INDEX

age, effect on brain 8–9, 66–67
AGES model of learning 118–121
alcohol, and sleep 49
Alzheimer’s disease, and sleep 43
amygdala 115–116, 125, 149
anterior cingulate cortex
—functions 7, 75, 148
—and obesity 7–8
anxiety see depression and anxiety
attention 73–90 see also attention spans; attention networks; focus
—ability to pay 73–74
—effects of technology on 84–85
—strategies for paying 87–90
—at work 74–75, 80–83, 87–90
Attention Deficit Disorder (ADD) 81
Attention Deficit Trait (ADT) 81–83
attention networks 74–75
attention spans 76–77
—active listening 80–82
attitude 91–103 see also growth mindset
—open-mindedness 95–97
—self-belief 97–100
—success 92–94
—work, effect on 91–92,
basal ganglia, role of 149–150
brain derived neurotrophic factor (BDNF) 26
brainstorming, drawbacks 174–176
brain training 57–70
—through curiosity 59–63, 70
—neuroplasticity 57–59
—online programs 63–65
brain wave activity 164–165
caffeine, effects on brain performance 11–13
change
—adopting a culture of 157
—basal ganglia, role of 149–150
—of habits 150–151
—implementation of 154–157
—and limbic system 148–149
—obstacles to 152–154
—as threat 146–147
cognitive decline 8–9, 57, 66–67
Cognitive peak 57
collaboration 179–198
  — being accepted 187–188
  — creating a culture of 189–192
  — groupthink 195–197
  — making connections 180–186
  — physical contact 188–189
  — team intelligence 192–197
  — team performance, enhancing 197–198

collective intelligence see team intelligence

curiosity
  — cultivating in the workplace 171–174
  — dopamine release 59–60
  — importance of 59–63, 70
  — role in creativity 176–177

creativity 159–164, 169–171
  see also innovation
  — cultivating in the workplace 171–174, 177
  — and exercise 174
  — through curiosity 176–177
  — through mindfulness 124, 129
  — thinking outside the box 169–171

decision-making 4, 7, 10, 31, 43, 96, 106, 119–120, 124 208, 212–213

depression and anxiety
  — exercise 33–34
  — nutrition 5–6
  — sleep deprivation 50

diets 15–16
  — Mediterranean diet, the 4, 6, 16
  — and mindfulness 124

distraction, managing 82 see also focus

disruption, managing 82

emotion, at work 106–109

energy 4 see also nutrition

energy conservation, by brain 149–150

essential fatty acids see omega-3

exercise 21–38
  — aerobic activity, benefits 27–28
  — for anxiety and depression reduction 33–34
  — best time of day for 26–27
  — best type of 27–28
  — boosting levels of 36–38
  — brain derived neurotrophic factor (BDNF) 26
  — businesses, effects for 22–24, 25
  — for creativity 174
  — increased blood flow to brain 22, 24–25
  — motivation for 27–29, 37
  — neuroplasticity through 21–22
  — sitting versus standing at work 29–32
  — for stress reduction 35
  — walking meetings 33, 36
  — at work 32–33, 36–38

exercising the brain see brain training

fats, importance for the brain 5–7
  — omega-3 5, 6
  — trans 5–6

fight or flight response 108–109

focus 59, 73–90
  — active listening 80–82
  — attention 73–76
  — Attention Deficit Trait (ADT) 81–83
  — boosting with food 8–9
  — effects of technology 84–85
  — fragility of 76–77
Index

— multitasking vs monotasking 85–90
— strategies to 87–90
— time-chunking 77–80
— ultradian rhythm 77–78
— at work 74–75, 80–83, 87–90

food choices 3–5, 14
— for cognitive ability 4
— for memory 4
— and Mediterranean diet 4, 6, 16
— social factors 4

frontal lobes
— function 7
— and obesity 7–8

fuelling the brain 3–4, 9–10

groupthink 195–197

growth mindset 91–92
— cultivating for the individual 100–102
— cultivating in an organisation 102–103

habit-change 150–151

Hebb’s rule 59

hippocampus
— and memory 7
— and mindfulness 125, 130
— and obesity 7–8
— sugar, effects of 11

hydration 4

hypothalamus, effects of sleep deprivation 47

innovation 159–177
— and brain hemispheres 160–162
— through curiosity 176–177
— insight 164–168
— problem-solving 166–168
— thinking outside the box 169–171

— workplace, cultivating in 171–174, 177
— workplace, importance for 159–160

insight 164–168
— problem-solving 166–168
— right vs left brain dominance 167

leadership 199–214
— and neuroscience 200–201, 208
— strategies for 202–203
— TRAICE™ model 209–214

learning 4, 48, 64
— AGES model 118–121
— best environmental state for 117–118
— importance for survival 114–117
— and mindfulness 129
— and neuroplasticity 63–65
— promoting a culture of 121
— the reticular activating system 75, 115–116

meditation 128–141

Mediterranean diet, the 4, 6, 16

memory 64, 69
— caffeine 4, 11
— food choices 4
— hippocampus 6
— mindfulness 126
— sleep 48
— training of 64, 69
— trans fats 5

mental stretching see brain training

mindfulness 123–141
— benefits of 124–125, 132–137
— for leadership 139–141
— meditation 128–141
— and neuroplasticity 130–132
— practice of 137–139
mindset see attitude
monotasking 85–90
multitasking 85–87
napping at work 51–53
Neoteny 60
neuroplasticity see also brain training 57, 57–59, 63–65
— in business 58–59
— through curiosity 59–63, 70
— through exercise 21–22
nutrition 3–19 see also obesity
— as brain fuel 3–4, 9–10
— brain energy, effects on 4
— caffeine 11–13
— mood, effects on 5
— fasting 10
— focus 8–9
— good fats and bad fats 5
— glucose 11
— hydration 4
— Mediterranean diet, the 4, 6, 16
— omega-3 5
— sugar 11
— trans fats 5
— willpower 10–11
— in workplace 13–15, 17–19
obesity, shrinking the brain 7–8
— effects on cognition 8
omega-3
— for lowering depression 6
— for optimal brain functioning 5
open-mindedness 95–97
oxytocin 110, 188–190
Parkinson’s disease and sleep 43
plastic brain see neuroplasticity positive thinking 100–102
prefrontal cortex (PFC)
— curiosity 59–60
— functions of 75, 147–149
— mindfulness 124–126
— sleep deprivation 50
problem-solving 166–168
shift-workers 47–48
sitting at work, negative effects of 29–32
social connections
— and acceptance, importance of 187–188
— importance of making 180–186
— and physical contact 188–189
sleep see also sleep deprivation
— alcohol, effects of 49
— amount needed 41–41, 42
— importance for brain 39–55
— memory, impact on 48
— mindfulness 124, 129
— napping 51–53
— promoting 54–55
— REM 42, 49
— sleep cycles 40–42
— for waste removal in the brain 42–43
sleep deprivation
— avoiding in the workplace 55
— cognition, effects on 43–46
— economic impact of 45
— memory, effects on 48
— mood, effects on 50
— in shift-workers 47–48
— technology, caused by 51
— work, effects on 46–48
— working excessive hours 45–46
stress 105–121
— alleviating 112–114
— benefits of asking for assistance 110–111
Index

— effect on health (belief) 108–109
— fight or flight response 108–109
— learning 114–121
— managing of 111–112
— mindfulness 124, 129
— at work 105–111
sugar, effects on brain 11

team intelligence 192–197

team work see collaboration

TRAICE™ model of leadership 209–214
— autonomy 211
— clarity 212–213
— empathy 213–214
— impartiality 211–212
— respect 210
— trust 209
