applied problems, 864–65
clockwise/counterclockwise
orientation, 826, 830
composition eManipulative,
858, 862
congruence
isometries, 846–52
polygons, 851
shapes, 851–52

Index
vertex/interior angles  
about, 605–6  
alternate interior angles, 593–94  
angle bisector construction, 746  
and angle sum in a triangle, 594, 606  
interior angles on the same side of the transversal, 603  
measurement of, 606–7, 610  
of n-gons, 605–7, 610  
polyhedrons, 623  
of quadrilaterals, 575  
and radius of a circumscribed circle, 811  
right triangles, 574, 592, 595  
and tessellation, 608, 610  
and transformations, 826

vertex of the angle  
about, 568, 574  
adjacent angles, 591, 595  
measurement of, 591–92  
polyhedrons, 623–25, 627  
tessellations, 608  
vertex of the base, 623–25, 627  
vertex of the quadrilateral, 570  
vertex of the triangle, 569, 570, 608, 610  
vertical angles, 592, 595  
vertical axis. See y-axis  
vertical line test, 399  
Vieta, Francois, 259

volume, 696–705  
capacity vs., 648, 651–52  
Cavalieri’s principle, 703–5  
cones, 701–2, 703  
cylinders, 699–700  
formulas (See inside back cover)  
holistic measures, 647–48  
prisms, 696–99  
pyramids, 700–701  
spheres, 702–5  
units of measurement, 656–57  
and water displacement, 707  
von Neumann, John, 121

W  
Wallis, 370  
water displacement and volume, 707

Weierstrass, Karl, 298  
weight measures, 649, 652  
Wells, H. G., 412  
whole number(s), 57–59, 131–40, 145–55, 162–66  
about, 44  
addition  
about, 87–93, 105, 133  
algorithms, 145–47, 163, 262  
decimals, 262  
additive properties, 89, 90, 100, 131  
algorithms, 145–54  
addition, 145–47, 163, 262  
division, 151–54, 165–66, 265–66  
multiplication, 149–50, 164–65, 263, 264–65  
subtraction, 147–49, 262, 264  
amicable, 199  
calculator computations, 137–40

number system diagram, 342, 351, 360  
numerals and, 57  
and ordering, 58–59, 116–17  
ordinal, 57  
pentagonal, 35  
primes with their respective exponents, 190–91  
properties  
additive, 89, 90, 100, 131  
multiplicative, 102, 104–7, 113, 131  
transitive property of greater than and less than, 116  
zero, 106  
reading, 70, 71, 72  
rectangular, 35  
rounding, 135–37  
separating decimal portion of a numeral from, 70  
set models  
addition, 87–88  
division, 108  
multiplication, 101  
subtraction, 93–94  
sets as basis for, 45–51  
sharing division, 107–8  
square roots, 184  
subtraction  
algorithms, 147–49  
decimals, 262, 264  
missing-addend approach, 94–96, 163–64  
take-away approach, 93–94, 95  
transitive property of greater than and less than, 116  
triangular, 32  
unclosed set, 94  
in Use a Variable strategy, 12–13  
writing, 70, 71, 72  
zero, property of, 106  
whole-to-part ratios, 275  
Who Wants to Be a Millionaire?, 705  
Wiles, Andrew, 174  
Work Backward strategy, 16–17, 251, 298, 557

World Cup Soccer Championships, 612  
World Series, 538  
writing numbers, 70, 71, 72

X  
x-axis  
of bar graphs and histograms, 421, 422–23  
polar coordinates, 805  
reversing information to distort graph, 462–63  
and scaling, 461–62, 464, 465, 466  
x-coordinate  
about, 392, 785  
equations of lines, 795–800  
midpoint formula, 784, 786  
simultaneous equations, 799–802

Y  
yard, 650  
y-axis  
of bar graphs and histograms, 421  
of coordinate system, 392  
of histograms, 421  
reversing information to distort graph, 462–63  
y-coordinate  
about, 392, 785  
equations of lines, 795–800  
midpoint formula, 784, 786  
ortocenter of a triangle, 810  
simultaneous equations, 799–802  
slope-intercept equation, 796–98  
See also slope

y-intercept  
point-slope equation of a line, 798–99  
slope-intercept equation of a line, 796–98  
Young, Grace Chisholm, 334  
Young, William, 334

Z  
zero  
adding, 91  
as additive identity, 90  
in clock arithmetic, 891  
division property of, 109  
divisors property of integers, 323  
as exponent, 120  
as identity property, 90  
as integer, 305  
in Mayan numeration system, 63–64  
multiplication property of, 106  
repetend and repetend not zero, 359  
zero pair, 305  
z-scores, 449–50, 453–55
