Acknowledgments	ix
Introduction	xiii
Chapter 1: Installing Xcode	1
The Xcode Installer	1
Running the Installer	2
Upgrading Xcode	7
Removing and Reinstalling Xcode	8
Summary	8
Chapter 2: The Grand Tour	9
The Project	9
Source Group	11
Smart Groups	11
Menus	12
Editor	12
Data Mining	13
Getting Help	14
Building	16
Getting It Right	17
Collaboration	17
Summary	17
Chapter 3: Xcode Layout	19
Project Layout	20
Choosing a Layout	20
Changing the Layout	22
Groups & Files	24
Project Structure Group	25
Smart Groups	25
Altering Source Groups and Their Contents	26
Showing and Hiding Groups	27
Reusing Your Layout	28
Creating Simple Smart Groups	29
Deleting Simple Smart Groups	30

Contents

Details, Details	31
Showing and Hiding Details	32
Showing Details in the Groups & Files List	32
Info Windows	33
Toolbars	34
Status Bar and Favorites Bar	35
Activity Viewer Window	35
Summary	35
Exercise	36
Chapter 4: The Project	37
Creating a New Project	37
Choosing a Template	38
Naming the New Project	39
What's in a Name?	40
Who's __MyCompanyName__?	42
Closing a Project	45
Opening One or More Projects	45
Renaming and Relocating Projects	48
Upgrading Projects	48
Old Project Templates	49
Importing ProjectBuilderWO (WebObjects) Projects	50
Migrating from CodeWarrior to Xcode	51
Migrating from Anything Else to Xcode	52
Project Attributes	52
Summary	54
Exercise	55
Chapter 5: Sources	57
References	57
Organizing Sources	59
Default References	60
Sharing a Subfolder	61
Everything Is Relative	63
Outside the Box	64
Bad References	66
Source Item Types	67
Creating New Source Files	69
Adding Existing Sources	73
Selecting the Items to Add	73
Adding an Open File	77

Source Attributes	77
Changing Attributes for Multiple Items	79
Ridding Targets of Unwanted Files	80
Reorganizing Sources	80
Summary	86
Exercise	86
Chapter 6: Editing Text	87
<hr/>	
Windows and Panes	87
Editing Panes	87
Closing and Saving Editor Panes	91
The Editor Pane	92
Scroll Bars	93
Split-Pane Editing	94
Gutter	96
Navigation Bar	96
Status and Toolbars	97
Display Options	98
Navigation Within a File	101
Cursor Movement	101
Emacs	102
Scrolling	103
Jumping	103
Navigation Between Files	106
Editing	109
Selecting Text	109
Deleting Text	111
Drag and Drop	111
Font and Text Styles	112
Saving Files	112
Undo	113
Syntax-Aware Editing	115
Syntax Coloring	115
Changing Syntax Coloring for a Single File	118
Indenting Text	118
Re-indenting Text	122
Tab Settings for a Single File	122
Code Sense	122
Invoking Code-Completion	123
Rebuilding the Code Sense Index	129
Text Macros	130
Shell Scripts	132

Contents

Spell Checking	132
Interactive Checking	132
Finding One Word	133
Checking While Typing	134
File Encoding	134
Localizing Files	136
Printing	139
Services	139
Using an External Editor	140
Summary	142
Chapter 7: Searching	143
<hr/>	
Searching a Text File	143
Searching for a Text Pattern	144
Searching for a Regular Expression	146
Replacing Text	153
Replacing Text Using Regular Expressions	153
Search History	155
Searching Multiple Files	155
Find Results Smart Group	156
Project Search History	157
Replacing Text in Multiple Files	157
Batch File Options	158
Search Shortcuts	160
Searching Lists	162
Summary	163
Exercise	164
Chapter 8: Class Browser	165
<hr/>	
Navigating the Class Browser	165
Class Browser Option Sets	168
Browser Shortcuts	170
Summary	170
Chapter 9: Help and Documentation	171
<hr/>	
Help and Documentation Window	171
Browsing the Apple Developer Connection Reference Library	171
Navigating Help Documents	174
Bookmarks	175
External Links	175

