

Index

Note to the Reader: Throughout this index **boldfaced** page numbers indicate primary discussions of a topic. *Italicized* page numbers indicate illustrations.

A

- A command, 688
- AbiWord word processor, **546–547**, 546
- About Myself applet, **445**, 446
- About To Upgrade screen, 115, 117
- absolute paths, 218
- ACCEPT action, 653–654
- access file, 738
- access.db file, 738
- access issues
 - in Apache web server, **852**
 - in remote access, **675–676**
 - in security, **661**
- access_log file, 724, 724
- AccessFileName directive, 852
- Accessibility applet
 - in GNOME, **446**, 446
 - in KDE, 507
- accessories
 - in GNOME, **456–459**, 456–460
 - in KDE, **513–518**, 514–516, 518
- accounts
 - CUPS, 718
 - PAM modules for, 647–648
 - user. *See* users and user accounts
- actions for iptables, **653–654**
- Activate on Boot option, 153
- Active ISDN Cards menu, 354
- Active On Boot option, 75
- Add A New Print Queue dialog box, 730, 731
- Add a Record screen, 681, 681
- Add Account-KMail screen, 752
- Add New Class screen, 709, 710
- Add New Device Type screen, 576–579, 576, 578–579
- Add New Printer screen, 703, 703
- Add New User function, 831
- Add NFS Share screen, 784, 785
- Add Partition dialog box, 64–65, 65, 144–145, 145
- AddCharset directive, 860
- AddDefaultCharset directive, 860
- AddDescription directive, 858
- AddEncoding directive, 858
- AddHandler directive, 860–861
- AddIcon directive, 857
- Additional Language Support screen, 78, 78
- AddLanguage directive, 858–859
- address books
 - in KDE, 503
 - in Mozilla, **470**, 471
- Address Manager accessory, 517
- Address Resolution Protocol (ARP), 616, 625
- addresses
 - hardware, **609**
 - IP. *See* IP addresses
 - network, 608, 628–629
- AddType directive, 852
- Admin Server option, 83
- administration
 - command line vs. GUI, 279
 - command reference for, **895**, **898–899**
 - utilities for. *See* system administration utilities
- Administration Tools package group, 89, **183**
- administrative contacts in Apache web server, **847**
- administrators, backups for, **389**
- Advanced Boot Loader Configuration screen, 73, 74
- Advanced Power Management (APM) system, 345
- After Installation, Keep Binary Packages On Disk option, 104
- AIX operating system, 10
- alias command, 220
- Alias directive, 854–855
- aliases
 - in Apache web server, **854–855**
 - in sendmail, **738**
 - in shells, **268**, 268
- aliases file, 738
- ALL wildcard, 672
- Allow command, 722
- Allow directive, 850
- Allow Incoming option, 77
- Allowable Drives option, 65, 145
- AllowOverride directive, 851
- alpha.rpm extension, 294
- amanda service, 670
- Amateur Radio Support menu, **352**, 353
- ampersands (&) for background programs, 264
- anaconda-ks.cfg file, 187–188
- anaconda.log file, 110
- Anaconda program, 41. *See also* local installation
- Anonymous command, 722
- anonymous items in FTP
 - servers, **767–769**
 - uploads, **774**
 - users, 764
- AOLServer web server, 838
- Apache Configuration screen, 582, 583, 878, 878
- Apache web servers, **839**
 - command reference for, **911**
 - configuring, **582–583**, 583, **840**, **877**, 877
 - file copying for, **123**
 - global environment for, **842–847**
 - installation parameters for, **125**
 - mail server configuration for. *See* mail services
 - main parameters for, **869–870**, 870

