## Contents

Foreword by Harry Markowitz xi
Preface xiii

### SECTION ONE

### Basics of Asset Allocation

#### CHAPTER 1

**What Is an Asset Class?** 3  
Stable Aggregation 3  
Investable 4  
Internally Homogeneous 4  
Externally Heterogeneous 5  
Expected Utility 5  
Selection Skill 6  
Cost-Effective Access 6  
Potential Asset Classes 7  
References 8  
Notes 8

#### CHAPTER 2

**Fundamentals of Asset Allocation** 9  
The Foundation: Portfolio Theory 9  
Practical Implementation 12  
References 23  
Notes 23
SECTION TWO

Fallacies of Asset Allocation

CHAPTER 3
The Importance of Asset Allocation
Fallacy: Asset Allocation Determines More Than 90 Percent of Performance 27
The Determinants of Portfolio Performance 27
The Behavioral Bias of Positive Economics 30
The Samuelson Dictum 34
References 34
Notes 35

CHAPTER 4
Time Diversification
Fallacy: Time Diversifies Risk 36
Samuelson's Bet 36
Time, Volatility, and Probability of Loss 36
Time and Expected Utility 37
Within-Horizon Risk 40
A Preference-Free Contradiction to Time Diversification 41
The Bottom Line 41
References 42
Notes 42

CHAPTER 5
Error Maximization
Fallacy: Optimized Portfolios Are Hypersensitive to Input Errors 43
The Intuitive Argument 43
The Empirical Argument 44
The Analytical Argument 48
The Bottom Line 52
References 53
Notes 53

CHAPTER 6
Factors
Fallacy: Factors Offer Superior Diversification and Noise Reduction 54
What Is a Factor? 54
Contents

Equivalence of Asset Class and Factor Diversification 55
Noise Reduction 57
Where Does This Leave Us? 59
References 59
Notes 59

CHAPTER 7

1/N 60

Fallacy: Equally Weighted Portfolios Are Superior to Optimized Portfolios 60
The Case for 1/N 60
Setting the Record Straight 61
Empirical Evidence in Defense of Optimization 61
Practical Problems with 1/N 62
Broken Clock 63
The Bottom Line 64
References 64
Note 64

SECTION THREE

Challenges to Asset Allocation

CHAPTER 8

Necessary Conditions for Mean-Variance Analysis 67
The Challenge 67
Departures from Elliptical Distributions 68
Departures from Quadratic Utility 71
Full-Scale Optimization 73
The Curse of Dimensionality 75
Applying Full-Scale Optimization 77
Summary 78
References 79
Notes 79

CHAPTER 9

Constraints 80
The Challenge 80
Wrong and Alone 80
Mean-Variance-Tracking Error Optimization 81
References 85
Note 85
# CONTENTS

## CHAPTER 10

**Currency Risk**

<table>
<thead>
<tr>
<th>Section</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Challenge</td>
<td>86</td>
</tr>
<tr>
<td>Why Hedge?</td>
<td>86</td>
</tr>
<tr>
<td>Why Not Hedge Everything?</td>
<td>87</td>
</tr>
<tr>
<td>Linear Hedging Strategies</td>
<td>90</td>
</tr>
<tr>
<td>Nonlinear Hedging Strategies</td>
<td>96</td>
</tr>
<tr>
<td>Economic Intuition</td>
<td>100</td>
</tr>
<tr>
<td>References</td>
<td>101</td>
</tr>
<tr>
<td>Notes</td>
<td>102</td>
</tr>
</tbody>
</table>

## CHAPTER 11

**Illiquidity**

<table>
<thead>
<tr>
<th>Section</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Challenge</td>
<td>103</td>
</tr>
<tr>
<td>Shadow Assets and Liabilities</td>
<td>103</td>
</tr>
<tr>
<td>Expected Return and Risk of Shadow Allocations</td>
<td>105</td>
</tr>
<tr>
<td>Other Considerations</td>
<td>107</td>
</tr>
<tr>
<td>Case Study</td>
<td>108</td>
</tr>
<tr>
<td>The Bottom Line</td>
<td>118</td>
</tr>
<tr>
<td>Appendix</td>
<td>119</td>

<td>References</td>
<td>120</td>
</tr>
<tr>
<td>Notes</td>
<td>120</td>
</tr>
</tbody>
</table>

## CHAPTER 12

**Risk in the Real World**

<table>
<thead>
<tr>
<th>Section</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Challenge</td>
<td>121</td>
</tr>
<tr>
<td>End-of-Horizon Exposure to Loss</td>
<td>121</td>
</tr>
<tr>
<td>Within-Horizon Exposure to Loss</td>
<td>123</td>
</tr>
<tr>
<td>Regimes</td>
<td>124</td>
</tr>
<tr>
<td>The Bottom Line</td>
<td>127</td>
</tr>
<tr>
<td>References</td>
<td>127</td>
</tr>
<tr>
<td>Notes</td>
<td>127</td>
</tr>
</tbody>

## CHAPTER 13

**Estimation Error**

<table>
<thead>
<tr>
<th>Section</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Challenge</td>
<td>128</td>
</tr>
<tr>
<td>Traditional Approaches to Estimation Error</td>
<td>129</td>
</tr>
<tr>
<td>Stability-Adjusted Optimization</td>
<td>131</td>
</tr>
<tr>
<td>Building a Stability-Adjusted Return Distribution</td>
<td>140</td>
</tr>
<tr>
<td>Determining the Optimal Allocation</td>
<td>142</td>
</tr>
</tbody>
</table>
CHAPTER 18
Statistical and Theoretical Concepts

Discrete and Continuous Returns 192
Arithmetic and Geometric Average Returns 193
Standard Deviation 194
Correlation 195
Covariance 196
Covariance Invertibility 196
Maximum Likelihood Estimation 198
Mapping High-Frequency Statistics onto Low-Frequency Statistics 198
Portfolios 199
Probability Distributions 200
The Central Limit Theorem 201
The Normal Distribution 201
Higher Moments 201
The Lognormal Distribution 202
Elliptical Distributions 202
Probability of Loss 203
Value at Risk 203
Utility Theory 204
Sample Utility Functions 204
Alternative Utility Functions 204
Expected Utility 206
Certainty Equivalents 206
Mean-Variance Analysis for More Than Two Assets 207
Equivalence of Mean-Variance Analysis and Expected Utility Maximization 208
Monte Carlo Simulation 208
Bootstrap Simulation 209
References 210
Note 210

CHAPTER 19
Glossary of Terms 211
