INDEX

Note to the reader: Throughout this index boldfaced page numbers indicate primary discussions of a topic. Italicized page numbers indicate illustrations.

Symbols
& (invoke operator), 70
! (-not) logical operator, 45
#> (hash mark), for comment, 74
$ (dollar sign), for variables, 21
$: (at symbol), for arrays, 28
[ ] (square brackets), for type literal, 24
' (escape character), 23
| (pipe operator), 31

Abbreviations.
Account parameter, for New-SPServiceApplicationPool cmdlet, 218
AcknowledgementTimeout parameter, for Set-SPEnterpriseSearchService cmdlet, 499
ActivateSolutions parameter, for Import-SPweb cmdlet, 613, 614
Active Directory, 164–169
ActiveSessionTimeout parameter, for Set-SPInfoPathFormsService cmdlet, 174
AdditionalClaimProvider parameter
for New-SPWebApplication cmdlet, 222
for New-SPWebApplicationExtension cmdlet, 223
Add-ADGroupMember cmdlet, 426, 542
Add(EQ) method, of SPGroupCollection object, 291
Add-PsSnapin cmdlet, 9
Add-PsSnapin Microsoft.SharePoint.PowerShell command, 9–10
Add-Role cmdlet, 31, 122
Add-RoleAssignment cmdlet, 31, 122
Add-Solution cmdlet, 346–347
Add-SPUserSolution cmdlet, 359
Add-SPUserSolution cmdlet
Add-FailoverServiceInstance method, 525
Access Services, 412, 448–455
Active Directory, 164–169
adding security group in, 169
connecting SharePoint to, 203
container for tracking installations, 128
creating user, 165–166
data synchronization with, 536
deleting users, 169
reading user information, 166–167
scopes, 167
updatings users in, 167–169
Active parameter
for Get-SPEnterpriseSearch CrawlTopology cmdlet, 493
for Get-SPEnterpriseSearchQueryTopology cmdlet, 493
for Set-SPEnterpriseSearchQueryTopology cmdlet, 517
ActiveSessionTimeout parameter, for Set-SPInfoPathFormsService cmdlet, 174
Activity Feed Timer Job, 545
additional type system, 24–28
AddFailoverServiceInstance method, 525
Add-SPUserSolution cmdlet, 359
Add-SPUserSolution cmdlet
Add-SPUserSolution cmdlet
Add-SPUserSolution cmdlet
Add-SPUserSolution cmdlet
Add-SPUserSolution cmdlet
Add-SPUserSolution cmdlet
Administration Component, 483
  moving to another server, 506
provisioning, 504–506
Administration Database, 483
administration jobs, starting, 354–355
AdministrationContentDatabaseName parameter, for New-SPConfigurationDatabase cmdlet, 129
AdministrationSiteType parameter
  for New-SPSite cmdlet, 261, 702–703
  for Set-SPSite cmdlet, 268
administrator-approved form templates, 181–184
AdministratorAccount parameter, for New-SPMetadataServiceApplication cmdlet, 530
administrators
  checking users as, 111–112
  for Service Applications
    retrieving, 389–390
    setting, 391–393
ADO.NET Data Services Update for .NET Framework, 115
alerts on server, 235
Alias parameter, of Export-ModuleMember cmdlet, 86
aliases
  for cmdlets, 20
  for SQL Server, 552–553
AllExistingFeatures parameter, for Install-SPFeature cmdlet, 132, 340
AllInstances parameter, for Add-SPDiagnosticsPerformanceCounter cmdlet, 622
AllowAnonymous parameter, for New-SPAuthenticationProvider cmdlet, 316
AllowAnonymous property, of SPWindowsAuthenticationProvider class, 320
AllowAnonymous parameter, for New-SPAuthenticationProvider cmdlet, 315
AllowAnonymousAccess parameter
  for New-SPWebApplication cmdlet, 222, 223
  for New-SPWebApplicationExtension cmdlet, 223
AllowClobber parameter, for Import-PSSession cmdlet, 664
AllowEmbeddedSqlForDataConnections parameter, for Set-SPInfoPathFormsService cmdlet, 174, 179
AllowLegacyTraceProviders parameter, for Set-SPDiagnosticConfig cmdlet, 564
AllowUdcAuthenticationForDataConnections parameter, for Set-SPInfoPathFormsService cmdlet, 174, 179
AllowUserFormBrowserEnabling parameter, for Set-SPInfoPathFormsService cmdlet, 174, 176–177
AllowUserFormBrowserRendering parameter, for Set-SPInfoPathFormsService cmdlet, 174, 177
AllowUserFormCrossDomainDataConnections parameter, for Set-SPInfoPathFormsService cmdlet, 174, 179
AllowViewState parameter, for Set-SPInfoPathFormsService cmdlet, 174
AllSigned policy setting, for execution policy, 68
AllWebApplications parameter
  for Install-SPSolution cmdlet, 348
  for Uninstall-SPSolution cmdlet, 351
Alternate Access Mapping, 226–233
  adding new, 229–230
  editing, 231–232
  removing, 233
-and logical operator, 45
AnnouncementsList Feature.xml file, 334
anonymous access, 305, 320
anonymous policy, 252
Application Discovery and Load Balancing Service Application, granting access to, 398
Application Pools. See also Service Application Pools cmdlets to manage, 212
creation, 211, 217–220
  with New-WebAppPool cmdlet, 217–218
listing, 213–215, 214
removing, 219
starting, stopping and recycling, 216–217
types, 210–213
Web Applications hosted by, 220
APPLICATION value, for SERVERROLE setting, 121
ApplicationBase parameter, for Register-PSSessionConfiguration cmdlet, 673
ApplicationPool parameter
  for New-SPAccessServiceApplication cmdlet, 452
  for New-SPBusinessDataCatalogServiceApplication cmdlet, 472
  for New-SPEnterpriseSearchServiceApplication cmdlet, 502
  for New-SPExcelServiceApplication cmdlet, 440
  for New-SPMetadataServiceApplication cmdlet, 529, 531
  for New-SPPerformancePointServiceApplication cmdlet, 465
  for New-SPProfileServiceApplication cmdlet, 538
  for New-SPSecureStoreServiceApplication cmdlet, 419, 420
  for New-SPSubscriptionSettingsServiceApplication cmdlet, 686
  for New-SPVisioServiceApplication cmdlet, 458
  for New-SPWordConversionServiceApplication cmdlet, 477
  for Set-SPEnterpriseSearchServiceApplication cmdlet, 503
ApplicationPool property, of SPWebApplication object, 212
ApplicationPoolAccount parameter, for New-SPWebApplication cmdlet, 222
Area parameter, for Merge-SPLogFile cmdlet, 569
$args variable, 71
ArgumentList parameter, for Get-Command cmdlet, 15
arrays of objects, 28–29
  combining, 29
  creating, 23
  declaring empty, 29
  of ErrorRecord object, 97
ASP.NET Session State, wrapper for, 450
ASPNETMembershipProvider parameter, 318
  for New-SPAuthenticationProvider cmdlet, 315
ASPNETRoleProviderName parameter, 318
  for New-SPAuthenticationProvider cmdlet, 315
AssemblyName parameter, for Register-PSSessionConfiguration cmdlet, 673
AssignmentCollection parameter, for Register-PSAssignment cmdlet, 102
AssemblyName parameter, for Register-PSSessionConfiguration cmdlet, 673
AssignNewDatabaseId parameter, for Mount-SPContentDatabase cmdlet, 141
**ASSOCIATEDMEMBERGROUP PROPERTY** — **BUSINESS DATA CONNECTIVITY SERVICES**

