<tr>
<td>Preface</td>
<td>xv</td>
</tr>
<tr>
<td>List of Contributors</td>
<td>xvii</td>
</tr>
<tr>
<td><strong>1 Bio-Based Plastics – Introduction</strong></td>
<td>1</td>
</tr>
<tr>
<td><em>Stephan Kabasci</em></td>
<td></td>
</tr>
<tr>
<td>1.1 Definition of Bio-Based Plastics</td>
<td>2</td>
</tr>
<tr>
<td>1.2 A Brief History of Bio-Based Plastics</td>
<td>3</td>
</tr>
<tr>
<td>1.3 Market for Bio-Based Plastics</td>
<td>5</td>
</tr>
<tr>
<td>1.4 Scope of the Book</td>
<td>6</td>
</tr>
<tr>
<td><strong>2 Starch</strong></td>
<td>9</td>
</tr>
<tr>
<td><em>Catia Bastioli, Paolo Magistrali, and Sebastià Gestí Garcia</em></td>
<td></td>
</tr>
<tr>
<td>2.1 Introduction</td>
<td>9</td>
</tr>
<tr>
<td>2.2 Starch</td>
<td>10</td>
</tr>
<tr>
<td>2.3 Starch-Filled Plastics</td>
<td>13</td>
</tr>
<tr>
<td>2.4 Structural Starch Modifications</td>
<td>14</td>
</tr>
<tr>
<td>2.4.1 Starch Gelatinization and Retrogradation</td>
<td>14</td>
</tr>
<tr>
<td>2.4.2 Starch Jet-Cooking</td>
<td>16</td>
</tr>
<tr>
<td>2.4.3 Starch Extrusion Cooking</td>
<td>16</td>
</tr>
<tr>
<td>2.4.4 Starch Destructurization in Absence of Synthetic Polymers</td>
<td>17</td>
</tr>
<tr>
<td>2.4.5 Starch Destructurization in Presence of Synthetic Polymers</td>
<td>19</td>
</tr>
<tr>
<td>2.4.6 Additional Information on Starch Complexation</td>
<td>23</td>
</tr>
<tr>
<td>2.5 Starch-Based Materials on the Market</td>
<td>27</td>
</tr>
<tr>
<td>2.6 Conclusions</td>
<td>28</td>
</tr>
<tr>
<td>References</td>
<td>28</td>

Contents

3.3 Structure 37
  3.3.1 Cellulose 37
  3.3.2 Cellulose Derivatives 40
3.4 Principles of Cellulose Technology 42
  3.4.1 Regenerated Cellulose 43
  3.4.2 Organic Cellulose Esters – Cellulose Acetate 46
3.5 Properties and Applications of Cellulose-Based Plastics 52
  3.5.1 Fibres 53
  3.5.2 Films 54
  3.5.3 Moulded Articles 56
3.6 Some Recent Developments 57
  3.6.1 Cellulose 57
  3.6.2 Cellulose Acetate and Mixed Esters 58
3.7 Conclusion 59

References 59

4 Materials Based on Chitin and Chitosan 63
  Marguerite Rinaudo
4.1 Introduction 63
4.2 Preparation and Characterization of Chitin and Chitosan 64
  4.2.1 Chitin: Characteristics and Characterization 64
  4.2.2 Chitosan: Preparation and Characterization 66
4.3 Processing of Chitin to Materials and Applications 69
  4.3.1 Processing of Chitin and Physical Properties of Materials 69
  4.3.2 Applications of Chitin-Based Materials 70
4.4 Chitosan Processing to Materials and Applications 71
  4.4.1 Processing of Chitosan 71
  4.4.2 Application of Chitosan-Based Materials 74
4.5 Conclusion 77

