EXERCISE 7: PEN TOOL OPTIONS AND STRAIGHT LINE SHAPES

1. Drag out the *Tearoff* options of the *Pen Tool*. Draw an ellipse and try out the different *Pen Tools* options (Ref page 22)

2. Draw a circle and copy it 4 times

   *Add* an anchor point and move the new anchor point towards the centre of the circle

   *Delete* an anchor point

   *Convert* an anchor point

   *Convert* the handles to create points and change the shape

3. Using this guide draw a straight line closed shape, take note of the symbols next to the *Pen tool* (Ref page 23)

   ![GUIDE]

4. Using this guide draw a straight line shape holding *Shift* at the same time. Do not close this shape (Ref page 23)