- AssociatedMemberGroup property, of SPWeb object, 297
- AsString parameter, for Get-SPLogEvent cmdlet, 572
- at symbol (@), for arrays, 28
- Audit property, of SPSite object, 280
- AuditFlags property, of SPSite object, 280
- auditing, 278–282
  - audit log trimming, 279–280
  - documents and items settings, 280–281
  - lists, libraries and sites settings, 281–282
- AuditingEnabled parameter, for New-SPSecureStoreServiceApplication cmdlet, 419, 420, 692
- AuditlogMaxSize parameter, for New-SPSecureStoreServiceApplication cmdlet, 419
- authentication, 130, 221, 304
  - embedding SQL, in user forms, 179
  - forms, 304–310, 305
  - in InfoPath, 178
  - for SMTP server, 200
- Authentication parameter
  - for Enter-PSSession cmdlet, 662
  - for Invoke-Command cmdlet, 656, 658
  - for New-IPSession cmdlet, 658
  - for New-SPContentDeploymentPath cmdlet, 194
- authentication provider
  - for claims mode, 315
  - retrieving, 320–321
- AuthenticationMethod parameter
  - for New-SPWebApplication cmdlet, 222
  - for New-SPWebApplicationExtension cmdlet, 223
- AuthenticationProvider parameter, for New-SPWebApplicationExtension cmdlet, 223
- authorization, 304
- authorized applications, modifying for Windows Firewall, 153
- AuthProvider attribute, in FarmConfigurations.xml file, 127
- $_ automatic variable, 62, 99
- automating SharePoint, historical perspective, 5–7
- Available Mbytes counter, 626
  - modifying buckets for, 627–628
- Avg. Disk Queue Length performance counter, 623

