Note: Abbreviations used: CAT for cognitive analytic therapy; DBT for dialectical behaviour therapy; NHS for National Health Service; PD for personality disorder

academic education, adult learners 172–3
actuarial risk assessment 17–19
  versus structured clinical appraisal 20–2
addiction 157–8, 162
adult learning
  assessment phase 169–70
  case study 176–8
  cognitive development 169
  curriculum flexibility 171–2
  education to enhance therapeutic interventions 173
  effects of PD on individuals 168
  functional skills development 172
  general and academic education 172–3
  historical influences 167–8
  individual learning plans (ILPs) 175
  learning style preferences 170–1
  leisure and recreational activities 173–4
  personalized learning 175–6
  role of education 168–9
affiliation factor, social functioning 130
aftercare services, maintaining change 157–9
aggression
  childhood maltreatment leading to 24–5
  and personality disorder (PD) 15
  predicting using PD diagnosis 16
  risk assessment methods 16–22
    hypothetical case using sMSFA 24–6
    sMSFA, functional analysis tool 22–3
    theoretical models 23–4
  see also violence
  Aggressive Behaviour Control (ABC) programme 113
  alcohol abuse 141, 142, 143, 144, 158
  ‘alpha’ position individuals 131
  antisocial personality disorder (APD) 15, 16, 197
  and substance misuse 141, 143
  assessment
    in a high secure hospital setting 66–9
    adult learners 169–70
    of treatment readiness 42
  see also risk assessment for aggressive behaviour
  attachment styles 114, 116
    developing capacity for 136
    link to violence 119
    and reciprocal roles 83
    and sexual offenders 138
    and state-dependent activation of schemas 132
    states associated with 130
    availability heuristic 18
biases in appraisal and decision making 18
borderline personality disorder (BPD) 4, 15, 16, 40, 158, 197
CAT ‘self-states’ model of 85–6
efficacy of DBT 64–5
and schema therapy 100
boundary seesaw model 181–92
Buschman and Van Beek (2003) self-
regulation model 128–9

case formulations 45–6
case level 47, 57–9
causal modelling framework 48–9
different types of 53–4
fictional case study 56–7
generic models 46–7
medical 55
patient’s own pretreatment 54
problems to focus on 52–3
security 54–5
situational level 47–8
testing 50–1
validity and reliability of 49–50
who are they for? 51–2

causality
biological and cognitive 55
modelling framework, Morton 48–9
PD-violence link, Howard 198

change
ambivalence about 66, 158
of beliefs 135
generalizing to new settings 122, 156
maintaining 157–9
precursors to 2–3
processes 134–5
child modes 99, 108
childhood maltreatment, link to later
aggression 24–5
clinical appraisal methods 17, 19–20
cognitive analytic therapy (CAT) 81–3
case examples 86–8, 90–1
contextual reformulation of cases 88
evidence base 83–4
model of personality disorder 85–6
and the therapeutic alliance 88–90
cognitive deficits 41, 126
cognitive development 169
cognitive heuristics 17, 18
cognitive restructuring, DBT 74–5
community-based services 10–11
comorbidity, PD and substance abuse
141, 142, 144
criminal justice settings, developments in
5–6
curriculum flexibility, adult learning 171–2
dangerous and severe personality disorder
(DSPD)
conceptual problems 196–8
development of services for 7–10
future community-based services 10–11
particular characteristics of 40–1
risk factors 26–8
treatment engagement 33–43
detention issues 1, 2, 8, 27–8
dialectical behaviour therapy (DBT) 63–4
actual DBT treatment 70–1
cognitive restructuring 74–5
empirical basis of 64–6
individual sessions 71–4
patient concerns 78
patient perspectives 77–8
quality of life interfering behaviours
76–7
sequencing 75–6
treatment pathway 66
assessment and pretreatment (stage 1)
66–9
relapse prevention (stage 3) 77
trauma work (stage two) 77
treatment targets and diary cards 70
diary cards 70, 73
dilemmas, CAT 82
dimensional view of personality traits 154
dominance, state repertoires 130–2
‘drop-out’ offenders, characteristics of 6
drug abuse see substance misuse
dysfunctional coping modes 99, 109
education
curriculum flexibility 171–2
functional skills development 172
general and academic 172–3
role of 168–9
to enhance therapeutic interventions
173
emotional dysregulation, link to violence
112, 199
emotional regulation skills, DBT 67, 71,
74, 76, 113, 115
Extended Violence Reduction Programme
(EVRP) 114–16
case examples 116–21
key treatment issues 121–2
false negatives 18, 55
false positives 17, 27, 55
five-factor model of personality 154
formulations
clinical team 101–2
see also case formulations
functional analysis 22–6, 48
functional skills development 172
fundamental attribution error 18
future tasks 195
conceptual problems 196–8
evaluation 201–2
new treatment directions 198–200
treatment integration problems 200

