SUBJECT INDEX

Abandonment, 589
  depression, 43
  Intimate Partner Violence (IPV) and, 235, 237, 238, 244
Abnormality
  interpersonal description of, 360
  in interpersonal diagnosis, 364
Accommodating-Trusting, 585
Accuracy, 157. See also Achievement, 175
  empathic (see empathic accuracy, 143)
  problems, lens model used for, 180
  study of, 365
Accuracy criterion, 160
Achievement
  defined, 176
  dependents of, 178
  enhancing or compromising, 176
  in lens model, 175
  matched links and, 177
  strength of, 179
  study of, 176
Acquaintanceship effects in empathic accuracy, 146
Act-by-act behavioral complementarity, 128, 134
Action verbs, 58
Active love, in SASB model, 328, 333
Activity, 93
Adaptations, 76
Adaptive inferential feedback, 436
Adaptive landscape notion, 79, 80
Adaptive personality development, 38
Adolescents. See Child and adolescent psychopathology; Children, 493
Adoption studies, 100
Adult attachment
  standard measure of, 582
  style
    individual differences in, 211
    influence of child-rearing variables on, 96
    poisonous pedagogy (PP), 99
Adult Attachment Interview, 393
Adult behaviors, 99
Adult Personality Functioning Assessment (APFA), 290, 294
Affection
  in circular models, 347
Affiliation
  control vs., 60
  conveyed in interpersonal communication, 362
  coronary heart disease and, 475, 476, 478
  cross-spectral analysis of, 137
  need for, nonverbal communication and, 172
  in SASB model, 333
  situational, bias in, 129
Affiliative behaviors, 97
  enduring traits as independent predictors of, 98
Affirm, in SASB model, 328, 338
Agency
  coronary heart disease risks and, 475
  in interpersonal diagnosis, 359
  in interpersonal goals, 108, 109
  interpersonal pathoplasticity and, 369
  interpersonal theory and, 38, 47
  intraindividual variability and, 371
  IPC inventories of, 314, 320
  metaconcept of, 60
  in models of personality, 79
  motives of, 109
  in person-situation integration, 373
  self-definition, 8
  summary and conclusions, 581
  vs. unmitigated/mitigated agency, 111
  values, 116
Agentic dimension of IPC, 58
Aggregated situational mutual influence, 128
Aggression, 4
  in children, 132, 286
  in DSM, 391
  identity need and, 260
  Machiavellianism and, 260
  object relations model and, 387
  partner
    children exposed to family violence, 235
    cross-dyad influences on, 237
    predicting, 238
    rejection and, 238
    relational variables, 237
    verbal, 235, 237, 239
  posttraumatic stress disorder and, 413
  Aggressive men, maritally, 152
  Agreeable-dominant on interpersonal grid, 67
  Agreeableness, 58, 64, 73, 79, 84, 92
    vs. antagonism, 92
    dependency associated with, 94
    global scales for, 92
    love as complementary behavior of, 92
    summary and conclusions, 582
  Agreeable-submissive on interpersonal grid, 67
  Agreement. See Achievement, 175
  Ainsworth, M. D. S., 17
  Ainsworth, Mary, 547
  Alliance. See Therapeutic alliance, research and
time, 509
  Alliance ruptures
    challenges for therapists, 521
    clinical significance of, 521
    conceptualization of, 520
    confrontation, 520
    defined, 519
    markers, 520
    occurrence rates, 521
    overview, 519
    resolving, 519, 523

    Attachment-Based Family Therapy (ABFT), 501
    Attachment behavioral system, 18, 210
    Attachment capacity, in Structure (Axis IV of
    OPD), 349
    Attachment figures, 18
Attachment insecurity  
- dyadic communication and, 19  
- interpersonal goals and, 21  
- interpersonal reactions and behaviors and, 19  
- interpersonal transgressions and offenses, 20  

Attachment patterns  
- of infants, 29  
- intergenerational transmission of, 30  
- longitudinal studies on, 30  
- mother-child interactions and, 29  
- of social information processing and, 25  
- of twins, 30  

Attachment research, 17–19, 21, 28, 29  

Attachment security, insecurity, 18  

Attachment security in caregivers, 214  

Attachment, Separation, and Loss (Bowlby trilogy), 6  

Attachment style  
- adult, 99  
- antecedents of individual differences in, 29  
- defined, 19  
- differences in interpersonal behavior, 19  
- individual differences in, 211  
- infants and children, 99  
- interpersonal relationships and, 98  
- organized, defined by interpersonal relatedness and self-definition, 38  

Attachment theories, 8, 17, 388. See also Social support in close relationships, 209  
- attachment-related cognitive-motivational predispositions, 21  
- attachment-related differences in processing of social information, 23  
- basic concepts in, 18  
- concluding remarks, 31  
- interpersonal motives and, 108  
- in interpersonal psychotherapy, 534  
- interpersonal relatedness in, 38  
- overview, 17  
- in TLDP, 546  

Attachment working models, 18  

Attack, in SASB model, 328, 333, 335  

Attentional focus, in SASB model, 333  

Attitude-behavior relation model, 202  

Audacious trust, 203  

Behavior(s)  
- accumulated, 97  
- adult, influence of child-rearing variables on, 96  
- affiliative, 97  
- complementary, 92, 94  
- coordinates needed to understand, 584  
- extreme, 366  
- nonverbal, 171–185  
- observer ratings of, in IPC inventories, 318  
- overt, leading to coronary heart disease, 478  
- paraverbal, 171  
- patterns of, in interpersonal behavior, 364, 366  
- patterns of, vs. traits, 96  
- positive involvement behavior, 182  
- social, becoming allergenic, 277  
- social support, IPC inventories of, 319  

Behavioral Disinhibition (BD), 496  

Behavioral genetic studies, 30  

Behavioral inhibition, 111, 495, 496  

Behavioral scales, 64  

Behavioral signatures, 10, 285, 372
