Preface vii

Numerical simulation of the syn- to post-depositional history of a prograding carbonate platform: the Rosengarten, Middle Triassic, Dolomites, Italy
Axel Emmerich, Robert Tscherney, Thilo Bechstädt, Carsten Bäker, Ullrich A. Glassmacher, Ralf Littke and Rainer Zühlke 1

Fine-scale forward modelling of a Devonian patch reef, Canning Basin, Western Australia
Claude-Alain Hasler, Erwin W. Adams, Rachel A. Wood and Tony Dickson 37

Structural, reverse-basin and forward stratigraphic modelling of the Southern Cantabrian Basin, northwest Spain
Zbynek Veselovský, Thilo Bechstädt and Rainer Zühlke 65

Numerical modelling of alluvial deposits: recent developments
John Bridge 97

Process-based stochastic modelling: meandering channelized reservoirs
Simon Lopez, Isabelle Cojan, Jacques Rivoirard and Alain Galli 139

Simulation of tidal flow and circulation patterns in the Early Miocene (Upper Marine Molasse) of the Alpine foreland basin
Ulrich Bieg, Michael Peter Süss and Joachim Kühlemann 145

Predicting discharge and sediment flux of the Po River, Italy since the Last Glacial Maximum
Albert J. Kettner and James P.M. Syvitski 171

Impact of discharge, sediment flux and sea-level change on stratigraphic architecture of river–delta–shelf systems
George Postma and Aart Peter van den Berg van Saparoea 191

Xander D. Meijer 207

Modelling the preservation of sedimentary deposits on passive continental margins during glacial–interglacial cycles
Xander D. Meijer, George Postma, Peter A. Burrough and Poppe L. de Boer 223

Modelling source-rock distribution and quality variations: the organic facies modelling approach
Ute Mann and Janine Zweigel 239

Spatial data templates: combining simple models of physical processes with stochastic noise to yield stable, archetypal landforms
Peter A. Burrough 275

Models that talk back
John C. Tipper 287

Index 307
