Index

Note to the Reader: Throughout this index boldfaced page numbers indicate primary discussions of a topic. Italicized page numbers indicate illustrations.

A
ABP (Address Book Policies), 36
absolute scope in RBAC permissions, 105
acceptance testing, 329–330
access. See data access
access control entries (ACEs), 103, 112
access control lists (ACLs), 103, 112
actions in EOP, 173
activation rules in mail apps, 293
Active Directory
contact photos in, 234
deployment, 322–323
distribution groups, 243
forest merging, 150
integration
Exchange 2000/2003, 28–29
Exchange 2007, 30
Exchange 2010, 35
mail flow, 43
site-based routing, 31
split permissions model, 124–125
Active Directory Certificate Authority, 151
Active Directory Federation Services (ADFS)
authentication, 73
Exchange Online, 149
single sign-on, 139
Active Directory Lightweight Directory Services (AD LDS), 173
Active Directory Migration Tool (ADMT), 336
Active Directory Rights Management Service (AD RMS), 188–190
Add-MailboxPermission cmdlet, 237
Add-MailboxPermissions cmdlet, 274
Add-ManagementRoleEntry cmdlet, 113, 120
add-on solutions, 297
Add-RoleGroupMember cmdlet, 115
Address Book Policies (ABP), 36
address books
in collaboration, 234–235,
234–235
offline, 336, 338
ADFS (Active Directory Federation Services)
authentication, 73
Exchange Online, 149
single sign-on, 139
ADFS Proxy servers, 73
Admin Audit Log agent, 122, 122
admin audit logging, 121–122
Admin Roles tab, 125
administration management, 127
EAC
access to, 134–135
hybrid deployments, 135
new features, 132–134,
133–134
PowerShell, 135–136
scenarios, 127–131
scripts, 136
tools, 131–132
administrator auditing, 36, 195–196,
196, 209
ADMT (Active Directory Migration Tool), 336
Advanced Encryption Standard (AES), 191–192
Advanced Query Syntax (AQS) filter, 279
AFR (annual failure rate), 63
alerting, 357–358
AllSigned execution mode, 136
analysis paralysis, 6
annual failure rate (AFR), 63
antimalware protection, 175–177
antispam protection, 175–177
antivirus program deployment, 327
appends in compliance policies, 206
application integration in migration, 352–353
application programming interface (API), 261, 264–268
appointments, 285
AQS (Advanced Query Syntax) filter, 279
architectural concepts, 27
Exchange 2000/2003, 28–30
Exchange 2007, 30–34
Exchange 2010, 34–39
Exchange 2013. See Exchange 2013 overview
Architecture Summary section in design, 14–15
archive mailboxes, 36
archiving, in-place, 208
AS (Availability service), 332
association of RBAC roles, 107–111
assumptions, documenting, 8
Attachment Filter Agent, 175
attachments, photo, 291–292
attacks, security, 160–161, 180
auditing
administrator activity, 195–196, 196
administrator login, 36
capabilities, 193–194, 194
mailbox activity, 194–195
authentication
Client Access servers, 45
clients, 315
EWS, 270, 272–273
mailboxes, 273–274
two-factor, 179–183, 310
autoconfiguration in DAGs, 55
Autodiscover
configuring, 255
Exchange 2007, 32
Exchange 2013, 49–51
POX, 270–271
SOAP-based, 271–272
automatic database reseed, 54, 88
automatic mailbox mapping, 237
Automatic Replies feature, 232
availability. See high availability (HA)
availability data sharing
  inter-org migration, 332
  intra-org migrations, 337
Availability service (AS), 332
Average Mailbox Size metric, 91
Average Message Size in KB metric, 91
average seek time metric, 84

B
back pressure feature, 31
background database maintenance (BDM), 93
Background Database Maintenance Throughput Requirements value, 94
bandwidth
