Preface ix
About the authors xi
Acknowledgements xiii

1 Introduction 1
  1.1 Background and purpose 1
  1.2 Key concepts and definitions 3
  1.3 Supporting information 5
  1.4 Structure/layout of the book 6

2 Mining and ecological degradation 11
  2.1 Background 11
    2.1.1 The need for land reclamation 12
  2.2 Mining in India 12
    2.2.1 Coal 14
    2.2.2 Iron ore 15
    2.2.3 Copper, lead and zinc mining 16
    2.2.4 Bauxite mining 18
    2.2.5 Chromite mining 18
    2.2.6 Limestone and other calcareous stone mining 19
  2.3 Mining in other countries 20
    2.3.1 Mining in Australia 20
      2.3.1.1 Coal 20
      2.3.1.2 Uranium 21
    2.3.2 Mining in the United States 21
      2.3.2.1 Coal 21
      2.3.2.2 Copper 21
      2.3.2.3 Silver 21
      2.3.2.4 Gold 21
      2.3.2.5 Uranium 21
    2.3.3 Mining in South Africa 22
      2.3.3.1 Coal 22
      2.3.3.2 Iron ore 22
      2.3.3.3 Gold 22
      2.3.3.4 Diamond 22
2.3.3.5 Platinum and palladium 23
2.3.3.6 Chromium 23
2.3.4 Mining in the United Kingdom 23
  2.3.4.1 Coal mining 23
  2.3.4.2 Iron ore copper, tin, lead and silver mining 24
  2.3.4.3 Industrial minerals 24
2.3.5 Mining in China 25
  2.3.5.1 Gold 25
  2.3.5.2 Coal 26
2.4 Types of mine waste disposal 27
2.5 Wastelands 29
2.6 Waste generation 30
2.7 Solid waste generation 33
2.8 Ecological degradation and disturbance 35
2.9 Restoration ecology and ecological restoration 39
2.10 Societal ecology 43

3 Regulation of reclamation 47
3.1 Background 47
3.2 Mining laws and policies in India 48
  3.2.1 Status of legislation for land reclamation 48
  3.2.2 National Mineral Policy: environmental protection 49
  3.2.3 The Mines and Minerals (Regulation and Development) – MMRD Act, 1957 49
  3.2.4 The Mineral Concession Rules, 1960 49
  3.2.5 Mineral Conservation and Development Rule, 1988 49
  3.2.6 Forest Conservation Rule, 1980 53
  3.2.7 National Forest Policy, 1988 53
  3.2.8 Policy Statement on Abatement of Pollution, Environment and Development, 1992 53
  3.2.9 National Mineral Policy, 1993 53
  3.2.10 National Conservation Strategy and Policy Statement on Environment and Development 54
  3.2.11 Environmental auditing and accounting of geographical resources excavated from mines 54
  3.2.12 EMP for sustainable mining activities 54
  3.2.13 Displacement in the mining sector 55
    3.2.13.1 R&R policies 57
  3.2.14 Gaps in mining and environmental legislation and recommendations 58
3.3 International policies and legislations 58
   3.3.1 Mine reclamation laws and policies in the United States 60
      3.3.1.1 Intent of the legislature 62
      3.3.1.2 State policy for the reclamation of mined lands 62
      3.3.1.3 National Mining and Minerals Policy 63
   3.3.2 Mining laws and policies in the United Kingdom 63
   3.3.3 Mining laws and policies in European Union 64
      3.3.3.1 Legislative framework for the safe management of mining waste 65
   3.3.4 Mining laws and policies in Australia 65
   3.3.5 Mining laws and policies in Canada 66
   3.3.6 Mining laws and policies in South Africa 67
   3.3.7 Mining laws and policies in Sweden 68

4 Development processes in disturbed ecosystems 71
   4.1 Background 71
      4.1.1 Conceptual framework: disturbance 71
   4.2 Disturbance and ecosystem processes 73
   4.3 Succession 74
      4.3.1 Conditions for succession 75
         4.3.1.1 Initial soil formation 75
      4.3.2 Primary succession 76
      4.3.3 Secondary succession 77
   4.4 Ecosystem development in mine spoils 79
   4.5 Options in restoration 80
      4.5.1 Re-vegetation objectives 80
      4.5.2 Implications for management 82

5 Benefits of reclamation 85
   5.1 Background 85
   5.2 Establishment of ecological succession 87
   5.3 Recovery of damaged ecosystems 88
      5.3.1 Biological macro-aggregate formation 90
      5.3.2 Enhancement of soil fertility 92
      5.3.3 Establishing a nutrient supply 93
      5.3.4 Remediation of heavy metals 95
      5.3.5 Carbon sequestration 100
         5.3.5.1 The mechanism of carbon protection 101
      5.3.6 Aesthetic enhancement 103
   5.4 Rebuilding soil structure 104
      5.4.1 Recharging soil microbe activity 105
         5.4.1.1 Bacteria 105
         5.4.1.2 Mycorrhiza 105
