CONTENTS

2 The Functional Approach 27
   2.1 Estimation and Conditions A, 27
   2.2 Consistency, 37
   2.3 Weak Continuity and Weak Convergence, 41
   2.4 Fréchet Differentiability, 44
   2.5 The Influence Function, 48
   2.6 Efficiency for Multivariate Parameters, 51
   2.7 Other Approaches, 52

3 More Results on Differentiability 59
   3.1 Further Results on Fréchet Differentiability, 59
   3.2 M-Estimators: Their Introduction, 59
       3.2.1 Non-Smooth Analysis and Conditions A’, 61
       3.2.2 Existence and Uniqueness for Solutions of Equations, 65
       3.2.3 Results for M-estimators with Non-Smooth Ψ, 67
   3.3 Regression M-Estimators, 70
   3.4 Stochastic Fréchet Expansions and Further Considerations, 73
   3.5 Locally Uniform Fréchet Expansion, 74
   3.6 Concluding Remarks, 76

4 Multiple Roots 79
   4.1 Introduction to Multiple Roots, 79
   4.2 Asymptotics for Multiple Roots, 80
   4.3 Consistency in the Face of Multiple Roots, 82
       4.3.1 Preliminaries, 83
       4.3.2 Asymptotic Properties of Roots and Tests, 92
       4.3.3 Application of Asymptotic Theory, 94
       4.3.4 Normal Mixtures and Conclusion, 97

5 Differentiability and Bias Reduction 99
   5.1 Differentiability, Bias Reduction, and Variance Estimation, 99
       5.1.1 The Jackknife Bias and Variance Estimation, 99
       5.1.2 Simple Location and Scale Bias Adjustments, 102
       5.1.3 The Bootstrap, 105
       5.1.4 The Choice to Jackknife or Bootstrap, 107
   5.2 Further Results on the Newton Algorithm, 108
CONTENTS

6 Minimum Distance Estimation and Mixture Estimation 113
   6.1 Minimum Distance Estimation and Revisiting Mixture Modeling, 113
   6.2 The L^2-Minimum Distance Estimator for Mixtures, 125
       6.2.1 The L^2-Estimator for Mixing Proportions, 126
       6.2.2 The L^2-Estimator for Switching Regressions, 130
       6.2.3 An Example Application of Switching Regressions, 133
   6.3 Other Minimum Distance Estimation Applications, 135
       6.3.1 Mixtures of Exponential Distributions, 136
       6.3.2 Gamma Distributions and Quality Assurance, 139

7 L-Estimates and Trimmed Likelihood Estimates 147
   7.1 A Preview of Estimation Using Order Statistics, 147
       7.1.1 The Functional Form of L-Estimators of Location, 150
   7.2 The Trimmed Likelihood Estimator, 152
       7.2.1 LTS and Breakdown Point, 154
       7.2.2 TLE Asymptotics for the Normal Distribution, 156
   7.3 Adaptive Trimmed Likelihood and Identification of Outliers, 160
   7.4 Adaptive Trimmed Likelihood in Regression, 163
   7.5 What to do if n is Large?, 169
       7.5.1 TLE Asymptotics for Location and Regression, 170

8 Trimmed Likelihood for Multivariate Data 175
   8.1 Identification of Multivariate Outliers, 175

9 Further Directions and Conclusion 181
   9.1 A Way Forward, 181

Appendix A Specific Proof of Theorem 2.1 187
Appendix B Specific Calculations in Examples 4.1 and 4.2 189
Appendix C Calculation of Moments in Example 4.2 193
