CONTENTS

Preface xi
About the Authors xi

1 Linear Equations and Mathematical Concepts 1
  1.1 Solving Linear Equations, 2
  1.2 Equations of Lines and Their Graphs, 7
  1.3 Solving Systems of Linear Equations, 15
  1.4 The Numbers $\pi$ and $e$, 21
  1.5 Exponential and Logarithmic Functions, 24
  1.6 Variation, 32
  1.7 Unit Conversions and Dimensional Analysis, 38

2 Mathematics of Finance 47
  2.1 Simple and Compound Interest, 47
  2.2 Ordinary Annuity, 55
  2.3 Amortization, 59
  2.4 Arithmetic and Geometric Sequences, 63

3 Matrix Algebra 71
  3.1 Matrices, 72
  3.2 Matrix Notation, Arithmetic, and Augmented Matrices, 78
  3.3 Gauss–Jordan Elimination, 89
  3.4 Matrix Inversion and Input–Output Analysis, 100
4 Linear Programming – Geometric Solutions

Introduction, 116
4.1 Graphing Linear Inequalities, 117
4.2 Graphing Systems of Linear Inequalities, 121
4.3 Geometric Solutions to Linear Programs, 125

5 Linear Programming – Simplex Method

5.1 The Standard Maximization Problem (SMP), 137
5.2 Tableaus and Pivot Operations, 142
5.3 Optimal Solutions and the Simplex Method, 149
5.4 Dual Programs, 161
5.5 Non-SMP Linear Programs, 167

6 Linear Programming – Application Models

7 Set and Probability Relationships

7.1 Sets, 204
7.2 Venn Diagrams, 210
7.3 Tree Diagrams, 216
7.4 Combinatorics, 221
7.5 Mathematical Probability, 231
7.6 Bayes’ Rule and Decision Trees, 245

8 Random Variables and Probability Distributions

8.1 Random Variables, 259
8.2 Bernoulli Trials and the Binomial Distribution, 265
8.3 The Hypergeometric Distribution, 273
8.4 The Poisson Distribution, 279

9 Markov Chains

9.1 Transition Matrices and Diagrams, 286
9.2 Transitions, 291
9.3 Regular Markov Chains, 295
9.4 Absorbing Markov Chains, 304

10 Mathematical Statistics

10.1 Graphical Descriptions of Data, 315
10.2 Measures of Central Tendency and Dispersion, 323
10.3 The Uniform Distribution, 331
10.4 The Normal Distribution, 334
10.5 Normal Distribution Applications, 348
10.6 Developing and Conducting a Survey, 363
CONTENTS  

11  **Enrichment in Finite Mathematics**  371

11.1  Game Theory,  372
11.2  Applications in Finance and Economics,  385
11.3  Applications in Social and Life Sciences,  394
11.4  Monte Carlo Method,  403
11.5  Dynamic Programming,  422

**Answers to Odd Numbered Exercises**  439

**Using Technology**  502

**Glossary**  506

**Index**  513