**B**

- back up and restore
  - for inactive Farm configuration, 597–600
  - retrieving history, 603–605
  - for Site Collections, 605–609
  - restoring, 607–609
- BackConnectionHost script, 254
- BackConnectionHostNames setting, 254–255
- Backup-SPConfiguration Database cmdlet, 597–600
- Backup-SPFarm cmdlet, 593–597
- Backup-SPSite cmdlet, 269, 605–607
- BackupId parameter, for Restore-SPFarm cmdlet, 600
- BackupMethod parameter, for Backup-SPFarm cmdlet, 593
- BackupThreads parameter, for Backup-SPFarm cmdlet, 593
- base permissions, viewing list of available, 301
- Base scope, in Active Directory, 167
- Basic Authentication, in InfoPath, 178
- batch files, of STSADM commands, 5
- BCS. See Business Connectivity Services (BCS)
  - begin keyword, 81
  - for script block, 82
- Begin parameter, for ForEach-Object cmdlet, 61
  - binary large objects. See BLOB (binary large objects)
  - binary modules, 85
- BinaryPathName property, of New-Service cmdlet, 419, 420, 692
- Build-Farm.ps1 script, 123
- Build-SPFarm function, 80, 87, 88, 136
  - trap statement, 94
  - with try/catch/finally block, 98–99
- Build-SPFarm.ps1 script
  - with parameters, 79
  - running, 136–137
  - wrapping in function, 76
- Business Connectivity Services Service Application
  - partitioning for tenants, 688–689
- Business Connectivity Services Service Application provisioning, 471–474
  - creating Service Application, 472–474
  - creating Service Application Proxy, 474
  - starting Service Instance, 471–472
  - testing, 474, 475
- Business Data Connectivity Database, 159
- Business Data Connectivity Services Service Application, 395
  - granting Full Control access to, 399
Business Data Connectivity Services Service Application Proxy, creating, 402
Business Intelligence Service Applications, 438
Access Services, 448–455
Excel Services, 438–448
PerformancePoint Services, 462–470
Visio Services, 456–462
Business Intelligence Site Collection, for testing PerformancePoint, 468
Bypass policy setting, for execution policy, 68
bytes, GB and MB units conversion, 14
C
C2wts. See Claims to Windows Token Service (c2wts)
cache hit ratio, optimizing, 633
calleeTimeCheckInterval parameter, for New-SPMetadataServiceApplication cmdlet, 530
Caching, 629–635
BLOB (binary large objects), 634–635
object, 631–634
page output, 629–631
calling functions, 76
camel case naming convention, 22
CAML (Collaborative Application Markup Language), 334
capacity management, 618
case sensitivity, of equality operator, 40
CaseSensitive parameter, of Sort-Object cmdlet, 51
CASPolicies parameter
for Install-SPSolution cmdlet, 348
for Update-SPSolution cmdlet, 353
catch block, 93
categories, of InfoPath form, modifying, 184–185
Category parameter
for Add-SPDiagnosticsPerformanceCounter cmdlet, 622
for Merge-SPLogFile cmdlet, 570
for Remove-SPDiagnosticsPerformanceCounter cmdlet, 624
for Set-SPWebApplicationHttpThrottlingMonitor cmdlet, 627
CBA. See Claims-Based Authentication (CBA)
-contains operator, 44
Central Administration site, 4, 130
Alternate Access Mapping, 227
Application Pool identity, 124
cmdlets, 132–136
Configure Service Application Associations, 386, 386–387
copying files from SharePoint root directory to, 135
Diagnostics Logging page, 573
Manage Profile Service page, Configure Synchronization Connections, 549
Manage Service Application page, 376, 394, 394–395, 535
Manage Profile Service page, 545, 545
Metadata Service Application, 532
Monitoring page, View Web Analytics Reports, 412
Outgoing E-Mail Settings page, 200
running over SSL, 554
Service Application Associations page, 385
Services On Server page, 371, 372
user interface for log details, 565–566
Web Application settings
General Settings, 234, 234–234
Mobile Account settings, 241–242
Outgoing email settings, 239–241
Resource Throttling page, 237–239
SharePoint Designer settings, 242–243
Workflow settings, 239
Central Administration Web Application, creating, 132
-ceq (equality) operator, 40, 41
Certificate parameter, for New-SPTriustedRootAuthority cmdlet, 326
certificates
exporting, 396
importing to variable, 396–397
for SSL encryption, 311
cge (greater than or equal to) operator, 41–42
cgt (greater than) operator, 41
ChangeIPRestrictionList() method, 204–205
child objects, displaying details, 55
child scopes, 82
child Site Collections, 243
child Sites, deleting, 278
claim, 322
claim mapping, creating, 323–324
ClaimProvider parameter, for New-SPTriustedIdentityTokenIssuer cmdlet, 325
Claims-Based Authentication (CBA), 292, 304, 308–309, 315–328
creating Web Application using, 315–317
Claims-based token, converting to Windows identity, 426
Claims Principal object, creating, 292, 295, 398
Claims to Windows Token Service (c2wts), 426–429
for Excel Services, 442
resetting identity, 428–429
setting identity, 428
starting service instance, 427–428
testing, 429
claims token strings, 390
ClaimsMapping parameter, for New-SPTriustedIdentityTokenIssuer cmdlet, 324
ClaimValue parameter, for New-SPTriclaimsPrincipal cmdlet, 399
class property, 148
class Application Pools, 211
class mode authentication, 308, 310–314
class mode Web Applications, 310–311
classic remoting, 646–648
-cle (less than or equal to) operator, 42
Clear-EventLog cmdlet, 647
Clear-SPLogLevel cmdlet, 568
ClearChangeLog parameter, for Mount-SPContentDatabase cmdlet, 141
ClearPermissions parameter, for Set-SPUser cmdlet, 299
Client Counter, in Developer Dashboard, 587
clike operator, 42–43
CliXml (Constrained Language in XML), 668
Clone parameter
for New-SPEnterpriseSearchCrawlTopology cmdlet, 508
for New-SPEnterpriseSearchQueryTopology cmdlet, 512
continue statement, 58
  for ForEach-Object cmdlet, 63–64
in trap statement, 95
ConvertTo-UnsecureString function, 522–523, 546
Correlation IDs
  in error messages, aggregating events related to, 571
  in logs, 561
Correlation parameter, for Merge-SPLogFile cmdlet, 570
cost of page request, 585
counter loop, 59. See also for loops
Counter parameter
  for Add-SPDiagnosticsPerformanceCounter cmdlet, 622
  for Remove-SPDiagnosticsPerformanceCounter cmdlet, 624
  for Set-SPWebApplicationHttpThrottlingMonitor cmdlet, 627
CounterExists method, of PerformanceCounterCategory class, 623
Crawl Components, 485
  creating, 506–518
  retrieving, 492–493
Crawl Databases, 485
  creating, 508–509
  memory requirements, 483
  retrieving, 494–495
crawl logs, 494
Crawl Queue, 494
Crawl Topology components, \(485–486\)
  activating topology, 511–512
  creating topology, 507–508
CrawlDatabase parameter, for New-SPEnterpriseSearchCrawlComponent cmdlet, 510
crawling process, \(488–491\)
CrawlState property, of content source, 519
CrawlTopology parameter
  for New-SPEnterpriseSearchCrawlComponent cmdlet, 510
  for New-SPEnterpriseSearchCrawlTopology cmdlet, 508
CreateDefaultAssociatedGroups() method, 289
CreateHelpCollectionJobDuringSetup Registry key, 134
Credential parameter
  for Enter-PSSession cmdlet, 662
  for Invoke-Command cmdlet, 656
  for New-PSSession cmdlet, 659
  for Start-Job cmdlet, 540
Credential Security Support Provider (CredSSP), \(652–653\)
  credentials
    to access shared resources, Secure Store Services for, 417–423
    for remote session, 652–653
  Culture parameter, of Sort-Object cmdlet, 51
  curly braces ({}),
    for hash tables, 30
    for script block, 70
  current directory, 68
  current scope, 83
  custom database mirroring ports, 155
CustomerExperienceImprovementProgramEnabled parameter, for Set-SPDiagnosticConfig cmdlet, 564
dashboard, for displaying business data, 456
data connection files
  authentication information in, 179
  deleting, 187
  managing, \(186–187\)
data iteration, \(57–64\)
  with do until loops, 59
  with do while loops, \(58–59\)
  with foreach loops, 61
  with ForEach-Object cmdlet, \(61–64\)
  with for loops, \(59–60\)
  with while loops, \(57–58\)
Data Link Properties dialog, Connection tab, 125
Database Attach Upgrade, \(138\)
Database Connection Account, 124
database error, from attempt to access Service Application, 380
database mirroring, custom ports for, 155
database servers, counters collected on, 621
DatabaseCredentials parameter
  for Backup-SPConfiguration Database cmdlet, 598
  for Connect-SPConfigurationDatabase cmdlet, 131
  for New-SPConfigurationDatabase cmdlet, 129, 130
databases
  listing cmdlets for, \(159–160\)
  for SharePoint 2010, \(158\)
  SQL Server and, \(156–160\)
DatabaseServer attribute, in FarmConfigurations.xml file, 127
DatabaseServer parameter
  for Add-SPDiagnosticsPerformanceCounter cmdlet, 622
  for Backup-SPConfiguration Database cmdlet, 598
  for Connect-SPConfigurationDatabase cmdlet, 131
  for Enable-SPSessionStateService cmdlet, 451
  for Get-SPDiagnosticsPerformanceCounter cmdlet, 620
  for Mount-SPContentDatabase cmdlet, 141
  for New-SPBusinessDataCatalogServiceApplication cmdlet, 472
  for New-SPConfigurationDatabase cmdlet, 129
  of New-SPContentDatabase cmdlet, 254
DisableLoopbackCheck setting, 254
disaster recovery strategy, 592
DisplayName parameter
  for New-SPUser cmdlet, 295
  for Set-SPUser cmdlet, 298
Dispose function, 105
DN (Distinguished Name), 165
do until loops, data iteration with, 59
do while loops, data iteration with, 58–59
documents, audit settings for, 280–281
dollar sign ($), for variables, 21
domain connection time-out, 555
domain trust forms, 174
DoNotUnpublishAllPackages parameter, for
  Set-SPSiteSubscriptionMetadataConfig cmdlet, 690
dot source notation
  for calling function, 76
  executing without, 77
dot sourcing script, 70
double colon (::), 14
double value, checking type, 23
DownloadErrorReportingUpdatesEnabled parameter, for
  Set-SPDiagnosticConfig cmdlet, 564
downloading, blocking files from, 246–247
dynamic modules, 85

