Index

3D microelectronics, 341
axisymmetric drop shape analysis (ADSA), 51
alkylketene dimer (AKD), 134
aneurysm, 27

bead, 251
Berge-Lippmann-Young law (BLY), 293
blood vessel, 26
Bond number, 51, 84, 143, 210, 253
Bond number (electric), 83
Bond number (gravity), 83
bridge, 81
bubble, 18

canthotaxis, 115, 355
cantilever, 33
capillary assembly, 275, 286
capillary force, 38
capillary length, 21
capillary pumping (closed channel), 195
capillary rise, 40
capillary rise inside oblique tubes, 194
capillary rise along a vertical plate, 188
capillary rise between two parallel plates, 188
capillary rise in a dihedral, 190
capillary rise in an array of pillars, 192
capillary rise in cylindrical tubes, 183
capillary rise in square tubes, 185
capillary valve, 202
capillary valve efficiency, 203
Cassie-Baxter law, 125
catenary, 72
catenoid, 72
cell chips, 1
cellomics, 1
Clausius-Mossotti factor, 333
coarsening, 18
cohesive energy, 5
composite channel, 202
Concus-Finn relations, 152
Concus-Finn relations (extended), 154
convex droplet, 94
corner, 151
covered EWOD, 304
critical electric field, 300
Critical Micelle Concentration, CMC, 10
critical surface tension, 56
curvature radius, 13, 92
cylinder, 71

Darcy’s law, 199, 243, 244
de Gennes, 1
delay valve, 205
dielectrophoresis (DEP), 333
dielectric breakdown, 300
digital microfluidics, 1, 293
disjoining pressure, 58
dispense, 161
DNA combing, 286
double-bubble instability, 78
drop moving up a step, 110
drop moving uphill, 107
droplet, 251
droplet dispensing, 237, 317
droplet division (electrowetting), 311
droplet merging (electrowetting), 311
droplet motion, 105
droplet motion (electrowetting), 305
droplet on a sphere, 271
droplet pierced by a wire, 214
droplet pinching (electrowetting), 314
droplet self-motion, 143
droplet stretching (electrowetting), 312
droplet surface area, 83, 89
droplet surface area (flat droplet), 98
droplet velocity (electrowetting), 306
droplet volume, 83
droplet volume (flat droplet), 97
Eötvös's relation, 9
electric Bond number, 85
electric field, 293
electrodes (crenellated), 323
electrodes (spike-shaped), 327
electrodes (star-shaped), 323
electrowetting, 293
electrowetting force, 297
electrowetting hysteresis, 302
electrowetting saturation, 299
gulftment, 255, 258, 261
evaporation, 275
evaporation ring, 283
evaporation stain, 284
EWOD, 237, 293
EWOD chip architecture, 330
EWOD reservoir, 329
exterior corner, 70

Feynman, 1
fiber, 239
flat droplet, 92
floating spheres self-assembly, 270
flow-focusing device, 262
foliation, 75
force on a triple line, 45
Fowkes method, 55
fractal surface, 134
gelled alginate droplet, 269
genomics, 1
Gibbs energy, 217
GLAD, 134
gold nanospheres, 287
Good-Girifalco model, 55
Goucher number, 210
Gouger number, 210
gradient of wettability, 105

Haukbee, 24
Haukbee's law, 143
Haukbee's problem (reciprocal), 148
HCM, 209
hydrophilic strip, 81
hysteresis, 112

instability, 78
interface, 5, 251
intersecting fibers, 241

Jurin's law, 183
Laplace's law, 13, 15, 143
lift (of a chip), 348
line tension, 35
Lippmann-Young law, 293
lung alveoli, 27
magnetic beads, 334
magnetic force, 273
magnetic susceptibility, 273
Marangoni convection, 9
Maxwell tensor, 293
meniscus, 21
mercury, 269
micro beaker, 153
micro cusps, 47
micro methanol fuel cells, μMFC, 149
micro-holes, 47
micro-well, 161
minimal surface, 21
Moore law, 341
multiplexing, 331
Murray’s law, 26

nanobubble, 35
Neumann's construction, 34, 251, 252
nodary, 73
nodoid, 73

OET, 333
omniphobicity, 137
open EWOD, 304
open microfluidics, 209
optoelectronic tweezer, 333
paper-based microfluidics, 245
parallel plates, 20, 38, 68
parallel rails, 216
paramagnetic bead, 273
partial wetting, 30
particle effect on surface tension, 12
patterned surface, 123
pendant drop, 50
pillars, 120
pinning, 115, 355
pinning on an edge, 115
pipette, 44, 161, 183
Plateau-Rayleigh instability, 80
point of care (POC), 183
Index

porous membranes, 235
precursor film, 18
pressure, 75
principles of capillary pumping, 196
proteomics, 1
quantum dot, 262
restoring force, 344, 348
restoring torque, 346, 349
rigid sphere, 262
rod, 21
roll (of a chip), 349
roulette, 71
rouloids, 71, 75
round well, 77
rounded corners, 237
SCF in cracks, 228
SCF in diverging U-grooves, 232
SCF in trapezoidal channel, 224
SCF in U-grooves, 219
SCF over a hole, 233
SCF, universal law, 226
screen display, 336
self-assembly, 275, 342
self_motion, 24
sessile droplet volume, 87
shear stress in vascular network, 26
shift (of a chip), 344
silicon chip, 342
single phase microfluidics, 1
Slippery Liquid Infused Porous Surfaces (SLIPS), 137
sphere, 71, 251
spheres, 66, 68
spheres on a meniscus, 270
spherical cap, 68
spontaneous capillary flow (SCF), 216
spreading, 255, 352
spreading of glue, 221
square, 76
square micropillars, 130
square well, 78
stability, 65, 75, 81
stop valve, 204
strip, 81
superhydrophobicity, 133, 137
superoleophobicity, 137
surface defect, 115
surface minimization, 59
surface plasmon resonance, 262
surface tension, 5
surface tension measurement, 48
surface tension table, 5
surfactant, 10
surfactant concentration gradient, 110
suspended microfluidics, 235
symmetrization, 70
tapered planes, 143
temperature, 9
textured surface, 123
thread-based microfluidics, 246
tilt (of a chip), 349
total wetting, 30
triple line, 38
tunable lens, 336
twist (of a chip), 346
undulatory, 73
unduloid, 73
van der Waals force, 5
vertical plates, 43
virtual walls microfluidics, 209
wafer, 342
Washburn’s law, 197, 243
wedge, 69, 76, 143, 151
Wenzel’s law, 123
wetting, 352
wicking, 241
Wilhelmy method, 188
Wilhelmy plate, 49, 183
Wilhelmy’s plate, 48
work of adhesion, 36
work of cohesion, 36
X-shaped U-groove, 232
Young contact angle, 143
Young’s law, 31, 252
Young-Dupré equation, 36
Zisman plot, 56
