A
Alloantibodies, 1042
Abdominal discomfort, rapidly growing dominant follicle and, 82
Abdominal distension
neonatal evaluation, 1035
small intestinal accident and, 1093
Abdominal pain/depression, postpartum metritis and other causes of, 453
Abdominal press, prepubic tendon rupture and loss of, 482
Abdominal testis, identifying, laparoscopy for, 667
Abdominocentesis
inguinal herniation and, 695
in postpartum mares, 445
small intestinal accident and, 1093
Abnormal estrus intervals, 5–13
abbreviations, 12
clinical features, 6–8
lengthened interestrus interval, 8
shortened estrus duration, 7
shortened interestrus interval, 7–8
definition/overview, 5
diagnostics, 9–10
differential diagnosis, 8–9
differentiating causes, 9
differentiating conditions with similar symptoms, 8
etiology/pathophysiology, 5
key hormonal events in equine estrous cycle, 5
length of diestrus, 6
length of estrus, 5
sexual behavior, 6
systems affected, 6
patient monitoring, 11
possible complications, 12
signalment/history, historical findings, 6
therapeutics, 10–11
alternative drugs, 11
drug(s) of choice, 10
precautions/interactions: horses, 10–11
precautions/interactions: humans, 11
surgical considerations, 11
Abortigenic infections, fetal stress/distress and exposure to, 949
Abortion, 957, 1101
fescue agalactia and, 48
high-risk pregnancy and, 287
hydrops allontois/amnion and, 300, 302
leptospirosis and, 320, 321, 322, 325
mid-gestation, placenta from, 495
miniature horses and, 359
hydrocephalus, domed head shape and, 356, 357
placental insufficiency and, infectious and noninfectious causes of, 423
placentitis and, 432
poor vulvular conformation and, 594
postpartum metritis and history of, 449
recording, 748
twin pregnancies, 539, 541, 542, 543
mare monitored for, 548
Abortion, induction of (elective termination), 14–18
abbreviations, 18
client education, 17
clinical features, 16
definition/overview, 14
diagnostics, CBC/biochemistry/urinalysis; hormonal assays; imaging, 16
differential diagnosis, 16
etiology/pathophysiology, 14–15
induction of uterine contractions, 15
luteolysis, 14
mechanical disruption of the pregnancy, 14–15
systems affected, 15
expected course and prognosis, 17
patient monitoring, 17
possible complications, 17
prevention/avoidance, 17
signalment/history, 15
therapeutics, 16–17
appropriate health care, 17
drug(s) of choice, 16
nursing care, 17
Abortion, spontaneous, infectious, 19–31
abbreviations, 30–31
bacteria and fungi endotoxemia, 27
fetal injection and placentitis, 27
MRLS, 27
protozoa, 27
rickettsiae, 27
client education, 29
clinical features, 23–24
definition/overview, 19
diagnostics, 25–27
differential diagnosis, 24–25
other causes of abortion (spontaneous, noninfectious), 24–25
other causes of vulvar discharge, 25
other causes signs of labor or abdominal discomfort, 25
echogenic allantoic fluid with increased thickness and possible detachment of chorioallantoic membrane associated with MRLS, 24
etiology, 19, 21
bacteria, 19, 21
MRLS, 21
rickettsiae, 21
viruses, 19
expected course and prognosis, 30
gross appearances of ascending placentitis, 20
nocardioform placentitis, 20
pathological findings, 26–27
pathophysiology, 19, 21–22
systems affected, 22
patient monitoring, 29
possible complications, 30
prevention/avoidance, 29–30
additional prophylactic steps, 29–30
vaccines, 29
signalment/history, 22–23
historical findings, 23
risk factors, 22–23
synonyms and closely related conditions, 30
therapeutics, 27–29
activity, 28
alternative drugs, 28
appropriate health care, 28
diet, 28
drug(s) of choice, 27–28
nursing care, 28
precautions/interactions, 28
surgical considerations, 29
viruses, 26–27
EHV, 26
EVA, 27
vesivirus, 27
Abortion, spontaneous, noninfectious, 32–44
abbreviations, 43
client education, 41
clinical features, 37
definition/overview, 32
diagnostics, 38–39
