**YOU AS A CULTURALLY DIVERSE ENTITY**

*Directions:* Think about what cultures you belong to (such as Southern, Israeli, women, corporate, mothers). Then think about the beliefs, values, and biases that come from these experiences. What is their impact on you in your professional life? Label each circle with a culture you identify as being part of, and next to each write the most important rules, norms, and values you have as part of the group.

1. What reactions and/or surprises do you have to your own cultural diversity?

2. Do any of your cultural programs come in conflict with one another? If so, where?
