Index

Page numbers followed by “f” and “t” indicate figures and tables.

Abscesses, 67, 82, 256t
Absorbed dose, 40
Accessory root canals, 225
Accountability, collaborative, 150, 159, 194
Acquisition, defined, 3
Acute otitis media, 81–82
Adenoidal facies, 200
Adenoids, 203–204, 205f
Adenomas, pleomorphic, 70
Adenomatoid odontogenic tumors, 58, 59
Aditus ad antrum, 81
Agenesis, 222
Agger nasi cells, 72, 72f, 75, 77–78
Airway assessment
  arthrides and, 200–201, 200f
  condylysis and, 200f, 201
  facial growth and, 199–200
  imaging protocols and, 198–199
  juvenile arthritis and, 202–203f, 201–206
  orthodontic and orthognathic planning and, 93–94, 94f
  overview of, 197–198, 207–208
  resistance and, 198
ALARA (As Low As Reasonably Achievable) principle, 35, 214, 263
Alveolar bone and tooth assessment, 92, 92f
Alveolar bone loss, 253–259, 258f, 259f, 260f, 265–266
Ameloblastic fibromas, 57, 58
Ameloblastomas, 57–58, 57f, 112f, 122
Aneurysmal bone cysts, 58
Angiofibromas, juvenile nasopharyngeal, 70
Angiography, 116, 124
Angles of rotation, 30, 39
Angulation, 256
Ankylosis, 181–182, 182–184f
Anodes, 26, 27
Antrochoanal polyps, 68
Apical periodontitis (AP), 213, 229–230, 241
Application-specific integrated circuits (ASIC), 13
Arthrides, 200–201, 200f
Arthritis, juvenile, 202–203f, 201–206
Artifacts
  beam hardening, 16, 22–23, 220
  common, 20–23, 22f, 23f
  computer-aided surgery and, 96
  cone beam, 14
  metal and, 110, 220
  misregistration, 220
  motion, 220f
  nonuniformity, 20, 22f
  overview of, 220
  partial volume, 220
  ring, 20, 21f
  scatter, 22–23, 110
  streaks, 20, 22, 22f, 220
ASIC. See Application-specific integrated circuits
Atherosclerosis, 51
Atomic number, 25
Atoms, 25
Attenuation, 6–7, 220
Atypical odontalgia, 226–227
Auditory canal, external, 85–86, 86t
Aurora, 99
Averaging, 7
Axial plane, 44f

Back projection, 11, 12, 14–15
Background radiation, 33–34, 33f
Basal cell nevus syndrome, 57
Beam hardening artifacts, 16, 22–23, 220
Bifid canals, 135, 135f
Binding energy, 25
Biomarkers, 93
Biphosphonate drugs, 61
Bite registrations, 158, 159, 163
Blur effects, 19–20, 19f
Bohr, Niels, 25
Bone canals, 134
Bone density, 130–132, 132f, 261–263
Bone displacement vectors, 99
Bone grafts. See Grafts
Bone reduction guides, 175–176, 176–179f
Bone resorption, 265–266, 265f
Bone window imaging, 9–10, 14, 15f
Bone-supported surgical guides, 168, 171f, 189f
Brachial arch syndromes, 200
Bremsstrahlung photons, 27–28, 28f
Buccal bifurcation cysts, 55
Buccal bone, 136, 138f, 139f, 140, 141, 141f

CAC. See Carotid artery calcifications

CAD/CAM

collaborative accountability and, 159
imaging protocols and, 159
overview of, 147–148, 185, 194–195
prototyping and medical modeling and
case type patterns and, 150–155
pretreatment analysis, 149–150, 149t
stereolithography, 148–149, 148f, 149f, 159
scanning appliances and, 155–159
surgical guides and
bone reduction guides, 175–176, 176–179f
cutting pathway guides for lateral antroscopy of
maxillary sinus, 176, 179–181f
definition and classification, 161–166
for extraction of ankylosed teeth, 181–182, 182–184f
fully integrated, 182, 184–193f
implant planning and, 129, 138, 141, 142
implementation into clinical practice, 166–175
overview, 161

