Mission background, 89–90
definition, 89
exhibit, 88
Myths of performance measurement
   all performance measures are KPIs, 27
   all measures can work successfully in any organization, at any time, 26
   by tying KPIs to remuneration you will increase performance, 28
KPIs are financial and non-financial indicators, 31
measuring performance is relatively simple and the appropriate measures are obvious, 30
most measures lead to better performance, 26
you can delegate a performance myths, management project to a consulting firm, 31
Myths of performance measurement (Continued)
we can set relevant annual targets, 34–35
Myths of the Balanced Scorecards
indicators are either lead (performance driver) or lag (outcome) indicators, 34, 36
measures are cascaded down the organization, 39
measures fit neatly into one balanced scorecard perspective, 34
performance measures are mainly used to help manage implementation of strategic initiatives, 40–42
strategy mapping is a vital requirement, 37–39
the balanced scorecard can report progress to both management and the board, 34
the balanced scorecard was first off the blocks, 32–33
there are only four balanced scorecard perspectives, 33
