Subject Index

Almond origin and dissemination, 23–81
Anthocyanin accumulation in
  apple, 357–391
Apple:
  anthocyanin accumulation, 357–391
  deficit irrigation, 166–177
Apricot deficit irrigation, 160–163
Cherry deficit irrigation, 163–164
Container-grown ornamentals,
  management, 253–297

Dedication: Thompson, M.M., xiii–xv
Deficit irrigation, deciduous
  fruits, 149–189
Disease, hot water treatment, 191–212

Fruit crops:
  almond origin and dissemination,
    23–81
  apple deficit irrigation, 166–177
  apricot deficit irrigation, 160–163
  cherry deficit irrigation, 163–164
  deficit irrigation, 149–189
  hot water treatment, 191–212
  olive oil composition, 83–147
  peach deficit irrigation, 151–160
  pear deficit irrigation, 177–180
  plum deficit irrigation, 165–166
  prune, deficit irrigation, 165–166
  Genetics and breeding:
    anthocyanin in apple, 363–370
    vegetable, 324–344
  Irrigation, deciduous fruits,
    149–189
  Juvenility, rooting, 225–226
  Nutrition (plant), ornamentals in
    containers, 253–297
  Olive oil composition, 83–147
  Ornamental plants:
    nutrient management in
      containers, 253–297
    water management in
      containers, 253–297
  Peach deficit irrigation, 151–160
  Pear deficit irrigation, 177–180
  Physiology:
    adventitious rooting, 213–225
    vines, 1–21
    Plum deficit irrigation, 165–166
    Postharvest physiology, hot water
      treatment, 191–212
    Propagation, adventitious rooting in
      trees, 213–225
    Prune deficit irrigation, 165–166
Root, adventitious, 213–225
Tree adventitious rooting, 213–225
Vegetable crops:
  breeding, 324–344
  hot water treatment, 191–212
  world industry, 299–356
Vines, biology and physiology, 1–21
Water relations:
  container-grown ornamentals 253–297
  deficit irrigation, 149–189
  deciduous orchards, 149–189