Extended Documentation	176
Controlling Text Size	178
Searching Documentation	178
Full-Text Search	178
Search Expressions	179
API Search	180
Man Pages	181
AppleScript Dictionaries	182
Staying Up-To-Date	183
Documentation Shortcuts	184
Adding Custom Documentation	185
The Xcode Community	186
Summary	187
Chapter 10: Interface Builder	189
NIB Files	189
Serialization	191
Cocoa versus Carbon	191
Xcode Integration	192
Interface Builder's Interface	192
Multiple NIB Document Windows	194
Building Interfaces	195
Saving NIB Files	198
Making Backups	199
Creating Objects	199
Creating Menus	199
Creating Windows	200
Creating Other Objects	201
Selecting Objects	201
Deleting Objects	203
Testing an Interface	203
Editing Objects	203
Moving and Resizing Objects	203
Subviews	206
Guides	207
Inspector Palette	208
Tab Order	217
Custom Classes	218
Creating Classes in Interface Builder	220
Importing and Exporting Classes	222
NIB File Formats	225
Compatibility Checking	226

Contents

Customizing Interface Builder	227
Summary	229
Exercise	229
Chapter 11: Class Modeling	231
<hr/>	
Creating a Class Model	232
Creating a Quick Model	234
Class Model Browser	235
Class Model Diagram	236
Nodes	236
Tools	238
Navigation	239
Editing a Class Model	241
Moving Nodes	241
Page Layout	243
Changing the Tracking	243
Adding Annotations	244
Customizing Colors and Fonts	245
Hiding Classes and Members	246
Summary	251
Chapter 12: Data Modeling	253
<hr/>	
Technology	253
Terminology	254
Creating a Data Model	255
Creating Entities	256
Creating Properties	257
Adding Fetched Properties	260
Adding Fetch Requests	260
Data Modeling Interface	261
Data Model Browser	261
Detail Pane Views	261
Data Model Diagram	262
Tools	263
Duplicating Entities and Properties	264
Predicate Builder	264
Creating an Instant Interface	268
Creating NSObject Subclasses	270
Exporting Class Methods	271
Summary	272

Chapter 13: Targets	273
Target Components	273
Target Types	276
Native Targets	277
Jam-Based Targets	277
External Targets	278
Aggregate Targets	279
Creating a Target	279
Target Template Groups	281
Duplicating Targets	284
Deleting Targets	284
Build Phases	284
Files in a Build Phase	285
Build Phase Types	287
Build Rules	291
Target Dependencies	296
Adding Target and Project Dependencies	296
Strategies for Target Dependencies	298
Build Settings	299
Jam-Based Target Editor	300
Properties	301
Products	303
Executables	303
Summary	303
Exercise	304
Chapter 14: Building Projects	305
Starting and Stopping a Build	305
Clean Builds	306
Controlling the Build of Individual Items	308
Selecting the Active Target and Build Configuration	309
Building an Inactive Target	309
Partial Builds	309
The Build Window	310
Navigating Errors and Warnings	311
Opening and Closing the Build Window Automatically	313
Common Build Preferences	314
Build Locations	315
Build Location Strategies	318

Contents

Build Settings	319
The Scope of Build Settings	321
Build Setting Evaluation	322
Build Configurations	325
Editing Build Settings	327
Creating and Deleting a Build Setting	330
Build Setting Values	330
Switching Between Build Configurations	331
Editing Build Configurations	332
Configuration Files	333
Adding a Configuration File	335
Using Configuration Files	335
Moving Build Settings Around	335
Environment Settings	336
Customizing the Build	337
Per-File Compiler Flags	337
Cross-Development	338
Building Universal Binaries	341
Disallowing ZeroLink	342
Build Settings in Detail	342
The xcodebuild Tool	351
Using the xcodebuild Tool	352
Compatibility	353
Distributed Builds	353
Summary	356
Exercise	356
Chapter 15: Debugging	359
Running an Application	359
Choosing the Active Executable	360
Built to be Debugged	361
Debugging Executables	364
Attaching to Running Executables	365
The Debugger Window	365
The Threads Pane	366
The Listing or Editor Pane	367
The Variables Pane	368
Controlling the Debugger	370
Debug Visualizer	375
Breakpoints	375
Breakpoint Types	377
Breakpoints Window	377