5 Lignin Matrix Composites from Natural Resources – ARBOFORM® 89
  Helmut Nägеле, Jürgen Pfitzer, Lars Ziegler, Emilia Regina Inone-Kauffmann,
  Wilhelm Eckl, and Norbert Eisenreich
5.1 Introduction 89
5.2 Approaches for Plastics Completely Made from Natural Resources 90
5.3 Formulation of Lignin Matrix Composites (ARBOFORM) 92
  5.3.1 Lignin 92
  5.3.2 Basic Formulations and Processing of ARBOFORM 95
  5.3.3 The Influence of the Fibre Content 97
5.4 Chemical Free Lignin from High Pressure Thermo-Hydrolysis (Aquasolv) 100
  5.4.1 Near Infrared Spectroscopy of Lignin Types 100
  5.4.2 Lignin Extraction by High-Pressure Hydrothermolysis (HPH) 101
  5.4.3 Thermoplastic Processing of Aquasolv Lignin 104
5.5 Functionalizing Lignin Matrix Composites 105
  5.5.1 Impact Strength 106
7 Polyhydroxyalkanoates: Basics, Production and Applications of Microbial Biopolymesters

Martin Koller, Anna Salerno, and Gerhart Braunegg

7.1 Microbial PHA Production, Metabolism, and Structure

7.1.1 Occurrence of PHAs

7.1.2 In Vivo Characteristics and Biological Role of PHAs

7.1.3 Structure and Composition of PHAs

7.1.4 Metabolic Aspects

7.2 Available Raw Materials for PHA Production

7.3 Recovery of PHA from Biomass

7.3.1 General Aspects of PHA Recovery

7.3.2 Direct Extraction of PHA from Biomass

7.3.3 Digestion of the non-PHA Cellular Material

7.3.4 Disruption of Cells of Osmophilic Microbes in Hypotonic Medium

7.4 Different Types of PHA

7.4.1 Short Chain Length vs. Medium Chain Length PHAs

7.4.2 Enzymatic Background: PHA Synthases

7.5 Global PHA Production

7.6 Applications of PHAs

7.6.1 General

7.6.2 Packaging and Commodity Items

7.6.3 Medical Applications

7.6.4 Application of the Monomeric Building Blocks

7.6.5 Smart Materials

7.6.6 Controlled Release of Active Agents

7.7 Economic Challenges in the Production of PHAs and Attempts to Overcome Them

7.7.1 PHA Production as a Holistic Process

7.7.2 Substrates as Economic Factor

7.7.3 Downstream Processing

7.7.4 Process Design

7.7.5 Contemporary Attempts to Enhance PHA Production in Terms of Economics and Product Quality

7.8 Process Design

7.9 Conclusion

8 Poly(Lactic Acid)

Hideto Tsuji

8.1 Introduction

8.2 Historical Outline

8.3 Synthesis of Monomer

8.4 Synthesis of Poly(Lactic Acid)

8.4.1 Homopolymers

8.4.2 Linear Copolymers

8.5 Processing
8.6 Crystallization 178
  8.6.1 Crystal Structures 178
  8.6.2 Crystalline Morphology 181
  8.6.3 Crystallization Behaviour 182
8.7 Physical Properties 182
  8.7.1 Mechanical Properties 182
  8.7.2 Thermal Properties 186
  8.7.3 Permeability 188
  8.7.4 Surface Properties 188
  8.7.5 Electrical Properties 189
  8.7.6 Optical Properties 189
8.8 Hydrolytic Degradation 191
  8.8.1 Degradation Mechanism 192
  8.8.2 Effects of Surrounding Media 195
  8.8.3 Effects of Material Parameters 196
8.9 Thermal Degradation 200
8.10 Biodegradation 204
8.11 Photodegradation 205
8.12 High-Performance Poly(Lactic Acid)-Based Materials 207
  8.12.1 Nucleating or Crystallization-Accelerating Fillers 207
  8.12.2 Composites and Nanocomposites 208
  8.12.3 Fibre-Reinforced Plastics (FRPs) 211
  8.12.4 Stereocomplexation 212
8.13 Applications 213
  8.13.1 Alternatives to Petro-Based Polymers 213
  8.13.2 Biomedical 214
  8.13.3 Environmental Applications 216
8.14 Recycling 217
8.15 Conclusions 219