E

EBS (External BLOB Storage), 636
ElementManifest tag, 334
else statement, 45–47
elseif statement, 45–47
e-mail
  attachments, 205
  configuring incoming and outgoing, 199–206
  incoming, 201–206
  outgoing, 200–201
  sending username and password in, 236
Email parameter
  for New-SPUser cmdlet, 295
  for Set-SPUser cmdlet, 298
EmailAddresses parameter, for New-SPContentDeploymentJob
  cmdlet, 197
EmailAlias property, of SPList object, 206
EmailNotifications parameter, for New-SPContentDeploymentJob
  cmdlet, 197
Enable parameter, for Set-SPUsageDefinition cmdlet, 435
Enable-PSRemoting cmdlet, 650–651
Enable-SPFeature cmdlet, 342–343
Enable-SPInfoPathFormTemplate cmdlet, 181
Enable-SPSessionStateService cmdlet, 450–451
Enable-SPTimerJob cmdlet, 584
Enable-SPWebApplicationHttpThrottling cmdlet, 629
Enable-WSManCredSSP cmdlet, 653
EnableDataTrimming parameter, for New-SPWebAnalyticsServiceApplication
  cmdlet, 408
EnableDiagnosticMode method, 588–589
EnableGradualUpgrade parameter, for
  Install-SPInfoPathFormTemplate cmdlet, 181
encryption
  for Content Deployment, 192
  for Secure Store Services database, 417–418
end condition, in for loop, 60
end keyword, 81
for script block, 82
End parameter, for ForEach-Object cmdlet, 61
EndTime parameter
  for Get-SPLogEvent cmdlet, 572
  for Merge-SPLogFile cmdlet, 569, 570
Enter-PSSession cmdlet, 661–663
vs. Invoke-Command cmdlet, 671
Enterprise Search Services, 482–491, 487
Administration topology components, 482–483, 487
  cmdlets for provisioning and configuring, 520
configuring Search Service, 499–501
Crawl Topology components, 485–486
Full Crawl or Incremental, 519
provisioning, 496–519
activating Query Topology, 517
Administration component configuration, 504–506
creating Crawl and Query components, 506–518
creating Property database, 513
creating Query Component, 515–517
creating Query Topology, 512–513
defining service accounts, 496–497
Index Partitions configuration, 513–515
removing default topologies, 518
starting Service Instances, 497–499
Query Processor components, 486
Query Topology components, 483–484
retrieving components, 491–496
Crawl Components, 492–493
Crawl Databases, 494–495
Property Database, 495–496
Query Components, 493–494
service application, 492
Service Application Proxy, creating, 518–519
service placement, 487
Enterprise Services Farm, 395
-eq (equality) operator, 40, 41
equality (-ceq) operator, 40
equality (-eq) operator, 40, 41
$Error automatic variable, 97
error handling in scripts, 92–105
object disposal issues, 100–105
throw statement, 92–93
with trap blocks, 93–97
with try/catch/finally blocks, 97–100
error messages
  analyzing, 142
  Correlation IDs in, aggregating events related to, 571
ErrorAction parameter, for Get-SPWebAnalyticsServiceApplication
  cmdlet, 411
Examine the following list of terms and their definitions:

