Congratulations on purchasing this book and making a commitment to learn more about forensic accounting! Forensic accounting is consistently one of the top growing service areas according to Accounting Today—Top 100 Firms, and the area is expected to grow four times more quickly than the accounting profession as a whole over the next five years. The foundation of this book is based on the body of knowledge for the Certified in Financial Forensics (CFF®) Credential. Offered by the AICPA Forensic and Valuation Services (FVS) Section and available exclusively to CPAs, the CFF® credential represents an unparalleled combination of experience, education, comprehensive testing, and a commitment to a code of professional ethics.

The CFF® credential encompasses a wide range of service areas where CPAs can apply their skills including: bankruptcy and insolvency; forensic data analysis; family law; fraud prevention, detection and response; financial statement misrepresentation; and damages calculations. Becoming a CFF® credential holder will allow you to add greater value to your firm and deepen client relationships through expanded offerings. By building on the well-established CPA brand, the CFF® credential will help you position yourself as a competent and trustworthy financial forensic expert and promote a greater level of confidence to your clients and employers.

The AICPA FVS Section has the resources and tools you need to enhance your business and career. Let us help you develop your forensic accounting practice. Please visit aicpa.org/fvs for more information on the CFF® credential and the AICPA FVS Section.