9 Other Polyesters from Biomass Derived Monomers 241
Daan S. van Es, Frits van der Klis, Rutger J. I. Knoop, Karin Molenveld,
Lolke Sijtsma, and Jacco van Haveren
9.1 Introduction 241
9.2 Isohexide Polyesters 242
  9.2.1 Introduction 242
  9.2.2 Semi-Aromatic Homo-Polyesters 244
  9.2.3 Semi-Aromatic Co-Polyesters 247
  9.2.4 Aliphatic Polyesters 248
  9.2.5 Modified Isohexides 250
9.3 Furan-Based Polyesters 251
  9.3.1 Introduction 251
  9.3.2 2,5-Dihydroxymethylfuran (DHMF)-Based Polyesters 253
  9.3.3 5-Hydroxymethylfuroic Acid (HMFA) Based Polyesters 254
  9.3.4 Furan-2,5-Dicarboxylic Acid (FDCA) Based Polyesters 254
  9.3.5 Future Outlook 256
9.4 Poly(Butylene Succinate) (PBS) and Its Copolymers
  9.4.1 Succinic Acid
  9.4.2 1,4-Butanediol (BDO)
  9.4.3 Poly(Butylene Succinate) (PBS)
  9.4.4 PBS Copolymers
  9.4.5 PBS Biodegradability
  9.4.6 PBS Processability
  9.4.7 PBS Blends
  9.4.8 PBS Markets and Applications
  9.4.9 Future Outlook
9.5 Bio-Based Terephthalates
  9.5.1 Introduction
  9.5.2 Bio-Based Diols: Ethylene Glycol, 1,3-Propanediol, 1,4-Butanediol
  9.5.3 Bio-Based Xylenes, Isophthalic and Terephthalic Acid
9.6 Conclusions

10 Polyamides from Biomass Derived Monomers
  Benjamin Brehmer
  10.1 Introduction
    10.1.1 What are Polyamides?
    10.1.2 What is the Polymer Pyramid?
    10.1.3 Where do Polyamides from Biomass Derived Monomers Fit?
  10.2 Technical Performance of Polyamides
    10.2.1 How to Differentiate Performance
    10.2.2 Overview of Current Applications
    10.2.3 Typical Association of Biopolymers
  10.3 Chemical Synthesis
    10.3.1 Castor Bean to Intermediates
    10.3.2 Undecenoic Acid Route
    10.3.3 Sebacic Acid Route
    10.3.4 Decamethylene Diamine Route
  10.4 Monomer Feedstock Supply Chain
    10.4.1 Description of Supply Chain
    10.4.2 Pricing Situation
  10.5 Producers
  10.6 Sustainability Aspects
    10.6.1 Biosourcing
    10.6.2 Lifecycle Assessments
    10.6.3 Labelling and Certification
  10.7 Improvement and Outlook

11 Polyolefin-Based Plastics from Biomass-Derived Monomers
  R.J. Koopmans
  11.1 Introduction
### Contents

11.2 Polyolefin-Based Plastics 296
11.3 Biomass 299
11.4 Chemicals from Biomass 300
11.5 Chemicals from Biotechnology 302
11.6 Plastics from Biomass 303
11.7 Polyolefin Plastics from Biomass and Petrochemical Technology 303
  11.7.1 One-Carbon Building Blocks 304
  11.7.2 Two-Carbon Building Blocks 305
  11.7.3 Three-Carbon Building Blocks 305
11.8 Polyolefin Plastics from Biomass and Biotechnology 305
11.9 Bio-Polyethylene and Bio-Polypropylene 306
11.10 Perspective and Outlook 307