- **ErrorRecord object**, 92
  - array of, 97
  - Exception property of, 93
- **ErrorReportingAutomaticUploadEnabled** parameter, for Set-SPDiagnosticConfig cmdlet, 564
- **ErrorReportingEnabled** parameter, for Set-SPDiagnosticConfig cmdlet, 564
- escape character (\'), 23
  - for newline character, 47
- **Event Log**, 560
- **Event-LogFloodProtectionThreshold** parameter, for Set-SPDiagnosticConfig cmdlet, 565
- **EventID** parameter, for Merge-SPLogFile cmdlet, 570
- **EventLogFloodProtectionEnabled** parameter, for New-SPContentDeploymentPath cmdlet, 195
- **EventSeverity** enumeration values, 573, 574
- **Excel Services**, 438–448
  - associating ID of Target Application with, 446
  - creating Secure Store Target application, 442–446
  - creating Service Application, 440–441
  - granting application pool identity rights, 441
  - starting Service Instances, 439–440
  - testing service application, 446, 447, 448
  - Web access, 448
- **Excel Services Service Application Proxy**, adding to Proxy Group, 387–388
- **Excel Services Virtual Application**, 374
- **Exception property**, of ErrorRecord object, 93
- **ExcludeNestedCorrelation** parameter, for Merge-SPLogFile cmdlet, 570
- **ExcludeProperty** parameter, of Select-Object cmdlet, 53
- **explicit declaration**, of variables, 21
- **Explicit** parameter, for New-SPManagedPath cmdlet, 245
- **Export-CliXml** cmdlet, 669
- **Export-ModuleMember** cmdlet, 85, 86
- **Export Server**, for Content Deployment jobs, 192
- **Export-SPweb** cmdlet, 609, 614
  - parameters, 610–611
- **exporting certificates**, 396
- **External BLOB Storage (EBS)**, 636
- **external data sources**, exposing data from Excel, 442
- **failover database server**, object for configuring, 524–525
- **FailoverDatabase parameter**
  - for New-SPEnterpriseSearchCrawlDatabase cmdlet, 509
  - for New-SPEnterpriseSearchPropertyDatabase cmdlet, 513
  - for New-SPSecureStoreServiceApplication cmdlet, 419
- **FailoverDatabaseServer parameter**
  - for New-SPBusinessDataCatalogServiceApplication cmdlet, 472
  - for New-SPMetadataServiceApplication cmdlet, 530

Features (continued)
retrieving, 335–339
retrieving list of active for Site Collection, 670–671
for tenants, 695–701
uninstalling, 341–342
upgrading, 343
Feature.xml file, 331–333
File parameter, for Get-SPLogEvent cmdlet, 572
file types, blocked, 246–247
Filter parameter
for Get-SPSite cmdlet, 265, 267
for Get-SPWeb cmdlet, 273, 274
Filter property, for Where-Object cmdlet, 50
filters
for data, 49–55
with Where-Object cmdlet, 49–51
functions as, 82
with string, 16–17
FilterScript parameter, for Where-Object cmdlet, 49, 50
FIM WebClientTimeout property, of User Profile Service Application, 555
Firewall Policy COM object, instantiating reference to, 152
First parameter, of Select-Object cmdlet, 53
fl alias, 36. See also Format-List cmdlet (fl alias)
FlushBlobCache method, of PublishingCache class, 635
folders
for SharePoint Features, 331, 332
for Web Applications, 220, 220
for loops, data iteration with, 59–60
Force parameter
for Backup-SPFarm cmdlet, 594
for Backup-SPSite cmdlet, 606
for Disable-SPFeature cmdlet, 344
for Enable-SPFeature cmdlet, 342
for Export-SPWeb cmdlet, 610

Item parameter
  for Backup-SPConfiguration Database cmdlet, 598
  for Backup-SPFarm cmdlet, 593
  for Restore-SPFarm cmdlet, 601, 603
ItemUrl parameter, for Export-SPweb cmdlet, 611, 612
iterating through, data, 57–64
iterating through data
  with do until loops, 59
  with do while loops, 58–59
  with foreach loops, 61
  with for loops, 59–60
  with while loops, 57–58
J
Join-SPFarm function, 86, 136, 137
K
KeepTemporaryFilesOptions parameter, for New-SPContentDeploymentPath cmdlet, 195
Kerberos, 306–307
  configuration, 312–314
  vs. Windows NT LAN Manager (NTLM), 308
Kerberos Key Distribution Center (KDC), 306, 308
Key attribute, for FarmConfigurations.xml file, 114
labels, for script block column, 36
language pack Farm Solutions, 347
language pack Solution Packages, 359
Language Packs, 115
  speech recognition, 117, 118
  support for word breaking, 490
Language parameter
  for Add-SPSolution cmdlet, 346
  for Install-SPSolution cmdlet, 348
for New-SPSite cmdlet, 261
for New-SPWeb cmdlet, 272
for Remove-SPSolution cmdlet, 352
for Uninstall-SPSolution cmdlet, 351

