployment	632
Avoiding Hardcoded Settings	632
Copying Your Web Site	639
Creating a Simple Copy of Your Web Site	639
Publishing Your Web Site	642
Running Your Site under IIS	643
Installing and Configuring the Web Server	643
Understanding Security in IIS	651
NTFS Settings for Planet Wrox	652
Troubleshooting Web Server Errors	656

Contents

Moving Data to a Remote Server	657
Using the Database Publishing Wizard	658
Recreating the Database	660
The Deployment Checklist	661
What's Next	662
Summary	663
Exercises	664
Appendix A: Exercise Answers	665
Appendix B: Configuring SQL Server 2005	687
Configuring SQL Server 2005	687
Terminology and Concepts	688
Using SQL Server Management Studio	689
Enabling Remote Connections in SQL Server	690
Connecting Your Application to SQL Server 2005	693
Configuring Application Services	701
Configuring Your Database for the Application Services	702
Overriding the LocalSqlServer Connection String	703
Overriding the Settings of the Application Services	704
Index	707