- modules in, 866–867
- packages for, 839–840
- performance tuning for, 878, 878
- sharing directories in, 123–124, 124
- starting, 841, 841
- troubleshooting, 867–868
- with TUX, 880–881, 881
 - for virtual hosts, 866, 870–877, 870–876
- APM (Advanced Power Management) system, 345
- apm file, 310
- Appearance & Themes section, 494–497, 495–497
- Appearance applet, 497
- append command, 45
- Appletalk Devices menu, 350
- application-level protocols
 - in OSI model, 610
 - in TCP/IP model, 613–614, 614
- Applications package groups, 86, 86
- applink directory, 425
- archiving
 - cpio for, 393
 - dump for, 394
 - tar for, 391–393
- ARCnet Devices menu, 351
- ARP (Address Resolution Protocol), 616, 625
- arp command, 625, 900
- aRts Builder utility, 529
- aRts Control utility, 529
- ASCII mode in FTP, 766
- asterisks (*) in shells, 266
- Asynchronous Transfer Mode (ATM) networks, 616
- at.allow file, 374
- at daemon, 373–374
- at.deny file, 374
- at package, 178
- ATA/IDE/MFM/RLL support menu, 347, 348
- athlon.rpm extension, 294
- ATM (Asynchronous Transfer Mode) networks, 616
- ATM Drivers menu, 352
- AT&T consent decree, 9–10
- Audio CDs applet, 509
- Audio Devices screen, 575, 575
- Audio Player application, 476, 477
- auth command, 195
- auth_mysql.conf file, 867
- auth_psql.conf file, 867
- AuthClass command, 722
- authconfig command, 192
- authconfig file, 599
- authconfig-gtk utility, 596
- authentication
 - in installation, 81–84, 82–83, 157, 158, 596–599, 597
 - in Kickstart, 192, 203–204, 204
 - PAM modules for, 647–648
- Authentication Configuration menu, 203–204, 204
- Authentication Configuration screen, 81–83, 82–83, 157, 158
- AuthGroupName command, 722
- Authoring and Publishing package group, 86, 182

- AuthType command, 722
- automake program, 184
- automatic partitioning, 61–62, 61, 142–143, 143
- Automatic Partitioning screen, 142–143, 143
- automatic rescue mode, 319–320, 320
- Autorun utility, 513
- availability, RAID for, 400
- Available Package Updates screen, 304, 304
- AX.25 Network Device Drivers menu, 352

B

- back quotes (`) in shells, 267–268
- background, shells in, 263–264
- Background applet
 - in GNOME, 447, 447
 - in KDE, 495, 495
- Background Preferences menu, 447, 447
- backslashes (\) in shells, 266–267
- backup domain controllers (BDCs), 801
- backups, 387
 - commands for, 391–399, 395–396, 399, 895–896
 - data disaster scenarios for, 388
 - levels of, 388–389
 - media for, 390–391
 - RAID for, 399–405, 402
 - risk assessment in, 387–388
 - types and frequency of, 389–390
- Balsa e-mail manager, 547, 548
- Base package group, 178–179
- baseline configurations, 334
- basesystem package, 178
- bash (Bourne Again Shell), 255–256
- BASH_ENV variable, 261
- .bash_history file, 259, 259
- .bash_logout file, 259, 259
- bash package, 178
- .bash_profile file, 260, 260
- bashrc file, 258, 258
- .bashrc file, 260, 260
- basic configuration menus
 - for kernel upgrades, 342–345, 342–345
 - in Kickstart Configurator, 197, 197
- Basic Edition, 5
- Basic hardware support option, 344
- batch jobs, 374
- baud rate setting, 634
- BDCs (backup domain controllers), 801
- Behavior applet, 497, 513
- Berkeley Standard Distribution (BSD), 10
- bin directory, 236
- binary RPMs, 299
- bind-utils package, 178
- binutils package, 184, 337
- BIOS tips, 37–39, 37
- bits in IP addresses, 617–618, 631–632
- Block Devices menu, 346, 347
- Bluetooth support menu, 354–355, 355
- Boa web server, 838