Lapointe, Gary, 255

Last parameter, of Select-Object cmdlet, 54
-le (less than or equal to) operator, 42
legacy themes, 276
less than (-lt) operator, 42
less than or equal to (-le; -cle) operator, 42
Level parameter, for Merge-SPLogFile cmdlet, 570
libraries, audit settings for, 281–282
-like operator, 42–43, 51
Limit-EventLog cmdlet, 647
Limit parameter
for Get-SPFeature cmdlet, 336
for Get-SPSite cmdlet, 266, 267
for Get-SPWeb cmdlet, 273
list forms, 173
List Permissions, 247, 248
list templates, 330
ListOfReportingDatabases parameter
for New-SPWebAnalyticsServiceApplication cmdlet, 407, 408
for Set-SPWebAnalyticsServiceApplication cmdlet, 410
ListOfStagingDatabases parameter
for New-SPWebAnalyticsServiceApplication cmdlet, 407, 408–409
for Set-SPWebAnalyticsServiceApplication cmdlet, 410
lists
audit settings for, 281–282
exporting and importing, 609–615
LiteralPath parameter
for Add-SPSolution cmdlet, 346
for Add-SPUserSolution cmdlet, 359
for Update-SPSolution cmdlet, 353
load balancing, URLs and, 228
LoadWithPartialName method, of System.Reflection.Assembly class, 13
Local Administrator, Setup account as, 124
Local Administrators group
adding user to, 542
on remote computer, 656
Local deployment of Farm Solution, 345
Local Farm Claim, 531–532
Central Administration for adding, 532
Local parameter
for Get-SPEnterpriseSearchServiceInstance cmdlet, 497
for Install-SPSolution cmdlet, 348
for Uninstall-SPSolution cmdlet, 351
for Update-SPSolution cmdlet, 353
local scope, 83
Local Security Policy, updating, 540
local SMTP server, configuration, 201–202
LocalClaimType parameter, for New-SPClaimTypeMapping cmdlet, 323
LockIssue property, of SPSite object, 286
locks, 282–286
configuring, 285–286
state properties, 286
LockState, filtering by, 267
LockState parameter, for Set-SPSite cmdlet, 268, 269
Log on Locally right, granting, 540
LogDiskSpaceUsageGB parameter, for Set-SPDiagnosticConfig cmdlet, 563, 565
logging, 560–577. See also Unified Logging Service (ULS)
diagnostic configuration settings, 562–563
modifying, 563–565
log events, reviewing, 571–573
log file contents, 561, 562
log files
creating new, 569
merging existing, 569–571
retention period for, 434
log levels
modifying, 567–568
resetting, 568
reviewing, 565–567
logs directory, 561
of usage data, 434
writing log events, 573–577
Logging Database, 159, 560
LoggingEnabled parameter, for Set-SPUsageService cmdlet, 433
logic. See conditional logic
logic operators, 40, 45
Look and feel, upgrade for SharePoint, 143
loop-back check, 253–254
loops, data iteration with, 59–60
LowerLimit parameter, for Set-SPWebApplicationHttpThrottling Monitor cmdlet, 627, 628
-lt (less than) operator, 42
Managed Metadata Services, 388–389, 389, 528–535
backing up Service Application, 596
partitioning for tenants, 689–691
provisioning Service Application, 528–535
creating Service Application, 529–533
creating Service Application Proxy, 533–535
starting Service Instances, 529
testing service application, 535
Managed Metadata Services Service Application, for tenants, 704–705
Managed Paths, 243–246
creating, 244–245
creating for multi-tenancy environment, 684
and multi-tenancy deployments, 681
removing, 245–246
retrieving existing, 243–244
mandatory parameters, 73
manifest modules, 85
Map to External Resources feature, 227–228
Master Crawler, 485
-match operator, 43
MaxAggregationLevel parameter, for New-SPWebAnalyticsServiceApplication cmdlet, 407
MaxBackupDuration parameter, for Set-SPSearchService cmdlet, 524
MaxChannelCache parameter, for New-SPMetadataServiceApplication cmdlet, 531
MaxDataConnectionResponseSize parameter, for Set-SPInfoPathFormsService cmdlet, 175
MaxDataConnectionRoundTrip parameter, for Set-SPInfoPathFormsService cmdlet, 175, 178
MaxDataConnectionTimeout parameter, for Set-SPInfoPathFormsService cmdlet, 175, 177–178
MaxFormLoadTime parameter, for Set-SPInfoPathFormsService cmdlet, 175, 180
MaxSiteCount parameter for Mount-SPContentDatabase cmdlet, 141
of New-SPContentDatabase cmdlet, 254, 255
MaxSize parameter, for Set-SPSite cmdlet, 268
MaxSizeOfFormSessionState parameter, for Set-SPInfoPathFormsService cmdlet, 175
MaxUserActionsPerPostBack parameter, for Set-SPInfoPathFormsService cmdlet, 175, 180
MB units, conversion to bytes, 14
Member parameter, for Add-SPServiceApplicationProxyGroupMember cmdlet, 387
Member Sites, creating, 701–702
MemberType parameter, for Get-Member cmdlet, 19
memory
errors from insufficient, 667
Portal Super User and Portal Super Reader accounts requirements, 633
for Windows PowerShell Remoting, 653–654
memory leaks, 100–102
MemoryCacheSize parameter, for Set-SPInfoPathFormsService cmdlet, 178
Merge-SPLogFile cmdlet, 569
MergeWithDefaultPartition parameter, for New-SPEnterpriseSearchServiceApplicationProxy cmdlet, 518
merging existing log files, 569–571
Message parameter, for Merge-SPLogFile cmdlet, 570
metadata, from crawled content, Property Database to store, 513
Microsoft Search Server, 488
Microsoft SharePoint Server State Service, 180
Microsoft.SharePoint.Publishing.Administration namespace, 192
Microsoft.SharePoint.Administration namespace, 573
migrating content
remote BLOB content between providers, 641–642
Site Collection backup and restore for, 605
MinAggregationLevel parameter, for New-SPWebAnalyticsServiceApplication cmdlet, 407
MinimumLevel parameter, for Get-SPLogEvent cmdlet, 572
mobile account settings, 241–242
MobileNumber parameter
for New-SPUser cmdlet, 296
for Set-SPUser cmdlet, 298
Module parameter
for Get-Command cmdlet, 15
for Import-PSSession cmdlet, 664, 666
modules. See script modules
Mount-SPContentDatabase cmdlet, 138, 141–143, 142
UpdateUserExperience parameter, 143
Mount-SPStateServiceDatabase cmdlet, 414–415
Move-SPSite cmdlet, 270, 609
Move-SPUser cmdlet, 300
moving. See also migrating content
SharePoint users, 300–301
Site Collections, 269–270
MSSDmn process, 489
MSSearch process, 489, 490
MSSecurityDescriptors table, RAM for storing, 483
multi-Farm configuration, for Content Deployment, 188
multi-tenancy, 680
Feature Packs for tenants, 695–701
Managed Metadata Services Service Application, 704–705
with multiple Site Subscriptions, 444
Service Applications configuration, 685–695
Subscription Settings Service Application, 685–688
Tenant Services, 688–695
storing tenant information, 705–706
Tenant Administration Site, creating, 702–703
tenant hosting Web Application creating, 681–684
Managed Paths creation, 684
tenants, provisioning, 701–706
User Profile Services Service Application, 703–704
mutual authentication, 307
MySiteHostLocation parameter
for Add-SPSiteSubscriptionProfileConfig cmdlet, 694
for New-SPProfileServiceApplication cmdlet, 538
for Set-SPSiteSubscriptionProfileConfig cmdlet, 693, 694
MySiteManagedPath parameter
for Add-SPSiteSubscriptionProfileConfig cmdlet, 694
for New-SPProfileServiceApplication cmdlet, 538
for Set-SPSiteSubscriptionProfileConfig cmdlet, 693, 694