differential diagnosis
other causes of abortion, 37
other causes of signs of labor or abdominal discomfort, 37
other causes of vulvar discharge, 38
etiology/pathophysiology, 32–33, 35–36
fetal abnormalities, 33
iatrogenic causes, 35
luteal insufficiency/early CL regression, 33
maternal abnormalities, 35
placental abnormalities, 33
trauma, 35
twins, 32
xenobiotics, 35
expected course and prognosis, 42
fetal abnormalities, 40
gross appearance of avillous chorionic membrane at point of contact between fetal membranes of aborted twins, 32
pathological findings, twins, 39
patient monitoring, 41–42
placental abnormalities, 39
possible complications, 42
signalment/history, 36
historical findings, 36
risk factors, 36
synonyms/closely related conditions, 42–43
therapeutics, 40–41
activity, 41
alternative drugs, 40
appropriate health care, 40
diet, 41
drug(s) of choice, 40
nursing care, 41
precautions/interactions, 40
surgical considerations, 41
Abortion storm, 19, 567
ABO systems, RBC testing and, 713
Abscesses, mastitis and, 336
Accucell equine photometer, for determining equine semen concentration, 786
ACD. See Acid citrate dextrose
ACE. See Angiotensin-converting enzyme
Acepromazine, pyometra and, 503
Acepromazine maleate, penile paralysis and, 724
Acetylcysteine, 893
Acetylcysteine enema, 904
Acid citrate dextrose, parentage testing and, 714
Acidosis, 865
Actinobacillus calcoaceticus, seminal vesiculitis and, 829
Acquired inguinal herniation, 692
Acremonium coenophialum. See Neotyphodium coenophialum
Acrosomal regions/heads, abnormal, 801
Acrosome abnormal, 782
detached, 787, 803
knobbed, 787, 803
normal, 803
swollen, 803
ACTH, parturition and, 387
Actinobacillus equuli, 1029, 1064
Actinobacillus spp. bacterial pneumonia and, 1068
spontaneous, infectious abortion and, 19
Actinomyces spp., pyometra and, 500
Active/acute endometritis, therapeutics, 229
Activity fetal evaluation and, 931
U/S assessment of, 1108
Acute bacterial placentitis, 427
Acute mastitis, 337, 338, 338
Acute renal failure, 1035
Acute renal failure, neonate, 865–868
abbreviations, 868
client education, 868
clinical features, 866
definition/overview, 865
diagnostics, pathological findings, 867
differential diagnosis, 866
Acute renal failure, neonate, (Cont.)
etiology/pathophysiology, systems affected, 865
expected course and prognosis, 868
patient monitoring, 868
prevention/avoidance, 868
signalment/history, historical findings, 866
risk factors, 866
synonyms, 868
therapeutics, precautions/interactions, 867
Acyclovir, viral pneumonia and, 1074
Adactyly, 1081
ADG. See Average daily gain
Adhesions, cervical abnormalities and, 115, 120
Advanced reproductive technologies
high-risk pregnancies/parturition and, 399
mares with chronic uterine inflammation and, 506
Adventitious placentaition, hydrops allantois/amnion and, 302
Aerobes, endometritis and, 227
Afterbirth, retained. See Retained fetal membranes
Agalactia, defined, 45, 350
Agalactia/hypogalactia, 45–49
abbreviations, 48–49
clinical features, 46
definition/overview, 45
diagnosis, 47
differential diagnosis, 46
etiology/pathology, 45
patient monitoring, 48
possible complications, 48
prevention/avoidance, 48
signalment/history, 45–46
historical findings, 46
risk factors, 45–46
systems affected, 45
therapeutics, 47–48
alternative drugs, 47–48
drug(s) of choice, 47
Agar gel immunodiffusion
abnormal scrotal enlargement and, 601
abnormal testicular size and, 614
dourine and, 672
penile paralysis and, 725
Agar plates, microbiology, endometritis and, 227
Aged mares
best breeding time for, 295
broad ligament hematoma and, 87, 90
cervical abnormalities and, 114
degenerative endometritis and, 220
dystocia and, 175
early embryonic death and, 185, 187, 192, 193
endometrial biopsy and, 210
endometrial health and cervical competence in, 431
