- business models
  - e-enabled business models, 135–139
- collaborative context, 177–181
- planning, 155–157
- virtual context 177–181
- decoupling point, 55, 64

### E, I, J, L

- e-commerce
  - definition, 149
  - sales chain, 149–153
  - return on investment (ROI), 149–153
- electronic data interchange (EDI), 126, 135, 175, 194, 208, 219
- e-commerce
  - definition, 149
- sales chain, 149–153
- return on investment (ROI), 149–153
- electronic data interchange (EDI), 126, 135, 175, 194, 208, 219
- just in time (JIT), 61, 93–101, 104–106, 125, 138, 176, 220
- logistics
  - information system for e-logistics, 206–223
  - logistics and layers of management, 203–206
  - logistics in perspective, 191–202
  - reverse logistics, 235–236

### M, N, O, P

- master production schedule (MPS), 79–80, 95, 112, 155, 158–159
- MRP I, 60, 61, 63
- MRP II, 61, 63, 76, 77, 94–96
- negotiations (and portals), 181–184
- organisational structures, 7, 33–37, 127, 136, 137, 163, 166
- physical distribution policy, 243–245

- enterprise resource planning (ERP), 59, 107, 163, 181
- inventory control system (ICS), 10, 63, 65–75, 104, 108
- split deliveries, 97
- just in time (JIT), 61, 93–101, 104–106, 125, 138, 176, 220
projected available balance (PAB), 159, 210
portals, 144, 175, 181–184
process
definition and control, 13–15
modelling, 15–19
management by process, 19–31

Q, S, V, W
quality management
acceptance testing, 248

average outgoing quality, 252–255
safety stock, 69–72, 95, 97, 158
sourcing policy, 237–243
supply
chain management, 18, 52, 203–206
networks, 128
value chain (Porter), 19
virtual organisation, 175–177
warehouses (location analysis), 227–235