N
Name attribute
for FarmConfigurations.xml file, 114
in FarmConfigurations.xml file, 127

types, 14, 22–28
ObjectSecurity parameter, for Set-SPServiceApplicationSecurity cmdlet, 393
Office Web Applications, 115
offline install, of SharePoint 2010 Server, 114
OneLevel scope, in Active Directory, 167
-or logical operator, 45
Organizational Units, for tenants, 693
OSEarch14 service, 161
out-of-memory errors, 100
outgoing email, configuration, 200–201
output, 31–37
  formatting, 35–37
  object pipeline, 31–35
Overwrite parameter, for Merge-SPLogFile cmdlet, 570
OwnerAlias parameter
  for New-SPSite cmdlet, 261, 318
  for Set-SPSite cmdlet, 268
OwnerEmail parameter, for New-SPSite cmdlet, 261
page output caching, 629–631
page request, cost of, 585
param keyword, 71–73
parameters
  adding attributes to, 72
  common for cmdlets, 16
  defining for functions, 79–80
  defining for scripts, 71–73
  displaying descriptions for cmdlet, 32–34
  switch data type for, 73
  throw statement for validating, 93
Parent property, of SPFeature object, 337
Partitioned parameter
  for New-SPBusinessCatalogServiceApplication cmdlet, 472
  for New-SPMetadataServiceApplication cmdlet, 530
  for New-SPMetadataServiceApplicationProxy cmdlet, 534
  for New-SPProfileServiceApplication cmdlet, 539
  for New-SPProfileServiceApplicationProxy cmdlet, 544
  for New-SPSecureStoreServiceApplication cmdlet, 419
  for New-SPWordConversionServiceApplication cmdlet, 477
Partitions parameter, for New-SPEnterpriseSearchQueryTopology cmdlet, 512
Passphrase attribute, in FarmConfigurations.xml file, 127
Passphrase parameter
  for Connect-SPConfigurationDatabase cmdlet, 131
  for New-SPConfigurationDatabase cmdlet, 129
  for Update-SPSecureStoreApplicationServerKey cmdlet, 422
  for Update-SPSecureStoreMasterKey cmdlet, 422
PassThru parameter, 118
  for Enable-SPFeature cmdlet, 342
  for Set-SPFeature cmdlet, 299
password
  for Farm Account, 546
  function to retrieve, 523
  prompting user for, 522
retrieving, 389–390
for Search Service, 497

%PATH% environment variable, adding SharePoint Root
BIN folder, 6

Path parameter
for Backup-SPSite cmdlet, 606
for Export-SPWeb cmdlet, 610, 611
for Import-SPWeb cmdlet, 613
for Install-SPFeature cmdlet, 340
for Merge-SPLogFile cmdlet, 569
for New-SPWebApplication cmdlet, 222
for New-SPWebApplicationExtension cmdlet, 224
for Restore-SPSite cmdlet, 607, 608
path, specifying in backup, 596
PathAccount parameter, for New-SPContentDeploymentPath
cmdlet, 194
PathEnabled parameter, for New-SPContentDeploymentPath
cmdlet, 195
pausing service, 163
Per-Process Counters, in Developer Dashboard, 587
Per-Thread Counters, in Developer Dashboard, 587
Percentage parameter
for Backup-SPFarm cmdlet, 594
for Restore-SPFarm cmdlet, 601
performance, 618
Content Database, impact of growth, 269–270
degradation from memory leaks, 100
HTTP request throttling and, 625–629
Index Partitions and, 484
remote BLOB storage and, 637
resource throttling, 618–629

Property parameter
   of Select-Object cmdlet, 53
   of Sort-Object cmdlet, 51
PropertyDatabase parameter, for Set-SPEnterpriseSearchPropertyDatabase cmdlet, 514
PropertyName parameter, for Set-WebBinding cmdlet, 231
Protocol parameter
   for Get-WebBinding cmdlet, 230
   for New-WebBinding cmdlet, 229
   for Remove-WebBinding cmdlet, 233
   for Set-WebBinding cmdlet, 230
protocols
   SharePoint use of, 154–155
   for SQL Server, 156–157
   Windows Firewall and, 154–155
Provision() method, for Application Pool, 219
Proxy Groups, 384–388
   adding members, 387
   adding Service Application Proxy to, 411
   creating, 387
   removing Service Application Proxy from, 388
ProxyType parameter, for Set-SPEnterpriseSearchService cmdlet, 500
   .ps1 file extension, 66
PSBase property, 55
PSConfig, 5
   for creating SharePoint 2007
   farm, 5–6
   folder for executable files, 7
   .psd1 file extension, 88
   .psm1 file extension, 85
PSObject .NET type, 25
public URLs, 227
Publish-SPServiceApplication cmdlet, 400–401
PublishToAccessServices screen, 455
Publishing Farm, 395
   granting access to Service Application, 397–398
PublishingCache class, FlushBlobCache method, 635

Q
Query and Site Settings Service, 486
   starting instance, 506
Query Components, 484
   creating, 506–518
   retrieving, 493–494
Query Partitions, creating, 512–513
Query Processor, access to MSSecurityDescriptors table, 483
Query Processor components, 486
Query Topology components, 483–484
   activating, 517
   creating topology, 512–513
QueryTopology parameter
   for Get-SPEnterpriseSearchPropertyDatabase cmdlet, 495, 514
   for New-SPEnterpriseSearchQueryComponent cmdlet, 515
   for New-SPEnterpriseSearchQueryTopology cmdlet, 512
   for Set-SPEnterpriseSearchPropertyDatabase cmdlet, 514
Quick Deploy job, 189
QuickLaunchEnabled property, for SPWeb object, 275
quota template, 282
   applying to Site Collection, 284–285
   default, 283
   retrieving, 283–284
quotas, 282–286
QuotaTemplate parameter
   for New-SPSite cmdlet, 261
   for Set-SPSite cmdlet, 268
quotes, for string names, 30