Deleting Breakpoints	378
Grouping Breakpoints	378
Enabling and Disabling Breakpoints	379
Creating Symbolic Breakpoints	380
Iffy Breakpoints	381
Breakpoint Actions	384
Breakpoint Continuation	387
Importing and Exporting Breakpoints	388
Breakpoint Templates	388
Examining Data	389
Viewing Global Variables	391
Expressions	392
Data Formatters	393
Beyond Data Formatter Strings	398
Object Descriptions	399
Watchpoints	399
Changing Data and Code	399
The Magic Fix	400
Magic Fix Limitations	402
Debugger Console	402
Shared Libraries	403
Custom Executables	404
General Settings	405
Arguments and Environment	406
Debugging	407
Selecting an Executable	408
Debugger Preferences	409
Remote Debugging	410
Debugging Aides	413
Catching a Catch	413
Stopping for Debugger() and DebugStr()	414
Guard Malloc	414
Debug Variables	415
Summary	418
Chapter 16: Performance Analysis	419
Performance Basics	419
Preparing for Analysis	421
Shark	421
Profile View	423
Statistical Sampling	425
Code View	428

Contents

Stack View	431
Refining the Analysis	432
Saving and Comparing Shark Sessions	433
Merging Shark Sessions	434
Tip of the Iceberg	434
Sampler	434
MallocDebug	435
Pruning	437
ObjectAlloc	439
Global Allocations	440
History Graph	441
Instance Browser	441
Call Stack	442
Other Performance and Analysis Tools	443
Summary	444
Exercise	444
Chapter 17: Unit Testing	445
How Unit Tests Work	446
Preparing for Unit Tests	446
Independent Unit Tests	447
Dependent Unit Tests	447
Target Dependencies	448
Adding a Unit Test Target	448
Configuring an Independent Unit Test	449
Configuring a Dependent Unit Test	450
Creating a Unit Test	453
Inter-test Initialization	454
Objective-C Tests	455
Objective-C Test Macros	457
C++ Tests	458
Debugging Unit Tests	464
Debugging Dependent Unit Tests	464
Debugging Independent Unit Tests	465
Summary	466
Exercise	466
Chapter 18: Sharing Source	467
Source Trees	468
Define a Source Tree	469
Source Tree References	469

Source Control	471
Installing the Subversion Client	472
Creating a Repository	473
Adding a Project to Source Control	473
Configuring a Project for Source Control	474
Source Control Interface	476
SCM Smart Group	477
Committing Changes	480
Saving Before Committing	481
Discarding Changes	481
Adding Files to Source Control	482
Deleting Files under Source Control	482
Renaming Files under Source Control	483
Updating Files	483
Comparing Revisions	484
Customizing Compare	486
Merging Changes	486
Viewing Annotations	487
Resolving Conflicts	488
Going Offline	489
SCM and the Project Document	489
Summary	490
Chapter 19: Customizing Xcode	491
Xcode Preferences	492
Key Bindings	492
Menu Key Bindings	493
Text Key Bindings	496
Expert Preferences	499
Projects and Files	500
Editing	501
Functions Menu	502
Building	503
Distributed Builds	505
Debugging	505
Source Code Management	506
Documentation	507
Templates	508
File Templates	508
Template Macros	509
Project Templates	512
Target Templates	516

Contents

Custom Scripts	517
The StartupScript	518
The Default StartupScript	519
Anatomy of a Custom Script	520
Menu Script Definitions	520
Custom Script Variables	524
Script Helpers	526
AppleScript	528
Summary	530
Exercise	530
Appendix A: Exercise Answers	531
Appendix B: Project Templates	543
Index	559
