Index

Page numbers in bold refer to tables; those in italic refer to figures

act sequences, in communication, 44, 47–8
adverse events
  historical aspects, 2–3
  incidence, 3–4, 3, 5
  preventable, 3, 4
algorithms, emergencies management, 88
anaesthesiology
  adverse events prevention, 4
  critical incidents, 58
  machine checklists, 89
anaphylaxis, 57, 59
assertiveness, 42
  leadership, 38–9
assessment
  decision-making processes, 52, 53
  situation awareness, 22–3
attention, 12
behaviour, 36, 40–1
  amenability to change, 37, 38
  formal feedback procedures, 40
  positive, reinforcement, 40
  practical aspects, 38–40
  relation to personality, 37–8, 39
  unacceptable, 39–40
bias in reasoning, 15
blame culture, 4
briefing, 72, 73–5
  checklists, 71–2, 88
  communication, 72, 73–5
  mental models construction, 24
  preceding surgery, 71–2
  team member situation awareness, 21, 24
Bromiley, Elaine, 5, 74
bullying, 39
cardiac arrest, 59
  checklists, 80, 85–9
  practical aspects, 88–9
Clinical Human Factors Group, 5
clinical scenarios, 91–5
Codman, 2
cognition, 10–18
  automatic, 12–15
  background concepts, 11–15
  conscious, 11, 14, 15
  errors, 10, 15, 16–18
  memory lapses, 16–17
  mistakes, 17
  slips in execution of intended actions, 16
  violation of standard operating procedures, 17–18
fatigue effects, 64
  long-term memory retrieval, 15

cognition (cont’d)
‘skill rules knowledge’
framework, 13–15, 13
communication, 7–8, 42, 71
authority gradient/hierarchy effects, 44, 45
competence see communicative competence (effective speaking)
decision-making process, 57, 59
during handover, 72–3
fatigue effects, 64
introverted personality types, 37
leadership, 29, 32
mental models sharing, 24
paralinguistic versus linguistic features, 46
situation awareness, 23, 24, 25
teamworking, 34, 38
see also briefing; debriefing
communication skills, 42
communicative competence (effective speaking), 43–6, 49–50
act sequence, 44, 47–8
definition, 49
emotional tone, 44–5, 48
errors and their solutions, 47–9
genre, 45–6, 49
goals, 44, 47
norms, 45, 48
participants, 44, 47
practical aspects, 46
setting/scene, 43, 47
style of speech, 45, 48
complacency, 57
confidentiality, 44
confirmation bias, 17
conflicts resolution
teamworking/team leadership, 33
unacceptable behaviour, 39–40
conformational bias, 24
conscious cognition, 11, 14, 15

bias in reasoning, 15
problem-solving errors, 17
trial and error processes, 17
creative decision making, 56–7
crisis resource management, 4
debriefing, 38, 75–6
communication, 75–6
phases, 76
analysis, 77
application, 77–8
description, 76–7
practical aspects, 76
decision aids, 55–6, 58
decision making, 51–60
assessment, 52
communication, 57, 59
components, 51–2
creative, 56–7
errors, 59
guidelines utilisation, 87
option appraisal/selection, 55–6
practical aspects, 55–9
planning and preparation, 59
problems, 57–8
recognition-primed, 52–3, 53
review of outcome, 57, 58, 59
rule-based, 54–5
emergency protocols
memorisation, 59
seeking expert advice, 58
situation awareness, 59
stress impact, 55, 65
time constraints, 58
diagnostic error, 10, 15, 57, 58, 59
distraction, and situation awareness, 25, 26
emergency department 4-hour targets, 86
emergency protocols memorisation, 59
error
clinical scenarios, 91–5
clinical (technical), 1, 2, 3
cognitive see cognition
communicative competence, 47–9
decision making, 59
diagnostic, 10, 15, 57, 58, 59
fatigue/stress-related, 61
human (non-technical), 2, 5
latent factors in systems, 7, 86
learning from adverse events, 4–5
post-completion, 26
preventable, 3, 4
reporting culture, 4, 5, 86
systematic in performance, 26
teamworking, 34
examination, clinical, 52
expectations, 24
experience
mental models construction, 24
recognition-primed decision making, 52, 54
experiential learning
debriefing, 75, 76
learning cycle, 76
expert performance, 11, 14