R
rank reports, 404
RBS Maintainer, 638
RDN (Relative Distinguished Name), 165
Read-Only Database Upgrade, 138
ReadAccessAccount parameter, for New-SPMetadataServiceApplication cmdlet, 530
ReadLocked property, enabling, 286
Realm parameter, for New-SPTrustedIdentityTokenIssuer cmdlet, 325
reboot, triggering, 111
Receive-Job cmdlet, 541
Receive-SPServiceApplicationConnectionInfo cmdlet, 401
Recycle Bin Timer Jobs
   disabling and reenabling, 584
   retrieving and executing, 583
Recycle Bin, Web Application settings for, 236
Regex parameter
   for Get-SPSite cmdlet, 266
   for Get-SPWeb cmdlet, 273, 274
Register-PSSessionConfiguration cmdlet, 672–675
Register-WmiEvent cmdlet, 647
registration, of trusted root authority, 326
Report Consolidator component, 405
ReportConsolidationStartTime parameter, for
Set-SPWebAnalyticsServiceApplication cmdlet, 410
Reporting Database, 405
ReportingDataRetentionPeriod parameter, for New-
SPWebAnalyticsServiceApplication cmdlet, 407
reports, 404. See also Web Analytics Services Service Application
Requests Current counter, 626
Requests Queued performance counter, 623
required permissions, 11–12
RequireSslForDataConnections parameter, for Set-
SPInfoPathFormsService cmdlet, 175, 178
ResetToDefaultSettings method, 628
Resource Throttling page, in Central
Administration, 237–239
resource utilization, HTTP request throttling and, 625
ResourceName parameter
for Get-SPAlternateUrl cmdlet, 232
for New-SPAlternateUrl cmdlet, 230
Restart-Computer cmdlet, 111, 647
Restart-Service cmdlet, 163
Restart-WebAppPool cmdlet, 216
Restore-SPSite cmdlet, 607–609
RestoreMethod parameter, for
Restore-SPFarm cmdlet, 600
Restore_SPFarm cmdlet, 600–603
RestoreThreads parameter, for Restore-SPFarm
cmdlet, 601
Restricted policy setting, for execution policy, 68
RestrictedAccount parameter, for New-
SPMetadataServiceApplication cmdlet, 530
Resume-Service cmdlet, 164
retrieving Sites, 274
Rights parameter, for Grant-SPObjectSecurity cmdlet, 392
RightsMask property, of SPWebApplication object, 250
Role Assignment collection object, adding SPGroup object to, 292
Role Definition, creating, 301
RoleDefinitions property, of SPWeb object, 297, 301
root Site
creating, 261
templates for, 262
RootCertificate property, of SPCertificateAuthority object, 396
RootWeb property, of SPSite object, 287
RP-STS (Relying Party STS), 322
reviewing communications, 326–328
RSS feeds, 235
rules in Health Analyzer, 577–578
creating custom, 580
disabling vs. deleting, 579
reviewing and modifying definitions, 578–579
reviewing failed, 579–580
Run as administrator, for SharePoint 2010 Management Shell, 12
RunOnce Registry key, 111
SAM Account, 165
SameAsIncoming parameter, for New-SPClaimTypeMapping cmdlet, 323
SamplingRate parameter, for New-SPWebAnalyticsServiceApplication cmdlet, 408
Sandboxed Code Service, starting, 173
Sandboxed Solutions, 356–365
adding, 358–359
deploying, 359–360
disabling ability to use, 285
InfoPath 2010 form as, 173
multiple tenants and, 680
point limits for, 282
removing, 362–363
retrieving, 362
Solution Gallery for storing, 357, 357–358
updating, 363–365
ScanForFeatures parameter, for Install-SPFeature cmdlet, 340
Schedule parameter
for New-SPContentDeploymentJob cmdlet, 197
for Set-SPTimerJob cmdlet, 584
ScheduleEnabled parameter, for New-SPContentDeploymentJob cmdlet, 197
schedules
setting, 199
for Timer Jobs, 584–585
Scope parameter, for New-SPContentDeploymentJob cmdlet, 197
scopes, 82–85
in Active Directory, 167
and trap keyword, 97
script blocks, 36
creating for Select-Object cmdlet, 56
for defining properties, 56
executing, 70–71
vs. functions, 76
running as any user, 539
script editor, 9, 66
updating user profile to use any, 10
script modules, 85–91
creating and loading, 86–88
creating manifests, 88–91
script scope, 83
ScriptBlock parameter
for Invoke-Command cmdlet, 656, 658
for Start-Job cmdlet, 540
scripted install, benefits, 110
ScriptErrorReportingDelay parameter, for Set-SPDiagnosticConfig cmdlet, 565
ScriptErrorReportingRequireAuth parameter, for Set-SPDiagnosticConfig cmdlet, 565
ScriptHalted error, 93
scripts, 66–75
comments in, 74–75
creating and executing, 66–70
defining parameters, 71–73
error handling, 92–105
object disposal issues, 100–105
throw statement, 92–93
with trap blocks, 93–97
with try/catch/finally blocks, 97–100
for processing pipeline data, 81–82
running from command prompt, 6
scripts folder, 67
Search Administration Database, 159
Search Crawl Database, 159
search crawling, 488
Search Property Database, 159
search reports, 404
Search Services, partitioning for tenants, 691–692
SearchApplication parameter
for Get-SPEnterpriseSearchCrawlTopology cmdlet, 493
for Get-SPEnterpriseSearchAdministrationComponent cmdlet, 505
for Get-SPEnterpriseSearchCrawlDatabase cmdlet, 494
for Get-SPEnterpriseSearchPropertyDatabase cmdlet, 495, 514
for Get-SPEnterpriseSearchQueryTopology cmdlet, 493
for New-SPEnterpriseSearchCrawlComponent cmdlet, 510
for New-SPEnterpriseSearchCrawlDatabase cmdlet, 509
for New-SPEnterpriseSearchCrawlTopology cmdlet, 508
for New-SPEnterpriseSearchPropertyDatabase cmdlet, 513
for New-SPEnterpriseSearchQueryComponent cmdlet, 515
for New-SPEnterpriseSearchQueryTopology cmdlet, 512
for New-SPEnterpriseSearchServiceApplicationProxy cmdlet, 518
for Set-SPEnterpriseSearchAdministrationComponent cmdlet, 505
