Contents

Preface ................................................................................................................................. vii

Chapter 1: OO Testing Problems .................................................................................... 1
  Adequate Testing and Object-Oriented Programming .................................................. 5
    Dewayne E. Perry and Gail E. Kaiser
  Object-Oriented Programming—The Problems of Validation ....................................... 11
    M.D. Smith and D.J. Robson
  Maintenance Support for Object-Oriented Programs ................................................ 18
    Norman Wilde and Ross Huitt

Chapter 2: Specification and Verification ....................................................................... 25
  Design for Testability in Object-Oriented Systems ....................................................... 28
    Robert V. Binder
    Communications of the ACM, September 1994, pages 87–101
  Method Sequence Specification and Verification of Classes ......................................... 43
    Shekhar Kirani and W.T. Tsai

Chapter 3: Unit Testing and Integration Testing ........................................................... 55
  A Class Testing Technique Based on Data Bindings .................................................... 58
    Heechern Kim and Chisu Wu
  Automated Flow Graph-Based Testing of Object-Oriented Software Modules ............... 64
    Allen S. Parrish, Richard B. Borie, and David W. Cordes
  Object-Oriented Integration Testing ........................................................................ 79
    Paul C. Jorgensen and Carl Erickson
    Communications of the ACM, September 1994, pages 30–38

Chapter 4: Regression Testing ....................................................................................... 89
  Change Impact Identification in Object Oriented Software Maintenance .................... 91
    D. Kung, J. Gao, P. Hsia, F. Wen, Y. Toyoshima, and C. Chen
Chapter 5: Object State Testing

Object State Testing and Fault Analysis for Reliable Software Systems
D. Kung, Y. Lu, N. Venugopalan, P. Hsia, Y. Toyoshima, C. Chen, and J. Gao
Proceedings 7th International Symposium on Software Reliability Engineering, 1996

The State-Based Testing of Object-Oriented Programs
C.D. Turner and D.J. Robson

ClassBench: A Framework for Automated Class Testing
Daniel Hoffman and Paul Strooper
Software—Practice and Experience, May 1997, pages 573–597

Chapter 6: Test Methodology

Incremental Testing of Object-Oriented Class Structures
Mary Jean Harrold, John D. McGregor, and Kevin J. Fitzpatrick

Integrated Object-Oriented Testing and Development Processes
John D. McGregor and Timothy D. Korson
Communications of the ACM, September 1994, pages 59–77

Chapter 7: Test Tools

Developing an Object-Oriented Software Testing and Maintenance Environment
David Kung, Jerry Gao, Pei Hsia, Yasufumi Toyoshima, Cris Chen, Young-Si Kim and Young-Kee Song
Communications of the ACM, October 1995, pages 75–87

The ASTOOT Approach to Testing Object-Oriented Programs
Roong-Ko Doong and Phyllis G. Frankl
ACM Transactions on Software Engineering and Methodology, April 1994, pages 101–130

Automated Testing from Object Models
Robert M. Poston
Communications of the ACM, September 1994, pages 48–58