General Aggression Model (GAM) 23–4
Good Lives Model-Comprehensive (GLM-C) 114, 116, 122, 159
group therapy 104–6, 133–4

HCR-20 (Historical, Clinical, Risk Management) 19–20, 22
iatrogenic factors 133, 159–61
identity issues 36–7, 40
individual learning plans (ILPs) 175
information-processing deficits, psychopaths 199
institutional climate, measurement of 41–3
integrated approaches, schema therapy 96–9
Integrated Theory of Sex Offending (ITSO) 46, 56
internalization process, CAT 82–3
interpersonal circumplex 132
interpersonal difficulties, CAT 82, 89–90
interpersonal effectiveness, DBT 76
interventions
education to enhance 173
with high risk offenders 127–9
for personality disorder 6–7
for sexual offenders 133–6
see also treatment

learning
case study 176–8
effective teaching approach 174–5
environment 174
individual learning plans (ILPs) 175
learning style preferences 170–1
personalized learning 175–6
legislative changes 1–2
leisure activities, adult learning 173–4
low readiness in DSPD population 37–9
definition of ‘low readiness’ 34–5
methods used to improve readiness 39–40
observed problems of 37–9
maladaptive parent modes 99, 109
medical models 55, 59
Mental Health Acts (1983 & 2007) 1, 3, 156
mentalization 82, 156
mindfulness skills 75, 76, 138–9, 199
Minority Report (Dick) 8
motivation issues, treatment 34–5, 39, 53
motivational interviewing 159, 161
motivational systems theory, Ford 159
Multifactor Offender Readiness Model (MORM) 35–7, 43
Multiple Sequential Functional Analysis (MSFA) 23

narcissistic personality disorder 102, 103, 185, 186
negotiator role 185–7
NHS-based secure PD services, development of 3–5

offence paralleling behaviour 98, 102–3, 135, 137–8
over-compensatory behaviour 97–8
over-compensatory modes 109
pacifier role 185–6, 188
personality, classification of 153–5
personality disorder (PD) 40–1
CAT model of 85–6
classification systems 153–5
generic models of 46–7
impact on individuals 168
and interpersonal relationships 114
linking to offending 52, 130–2
NHS-based services 3–5
and rape 127–8
secure services for 3
and substance misuse 141–3
treatability 156–7
treatment of 6–7, 95–6, 155
Index

Personality Disorder Directorate (PDD) 95
clinical team formulations 101–2
individual therapy case example 102–3
schema therapy in a group setting 104–6
personalized learning 175–6

predictions using PD diagnosis 16
working with DSPD patients 26–8
sadistic behaviour 128, 129, 137, 138
schema education, group therapy 104
schema healing, group therapy 105
schema therapy 95–6
in a group setting 104–6
empirical support for 100
as an integrated approach 96–9
PDD schema therapy programme 101–3
schema modes 99–100
schizoid personality, child sex offenders 129
security guard role 183–5
security judgements 54–5
self-formulations, group therapy 104
self-regulation deficits 186, 198, 199
self-regulation pathways model 128–9
self-state model, Ryle 82–3, 85–6
case example 86–8
support for 84
Sexual Offences Act (2003) 185
sexual offending 125–6
case study 136–8
key issues 138
interventions 133
changing beliefs 135
group and individual 133–4
iatrogenic responses 133
psychoeducation 134–5
solution-focused approach 136
working in the here and now 135
literature review 126–9
and psychopathy 129
social and state repertoires 130–2
snags, CAT 82
solution-focused approach 136
SOTEP (Sex Offender Treatment
Evaluation Project), US 10–11
SOTP (Sex Offender Treatment
Programme) 127
staff
boundary management 181–92
iatrogenic reactions 159–61
strengths-based strategies 135
structured clinical appraisal methods 17,
19–20
versus actuarial methods 20–2
structured Multiple Sequential Functional
Analysis (sMSFA) 22–6
submission, state repertoires 131–2
substance misuse 141
and comorbid PD 141, 142, 144
relevance to forensic PD services 142
teaching approach 174–5
theoretical considerations 142–3
treatment options 144
treatment programme 145–6
case example 147–9
engagement 147
philosophy, facilitation and delivery
146–7
teachers, ‘firm but fair’ approach 174–5
therapeutic alliance 88–91, 92, 135,
156–7, 160
therapeutic climate, monitoring 41–3
Transtheoretical Model of Change (TMC)
35, 158
traps, CAT 82
trauma
substance use and violence 143
trauma work, DBT 77
treatability, Mental Health Act 1–2,
156–7
treatment
engagement with 33–43, 147
evaluation of 201–2
new directions in 198–200
problem integrating components of 200
for substance misuse 144–7
targets 20, 70
see also readiness for treatment
Type II errors 18
unresponsiveness 34
violence
causation 24–5, 198
and PTSD 143
reducing urge towards 75
and substance misuse 143
see also aggression
Violence Reduction Programme (VRP)
111–13
extending for patients with severe PD
