Preface ix
Introduction xi

SILICON CARBIDE AND CARBON COMPOSITES

Single- and Multi-Layered Interphases in SiC/SiC Composites 3
Exposed to Severe Conditions: An Overview
   Roger Naslain, René Pailier, and Jacques Lamon

Research and Developments on C/C Composite for Very High
Temperature Reactor (VHTR) Application
   Taju Shibata, Junya Sumita, Taiyo Makita, Takashi Takagi, Eiji Kunimoto, and
   Kazuhiro Sawa

X-Ray Tomographic Characterization of the Macroscopic Porosity
of CVI SiC/SiC Composites—Effects on the Elastic Behavior
   L. Gélebart, C. Chateau, M. Bornert, J. Crépin, and E. Boller

Mechanical Strength of CTP Triplex SiC Fuel Clad Tubes after
Irradiation in MIT Research Reactor under PWR Coolant Conditions
   Herbert Fainroth, Matthew Ales, Eric Barringer, Gordon Kohse, David Carpenter,
   and Roger Jaramillo

MECHANICAL PROPERTIES

Behaviors of SiC Fibers at High Temperature
   C. Colin, V. Falanga, and L. Gélebart 59
Fracture Resistance of Silicon Carbide Composites Using Various Notched Specimens
Takashi Nozawa, Hiroyasu Tanigawa, Joon-Soo Park, and Akira Kohyama

Optimization of an Interphase Thickness in Hot-Pressed SiC/SiC Composites
Weon-Ju Kim, Jong Hoon Lee, Dang-Hyok Yoon, and Ji Yeon Park

Validation of Ring-on-Ring Flexural Test for Nuclear Ceramics Using Miniaturized Specimens
S. Kondo, Y. Kato, J. W. Kim, and L. L. Sneed

MATERIAL AND COMPONENT PROCESSING

Design, Fabrication, and Testing of Silicon Infiltrated Ceramic Plate-Type Heat Exchangers
J. Schmidt, M. Schellfle, M. Crippa, P. F. Peterson, K. Sridharan, Y. Chen,

Microstructural Studies of Hot Pressed Silicon Carbide Ceramic
Abhijit Ghosh, Abdul K. Guin, Ram K. Fotedar, Goutam K. Dey,
and Ashok K. Suri

Diffusion Bonding of Silicon Carbide to Ferritic Steel
Zhihong Zhong, Tatsuya Hinoki, and Akira Kohyama

CERAMICS FOR FUEL COATING

Fracture Properties of SiC Layer in TRISO-Coated Fuel Particles
Thak Sang Byun, Jin Weon Kim, John D. Hunn, Jim H. Miller, and
Lance L. Sneed

Optimization of Fracture Strength Tests for the SiC Layer of Coated Fuel Particles by Finite Element Analysis
Jin Weon Kim, Thak Sang Byun, and Yutai Katoh

Laser Melting of Spark Plasma Sintered Zirconium Carbide:
Thermophysical Properties of a Generation IV Very High Temperature Reactor Material
Heather F. Jackson, Doni J. Daniel, William J. Clegg, Mike J. Reece,
Fawad Iman, Dario Manara, Carlo Perinetti Casoni, Franck De Bruycker,
Konstantinos Boboridis, and William E. Lee

NUCLEAR FUELS AND WASTES

Development and Testing of a Cement Waste Form for TRU Effluent from the Savannah River Site Mixed Oxide Fuel Fabrication Facility
A.D. Cozzi and E.K. Hansen
Frit Optimization for Sludge Batch Processing at the Defense Waste Processing Facility
Kevin M. Fox, David K. Peeler, and Thomas B. Edwards

Ceramic Coated Particles for Safe Operation in HTRs and in Long-Term Storage
Heinz Nabielek, Hanno van der Merwe, Johannes Fachinger, Karl Verfondern, Werner von Lensa, Bernd Grambow, and Eva de Visscher-Tynova
