Contents

Preface xi

1 Customer relationship management 1
   1.1 Introduction 1
   1.2 What is CRM? 2
   1.3 What is needed to implement CRM strategies? 3
      1.3.1 Database 3
      1.3.2 Technology 6
      1.3.3 Metrics 7
   1.4 Analytical methods 9
   1.5 Conclusion 9
   References 10

2 CRM in action 11
   2.1 Introduction 11
   2.2 The importance of customer acquisition 13
   2.3 The significance of customer retention 15
   2.4 The impact of customer churn 17
   2.5 The benefits of customer win-back 18
   2.6 Conclusion 20
   References 20

3 Customer acquisition 22
   3.1 Introduction 22
      3.1.1 Data for empirical examples 27
   3.2 Response probability 28
      3.2.1 Empirical example: Response probability 32
      3.2.2 How do you implement it? 34
   3.3 Number of newly acquired customers and initial order quantity 35
      3.3.1 Empirical example: Number of newly acquired customers 37
      3.3.2 How do you implement it? 38
      3.3.3 Empirical example: Initial order quantity 39
      3.3.4 How do you implement it? 42
   3.4 Duration/time 42
      3.4.1 Empirical example: Duration/time 44
### 5.2.1 Empirical example: Balancing acquisition and retention

5.3 Optimal resource allocation

5.3.1 How do you implement it?

5.4 Chapter summary

Balancing acquisition and retention – SAS code

Balancing acquisition and retention – SAS output

References

### 6 Customer churn

6.1 Introduction

6.1.1 Data for empirical examples

6.2 Customer churn

6.2.1 Empirical example: Customer churn

6.2.2 How do you implement it?

6.3 Chapter summary

Customer churn – SAS code

Customer churn – SAS output

References

### 7 Customer win-back

7.1 Introduction

7.1.1 Data for empirical examples

7.2 Customer win-back

7.2.1 Empirical example: Customer win-back

7.2.2 How do you implement it?

7.3 Chapter summary

Customer win-back – SAS code

Customer win-back – SAS output

References

### 8 Implementing CRM models

8.1 Introduction

8.2 CLV measurement approach

8.3 CRM implementation at IBM

8.3.1 IBM background

8.3.2 Implementing a CLV management framework at IBM

8.4 CRM implementation at a B2C firm

8.4.1 The focal firm background

8.4.2 Implementing the CLV management framework at a fashion retailer

8.4.3 Process to implement the CLV management framework at a fashion retailer

8.5 Challenges in implementing the CLV management framework
8.5.1 Challenges in data collection and internal collaboration 219
8.5.2 Challenges in implementing the customer-centric approach 220
References 222

9 The future of CRM 223
9.1 Introduction 223
9.2 Social media 223
9.3 Mobile marketing 226
9.4 Customized marketing campaigns 227
9.5 Conclusion 229
References 229

Appendix A: Maximum likelihood estimation 230
Appendix B: Log-linear model—an introduction 232
Appendix C: Vector autoregression modeling 235
Appendix D: Accelerated lifetime model 241
Appendix E: Type-1 Tobit model 244
Appendix F: Multinomial logit model 246
Appendix G: Survival analysis – an introduction 249
Appendix H: Discrete-time hazard 252
Appendix I: Proportional hazards model 254
Appendix J: Random intercept model 257
Appendix K: Poisson regression model 260
Appendix L: Negative binomial regression 262
Appendix M: Estimation of Tobit model with selection 265