Calcification, 51, 52, 52f
Calcified canals, 233–234
Calcifying epithelial odontogenic tumors, 58
Caldwell-Luc sinus grafting technique, 132, 133–134, 133f
Calibration, 21–22
Canal stenosis, 86
Cancer, radiation-induced, 32–33, 34
Capsules, 46, 47f
Carcinogenesis, 32–33, 34
Carcinomas, 61–62, 70, 87, 204, 208f. See also Squamous
cell carcinomas
Cardiovascular disease, 241
Carestream Dental 9300 CBCT unit, 148
Carotid arteries, 84
Carotid artery calcifications (CAC), 51–52, 52f
Carotid atheromas, calcified, 51–52, 52f
Carotid canal, 86t
Cartilage, 93
Case type patterns
I, 149t, 150, 151f
II and III, 149t, 150–153, 152f, 153f
IV, 149t, 153–154, 154f
V, 149t, 154–155, 155f
Cathodes, 26–27, 27f
Cavernous sinus thrombosis, 67
CBCT. See Cone beam computed tomography
CCDAP. See Chronic continuous dentoalveolar pain
Cemental dysplasia, 50
Cementifying fibroma, 51
Cementoblastoma, 49
Cemento-osseous dysplasia, 50
Cementum, radiopaque lesions and, 48
Central giant cell granulomas (CGCG), 58
Central odontogenic fibromas, 58
Central ossifying fibroma, 51
Cephalometrics, 97–98
CGCG. See Central giant cell granulomas
Cherubism, 58–59
Chicken pox, 213
Cholesteatomas, 82–84
Cholesterol granulomas, 84
Chondrosarcomas, 63, 87
Chordomas, 87
Chromosomes, 32
Chronic adhesive sclerosis, 82
Chronic continuous dentoalveolar pain (CCDAP), 226–227
Chronic otitis media, 82
Circular-orbiting cameras, 13f, 14
Clinical attachment measurements, 251
Closest point method, 91, 101, 102f
CMFApp software, 95
Coalescent mastoiditis, 87
Cochlea, 78, 86t
Cochlear implants, 81
Cochlear otosclerosis, 80–81
Coherent scatter, 30, 30f
Collaborative accountability, 150, 159, 194
Collimations, 29–30
Collimators, 5
Color maps, 91, 102, 102f
Co-Me network, 95
Compton scatter, 30–31, 31f
Computer-aided design/computer-aided manufacturing. See CAD/CAM
Computer-aided jaw surgery, 94–100, 95f
Concha bullosa, 54, 71–72, 71f, 204f
Condensing osteitis, 49, 50f
Condylar hypoplasia, 200
Condylar remodeling, 93f
Condylitis, 200f, 201
Cone beam artifacts, 14
Cone beam computed tomography (CBCT), overview of, 3–6, 4f
Continuous exposure, 29
Contrast, 8–9, 9f, 20
Cooling issues, 5
Cortication, 45
Cranial nerves, 86–87
Craniofacial anomalies, 94, 94f
Craters, 252, 256t, 260
C-Reactive protein, 93
Crest lines, 97
Cribiform plate, 86
Crista galli, 86
Cross-section views, 44f
CUDA, 14
Cupping, 220
Current, 28–29
Cutting guides, 119, 120f, 124, 176, 179–181f
Cysts
aneurysmal bone, 58
buccal bifurcation, 55
dentigerous, 55, 55f, 59
jaw, 54–56, 55f, 58
mucous retention, 67–68, 68f, 68t
nasopalatine duct, 229
overview of, 228
pseudocysts, 56–57, 56f
radicular, 49, 55, 211, 214
radiographic diagnosis of, 214
simple bone, 56, 56f

Deep circumflex iliac artery (DCIA) free flaps, 113
Degenerative joint disease, 200f, 201
Dehiscence of superior semicircular canal, 80
Dehiscences, 80, 257
Dens invaginatus (DI), 222
Dense bone islands, 49–50, 50f, 222–224, 224f
Dental follicles, 59
Dental implants. See Implant placement
Denticles, 48
Dentigerous cysts, 55, 55f, 59
Dentin, 48
Dentition, 3D visualization of, 115–116, 115f
DentoCAT, 3–4, 4f
Dentofacial deformities, 94, 94f
Denture scanning appliances, 149f, 157–158, 158f, 160f
Detector glare, 19
Detector lag, 19
Deterministic effects of ionizing radiation, 31–32
Developmental anomalies, of jaw, 53–54
Deviated nasal septum, 203, 204f
DI. See Dens invaginatus
Digital subtraction radiography, 252
Disinfection, 175
Distraction osteogenesis, 99
DNA, ionizing radiation and, 32
Dolphin Imaging, 95
Drilling guides, 117, 117f
Dual scan protocols, 159, 161f

Ear
external auditory canal, 85–86, 86t
inner, 78–81
middle, 81–85, 84t
Ectopic calcification, 48
Endodontic treatment
dentoalveolar trauma, 234–235, 235f, 236f
differential diagnosis
anatomic structures hindering performance of
task-specific procedures, 227–228
assessment of nonhealed cases, 229–230
contradictory or nonspecific signs and symptoms,
226–227
nonodontogenic lesions, 228
odontogenic lesions, 228–229
poorly localized symptoms, 227
vertical root fractures, 230–233, 232f
evaluation of anatomy and complex
morphology
additional roots, 225–226
anomalies, 216f, 222–224
missed/accessory canals, 225
root curvatures, 224–225
implant planning and, 240
Index

Endodontic treatment (cont’d)
implantation vs., 135–136, 136f
intra- or post-operative assessment of complications
calciﬁed canals, 233–234
perforation localization, 234
limitations of 2D imaging in, 217–218