- boot directory, 236
 - kernel-related files in, 329
 - space requirements for, 147
 - Boot Disk Creation screen, 94, 95
 - Boot Diskette screen, 162, 162
 - boot disks
 - command reference for, 886–887, 887
 - commands on, 44–46, 45
 - creating, 42–44, 44, 94, 95
 - for local installation, 42–47, 44–45
 - for network installation, 127–130, 129, 162, 162
 - specialized, 318
 - boot.iso file, 47, 128
 - Boot Loader Configuration screen, 71–72, 71–72, 148, 149, 151, 151
 - Boot Loader Options menu, 198–199, 199
 - boot.log file, 379–380, 379
 - Boot Manager (LILO) applet, 511
 - boot process, 307–308
 - BIOS tips for, 38
 - command reference for, 894
 - default configuration files in, 308–309
 - for bootloader, 312–316, 313, 315
 - for hardware detection, 309–311, 309, 311
 - for listing modules, 311–312, 312
 - for runlevels, 316–317, 317
 - troubleshooting, 317–323, 319–322
 - bootable partitions, 241, 241
 - bootdisk.img file, 128
 - bootloader command, 190, 195
 - bootloaders, 99, 99, 308
 - in boot process, 311–314, 313
 - in local installation, 71–73, 71–74
 - location of, 151, 151
 - in network installation, 148–150
 - passwords for, 645–646
 - updating, 329–330, 329–330, 365–367, 366
 - upgrading, 170–171, 171
 - BOOTP clients, 694, 695
 - Bourne Again Shell (bash), 255–256
 - Bps/Par/Bits setting, 637
 - break-in detection, 657–660, 658–659
 - broadband, 632
 - broadcast addresses, 628, 719
 - browse lists, 801, 822
 - browse masters, 801
 - Browse option, 835
 - Browser Identification applet, 513
 - BrowserMatch directive, 862–863
 - browsers
 - in Apache web server, 862–863
 - in GNOME, 464, 464, 468–472, 468–473
 - in KDE, 512–513, 512, 522, 522–523
 - browsing
 - in cupsd.conf, 719–720
 - in Samba, 813, 901
 - security for, 720–721
 - BSD (Berkeley Standard Distribution), 10
 - bugs, upgrades for, 326
 - Bugzilla, 18
 - burning CDs
 - for backups, 398–399, 399
 - in GNOME, 478–479, 479
 - bytes in IP addresses, 617–618, 631–632
- ## C
- Cache applet, 513
 - Cache User Information option, 597
 - caches
 - in Apache web server, 865
 - in KDE, 513
 - caching-only DNS servers, 679
 - Calc application, 536–538, 537
 - calculators
 - in GNOME, 456, 457
 - in KDE, 517
 - cameras
 - compatibility of, 32
 - front ends for, 563
 - Cancel action, 699
 - canonical names, 848
 - CAs (Certificate Authorities), 873
 - case management, 814–815
 - cat command, 223
 - Caudium web server, 838
 - CD And DVD Preferences screen, 447
 - cd command, 216
 - CD Database Preferences screen, 475
 - CD Player application, 476–478, 477
 - CD Properties applet, 447, 447
 - CD writers, 479, 480, 484, 485
 - cdrecord command, 398, 399
 - CDs
 - for backups, 391, 397–399, 399
 - for local installation, 47–50, 48–49
 - Certificate Authorities (CAs), 873
 - certified hardware, 30–31, 31
 - Cervista tool, 528
 - CGI Scripts applet, 513
 - chage command, 282–283
 - chains, firewalls as, 649, 650
 - Change Drive Order option, 74
 - Change Password function, 831
 - changing directories, 216
 - Channels dialog box, 302, 303
 - Character devices menu, 358–359, 358
 - Character Map, 457, 457
 - Character Selector utility, 514, 514
 - charting programs, 552, 552
 - chat programs
 - in GNOME, 464, 465
 - in Mozilla, 472, 472–473
 - ChatZilla! program, 472, 472–473
 - Check For Bad Blocks option, 65, 145
 - chgrp command, 226
 - chkconfig command, 376, 841
 - chkconfig service cups-lpd on command, 724