multiple lymphatic cysts in, 461
ovarian function changes in, 384
pneumovagina and, 435
poor lactation and, 351
pyometra and, 499
vaginitis and, 577
Age of stallion
semen quality and, 796–797
spermatogenesis and, 840–841
Agglutination assay, neonatal isoerythrolysis and, 1044
Aggressive behavior, anestrus confused with, 8
AGID. See Agar gel immunodiffusion
Agouti color mutation test, 715
AHF. See Anovulatory hemorrhagic follicle
AI. See Artificial insemination
Air in vagina or uterus, 433
Air-Tite type syringe, 761
Alcohols, in extenders, 818
Alkaline phosphatase
normal range of, in stallion’s seminal plasma, 806
semen submitted for testing with, 786
Alkaloids, maternal assessment and analysis of, 952
Allantochorial echotexture, loss of, 1102, 1104
Allantochorion
placental evaluation and, 418
thickening and edema of, 953, 954
high-risk pregnancy and, 281
Allantochorionic placentaition, pregnancy maintenance by, 416
Allantochorionic pouches, description, 417
Allantoic fluid
excess, accumulation of, 298
placental evaluation and, 419
Allantoic sac, visualizing, 464
Alleles, 714
Alloantibodies, neonatal isoerythrolysis and, 1042
Alopecia
of inner thighs and hocks, pyometra and, 501
on perineum of standardbred mare with chronic pyometra, 502
Altrenogest, 65, 296
abnormal estrus intervals and, 10
anestrus and, 64
cervical abnormalities and, 121
conception failure in mares and, 140
cautionary note, 141
contraception in mare and, 154
early embryonic death and, precautions, 190
estrus and ovulation synchronization and, 243
high-risk pregnancy and, 282–283
precautions, 283–284
human exposure to, cautionary note, 65
induction of lactation and, 352
ovulation failure and, precautions/interactions with horses and humans, 373
placental insufficiency and, 424
placentitis and, 430
in pregnant mares, clitoral enlargement and, 125, 128
pregnant women and, precautions, 11
prolonged diestrus and, precautions, 488
spontaneous, infectious abortion and, 27–28
spontaneous, noninfectious abortion and, 40
suppressing estrus behavior and, 85
synchronization of ovulation and, 382
twin pregnancies and, 547
Ambiguous external genitalia, 889
American Miniature Horse Association
artificial breeding of miniature horses and, 357–358
miniature horse types defined by, 355
American Miniature Horses
fetal stress, distress, and viability in, 949
high-risk pregnancy and, 276
pregnancy length in, 386
American Quarter Horse Association, 131
AMHA. See American Miniature Horse Association
Amides, in extenders, 818
Amikacin, 231, 879
bacterial pneumonia and, 1070
meconium aspiration and, 994
omphalophlebitis and, 1054
rib fractures and, 1084
septic arthritis and, 1089
tested for use in equine semen extenders, 759
Amikacin sulfate
for cooled shipped semen, 820
in extenders, 813
inguinal herniation and, 695
seminal vesiculitis and, 830
Aminoglycosides, 231
postpartum metritis and, precautions, 456
septic arthritis and, 1089
Amnion
color change due to oxidative change, 518
placental evaluation and, 418
retained fetal membranes and, 518
torsion of, spontaneous, noninfectious abortion and, 33, 33
Amnionitis, 418
Amniotic fluid excess, accumulation of, 298
placental evaluation and, 419
Amniotic sac, stage 2, parturition, and appearance of, 389–390, 391
Amphotericin B, 231
Ampicillin, 231
Ampullae, 56, 57
defined, 834
donkey, ultrasound of, 172
of ductus deferens, 622, 625
accumulation of sperm in, 834
in stallion dual role of, 625
plugged, thick viscous ejaculate from, 836
transrectal U/S of, sperm accumulation/stagnation and, 837
of vas deferens, 166, 623, 624
Ampullar diameter, in miniature horse, 357
Ampullitis, seminal vesiculitis and, 832
Amycolatopsis spp., spontaneous, infectious abortion and, 19
Anabolic steroids anestrus and, 62
clitoral enlargement and, 125
spermatogenesis and adverse affects with, 843t
