INDEX

A
Abington Memorial Hospital (Abington PA), 99–100
Aboriginals, 417–418
Absence of family, 193
ACA, See Patient Protection and Affordable Care Act (ACA)
Access to treatment, and health-care disparities, 4, 37
Accessible statuses, 301, 327
Accountability, 25, 154, 355; management, 128; in reducing disparities, 60; transforming experience framework (Grubb Institute), 153
Accreditation organizations, and health-care disparities, 58
Acculturation, 83, 114–115
Acknowledgement of privilege: defensive status, 319–320; dissonance status, 317–319; naïveté status, 315–317
Action, 121
Action Plan to Reduce Racial and Ethnic Health Disparities (Dept. of Health and Human Services), 46
Acupuncture, 117
Ad hoc interpreters/translators, 265, 280
Adapters, as nonverbal behaviors, 240
Administrators, 26, 151, 156; and disparities, 57; diversity management training, 181–182; as skilled intercultural communicators, 181
Advancing Effective Communication, Cultural Competence, and Patient- and Family-Centered Care: A Road Map for Hospitals (Joint Commission, The), 62, 270
Aetna: collection of racial/ethnicity/language preference data from members, 63; culturally competent disease management support, 370; members’ language preferences, identification of, 275; racial and ethnic equality dashboard, 63
Affect displays, as nonverbal communication, 240
Affinity groups, 355
African Americans, 37–38, 82; age-adjusted death rates, 42; and asthma, 42, 249; below poverty level, 86–87; children, and air pollution exposure, 249; and congestive heart failure (CHF), 43; death rates from heart disease, stroke, cancer, influenza, diabetes, pneumonia, and HIV 42; entering the workforce, 79; health-care coverage, 46; health of, 41; and hepatitis A, 44; and HIV, 43, 51; household median income, 86; infant mortality per 1000 births, 41–42; influenza, 44; life expectancy, 42; and Medicare/Medicaid, 46; metabolic syndrome, 43; prenatal care, 44; prostate cancer, 51; State Children’s Health Insurance Program (SCHIP), 46; substantive health problems in, 44; tuberculosis, 43
Agency for Health Care Research and Quality (AHRQ), 39, 41
Aging population: age-related disorders, 55; chronic health conditions in, 55; and health-care diversity, 13–15; health issues unique to, 55–56; life expectancy, 55; Medicare, 14
Air pollution exposure, 249
Alaska Natives, See American Indians/Alaska Natives (AI/AN)
Alzheimer’s disease (AD), 55–56
American Academy of Family Physicians (AAFP), 58; endorsement of cultural competence, 126
American Association of Medical Colleges (AAMC), 82
American College of Emergency Physicians, endorsement of cultural competence, 126
American College of Healthcare Executives (ACHE), 75, 90, 389; endorsement of cultural competence, 126
American College of Obstetrics and Gynecology (ACOG), endorsement of cultural competence, 126
American Community Survey (ACS), 12, 16
American Health Insurance Plans (AHIP), 273, 274, 292
American Hospital Association (AHA), 75, 90, 389; endorsement of cultural competence, 126; Health Research & Educational Trust (HRET), 417
American Indians/Alaska Natives (AI/AN), 37–38, 41, 82; age-adjusted death rates, 42; and asthma, 42; and diabetes, 42; disease, rates of, 42; health-care coverage, 46; health of, 41; and hepatitis A, 44; and HIV, 43; household median income, 86; immigrants, 78; infant mortality per 1000 births, 41–42; life expectancy, 42; median net worth of households, 86; population, 39; tuberculosis, 43
Assessment, and cultural competence training, 208–210; and systems approach, 387–389
Asthma, and African Americans, 42, 249
Attitude, 145
Ayurvedic medicine, 117

B
Baby boomers, 77; and health care, 14
Baha’i, 18
Behavior norms, agreement on, 346
Berber, 7
Best demonstrated practices, 363, 376–386; DiversityInc, 376
Betancourt, J., 205
Bias: cultural, 313; explicit, 147; group, 329; implicit, 144, 147–150, 158; individual, 313; institutional, 313; provider, and health-care disparities, 19
Bicultural interpreters, 284
Bicultural, use of term, 114–115
Bilingual medical professionals, 276–277
Bilingual staff, 276
Biological variations, 250–251
Black racial identity development, 305
Blacks/Black Americans, See African Americans
Body gesturing, 288
Breast cancer, 54, 64
Brigham and Women’s Hospital (BWH), 386
Anxiety, 302, 317–319
Asian Americans/Asians, 37–38, 82; age-adjusted death rates, 42; and asthma, 42; below poverty level, 87; children, and air pollution exposure, 249; Chinese culture, 112–113; and diabetes, 42; disease, rates of, 42; entering the workforce, 79; gaps between African-Americans and, 41–42; health-care coverage, 46; health of, 41; and hepatitis A, 44; and HIV, 43; household median income, 86; immigrants, 78; infant mortality per 1000 births, 41–42; life expectancy, 42; median net worth of households, 86; population, 39; tuberculosis, 43
Assessment, and cultural competence training, 208–210; and systems approach, 387–389
Asthma, and African Americans, 42, 249
Attitude, 145
Ayurvedic medicine, 117

B
Buddhism, 18
Building on the Promise of Diversity (Thomas), 337–338
Current Population Study (CPS), 81;
Burns, M. J., 99
Business case, 338, See also Best demonstrated practices; for cultural competence in health care, 364–373; disparities reduction and improved health outcome for minorities, 368–371; early pioneers, 375–376; evolution of, 363; growth of, 416–417; health care, 371–373; health service cost reductions/increases in service delivery, 367; landmark publications, 373–375; language access services (LAS), cost-benefit studies of, 368; and workforce, 373–376
Business expansion in minority markets, due to adoption of cultural competence strategies, 366