- chmod command, 225
 - Choose A Language screen, 131, 132
 - chown command, 226
 - chroot jail, 769
 - CIDR (Classless Inter-Domain Routing), 631–632
 - CIPE (VPN) Connection option, 633
 - classes
 - IP address, 618–619
 - printer
 - in cupsd.conf, 723
 - managing, 709–710, 710–711
 - classes.conf file, 712
 - Classless Inter-Domain Routing (CIDR), 631–632
 - cleaning kernel source code, 334
 - Clear option, 422
 - clearpart command, 193, 195
 - client.conf file, 712
 - Client/Server Password Management section, 831
 - clients
 - Apache web server, 843–844
 - BOOTP and DHCP, 694, 695
 - FTP, 757–778
 - commands for, 758–759, 758, 907–908
 - connecting with, 759–760, 759–760
 - GUI, 760–762, 761
 - IM, 474–475, 474
 - mail services, 747–754, 748–753
 - NFS, 787–788
 - NIS, 794–797
 - Samba, 802–804, 802
 - Clipboard Tool, 514
 - clock file, 570
 - CNAME command, 688
 - Code maturity level options, 342–343, 342–343
 - Color Chooser application, 564–565, 565
 - Color Depth setting
 - in local installation, 97–98
 - in network installation, 167, 167
 - in X Window, 415
 - color in XF86Config, 431
 - Colors applet, 495, 496
 - COLORTERM variable, 261
 - comma-separated format, 538
 - command completion, 257–258
 - command line, 215
 - for administration, 279
 - command combinations in, 228
 - editors
 - emacs, 232, 232
 - joe, 233, 234
 - pico, 232–233, 233
 - vi, 228–231, 229
 - for files and directories
 - managing, 222–226, 223
 - manipulating, 226–228
 - setting up, 218–222
 - for navigation, 215–218, 217
 - for permissions, 225–226
- command mode in vi, 229–230, 229, 891
- command reference, 883–884
 - for backups, 895–896
 - for boot process, 894
 - for files and directories
 - managing, 889
 - manipulating, 890
 - reading, 889–890
 - sharing, 905–911
 - for installation, 884–888, 887
 - for miscellaneous commands, 911–912
 - for navigation, 888
 - for network services, 903–905
 - for networking, 900–902
 - for packages, 894
 - for partitions, 890–891
 - for users and groups, 893
 - for vi editor, 891–892
 - for X Window, 896–899
- comments for troubleshooting, 435
- Common Unix Print System. *See* CUPS (Common Unix Print System)
- community knowledge hardware, 33–34
- compatibility of hardware, 29–34, 30–32
- Component Chooser, 503
- components, 6–8
- comps.xml file, 175–177
- computer passwords, 645
- concatenating files, 223
- condrestart action, 375
- conf.d directory, 866
- conf file, 867
- .config file, 333–334
- configuration editor in GNOME, 484, 485
- configuration files
 - for CUPS, 712–723
 - default, 308–309
 - for bootloader, 312–316, 313, 315
 - for hardware detection, 309–311, 309, 311
 - for listing modules, 311–312, 312
 - for runlevels, 316–317, 317
 - for DHCP servers, 691–693
 - for DNS servers, 683–688, 684, 687–688
 - for FTP servers, 762–767
 - for kernel. *See* kernel upgrading and recompiling
 - for LPD, 726–727, 726
 - for networks, 626–627
 - for Samba, 806–821, 807, 809, 818
 - for sendmail, 738–739
 - for WU-FTP server, 769–774, 771, 773
 - for X Window, 423–424
 - startx, 424–425, 424
 - X11, 425–426
 - XF86Config, 429–434
 - xinitrc, 426–429, 429
 - Xresources, 429
- configuration menus, 336
 - basic, 342–345, 342–345
 - for hardware
 - external, 355–358, 356–357
 - other, 358–362, 358–362

