measurement in, 325–326, 340
Trends in International Mathematics and
Science Study (TIMSS), 8, 122
Triangles, 308–309, 315, 339
Triangular numbers, 390
Turn transformation, 318
Tutorial content/software, 42
Twice-as-much strategy, 190
Two-dimensional shapes, 309–317
Two-sided number lines, 268
U
Understanding
communication and, 27
constructing, 20–21
and learning, 3, 18
memorization vs., 15
speed tests/drills vs., 15
Units, planning for, 44
Units of measurement
choosing, 332–334
comparing objects to, 342–343
conversion of, 343–344
counting, 334–335
equivalences of, 342–343
finding number of, 334–340
Using results phase, assessment, 61
V
Variables (in algebraic thinking), 288
Variation, measures of, 389–390
Verbal interaction, English-language
learners, 55
Vertices
solids, 305
two-dimensional shapes, 309–310
Virtual manipulatives, 43
Visualization. See also Manipulatives
in geometry, 321
of multiplication, 189
Vocabulary
for counting, naming, and representing
numbers, 150
in developing place value, 155–159
for fractions, 251
geometric, 323
for two-dimensional shapes,
309–310
Volume, 332, 345–346
equivalencies, 343
units for, 336
Vygotsky, Lev, 21, 27
W
Web sites. See also specific Web sites
for data collection, 354
Elementary Brain Teaser
Contest, 102
for making patterns, 140
for probability simulations, 374
real-world problem-solving, 109
Weight, 330–331, 336
Whole numbers, 258–259
Working-from-known-facts
strategy, 190
Weight samples, assessment by, 70
Worksheets, computational-skill,
238
Writing numerals, 141–143
Writings
assessment by, 72
open-ended, 93
Written computation, 199, 214
Z
Zero
adding, 184–185
dividing by, 193
as even number, 382
in Hindu-Arabic numeration
system, 149
in multiplication, 190–191, 230–231
subtracting, 187–188, 227
Zone of proximal development, 21, 22