- make menus, 337–341, 339–341
 - for networking, 349–355, 350–355
 - purpose of, 338
 - for software, 362–365, 363–365
 - for storage devices, 346–349, 346–349
 - Configure Hesiod option, 597
 - Configure Kerberos option, 599
 - Configure LDAP option, 597–598
 - Configure NIS option, 597
 - Configure screen, 752, 752
 - Configure SMB option, 599
 - Configure TCP/IP screen, 136, 136
 - Configure WINS As option, 826
 - connection-oriented protocols, 615
 - connections
 - Internet, 632–638, 633–637
 - LAN, 622
 - printer, 804–806, 805
 - Console drivers menu, 359, 359
 - consoles, virtual, 109–112, 111–112
 - Content Accelerator, 878–881, 879, 881
 - contents of files, 224
 - Continue option, 319
 - Control Center
 - in GNOME, 445–456, 445–455
 - in KDE, 493–513, 494–512
 - control flags for PAMs, 647
 - converting
 - LPD to CUPS, 700
 - passwords, 284
 - Cookies applet, 513
 - copying files, 219
 - for Apache web servers, 123
 - for FTP servers, 125–126
 - for NFS servers, 120–121
 - Core package group, 177–178
 - costs
 - of hardware, 28–29
 - of Linux, 13–14
 - Country/Region & Language applet, 507
 - cp command, 219
 - cpio command, 393
 - cpio package, 178
 - cpp-* package, 337
 - cpuinfo file, 310
 - CPUs
 - requirements for, 6, 34
 - for RPMs, 294
 - Create A Boot Disk utility, 531, 531
 - Create action, 699
 - Create New Boot Loader Configuration option, 170
 - Create New Group dialog box, 591, 591
 - Create New Samba User dialog box, 834, 834
 - Create New User dialog box, 590, 590
 - Create Samba Share dialog box, 835, 835
 - cron daemon, 369–372
 - cron file, 380, 381
 - cron daemon, 370
 - crontab command, 370
 - crontab file, 370
 - crontabs package, 178
 - CrossOver Office application, 16, 544–545
 - Crypto Hardware support menu, 362, 362
 - Cryptography support menu, 362, 363
 - CUPS (Common Unix Print System), 667, 697
 - for administrative tasks, 711–712, 711
 - configuring, 699–702, 701
 - downloading, 702, 702
 - file configuration for, 712–723
 - help for, 709
 - with IPP, 698–699
 - for job management, 707–709, 708, 723–724, 723
 - for printer classes, 709–710, 710–711
 - for printer management, 703–707, 703–707, 723–724, 723–725
 - CUPS accounts, 718
 - cups directory, 699, 707
 - CUPS Jobs screen, 723, 723
 - cups-lpd service, 699, 723
 - cupsd.conf file, 713, 733
 - browse security in, 720–721
 - CUPS accounts in, 718
 - encryption support in, 715
 - log file variables in, 714–715
 - network browsing in, 719–720
 - network settings in, 718
 - print job management in, 716–717
 - printer classes in, 723
 - security printouts in, 715–716
 - server variables in, 713
 - standard directories in, 713–714
 - system security in, 721–722
 - user limits in, 719
 - cupsd daemon, 700
 - Custom installation option, 60, 141–142
 - Customize option for firewalls, 77
 - Customize Packages to Upgrade screen, 170, 170
 - Customizing Graphics Configuration screen, 96, 97
- ## D
- DAEMON_OPTIONS command, 742–743
 - daemons
 - logs for, 380, 381
 - types of, 7–8
 - data directions with firewalls, 649
 - data-link-level protocols in OSI model, 611
 - data streams, 262–263
