Contents at a Glance

Introduction ................................................................................. 1

Part I: Understanding the Fundamentals of Costs .......... 7
Chapter 1: So You Want to Know about Cost Accounting.................................................................9
Chapter 2: Brushing Up on Cost Accounting Basics ....................................................................19
Chapter 3: Using Cost-Volume-Profit Analysis to Plan Your Business Results ....31
Chapter 4: Estimating Costs with Job Costing ..............................................................................47
Chapter 5: More Activity, More Cost: Activity-Based Costing ................................................65

Part II: Planning and Control ...................................... 81
Chapter 6: What’s the Plan, Stan? Budgeting for a Better Bottom Line ........................................83
Chapter 7: Constant Change: Variance Analysis ........................................................................103
Chapter 8: Focusing on Overhead Costs .......................................................................................125
Chapter 9: What’s on the Shelf? Inventory Costing .......................................................................139

Part III: Making Decisions ........................................ 159
Chapter 10: Cost Drivers and Cost Estimation Methods ...............................................................161
Chapter 11: Making Smart Business Decisions with Relevant Information ................................173
Chapter 12: Making Smart Pricing Decisions: Figuring Total Costs ...........................................193

Part IV: Allocating Costs and Resources .................... 211
Chapter 13: Analysis Methods to Improve Profitability .................................................................213
Chapter 14: Behind the Scenes: Accounting for Support Costs and Common Costs ..................231
Chapter 15: Joint Costs, Separable Costs, and Using Up the Leftovers .......................................255
Chapter 16: Tracing Similar Products with Process Costing .......................................................271

Part V: Considering Quality Issues ............................ 293
Chapter 17: What a Waste! Getting the Most from Spoilage, Scrap, and Reworked Products .................................................................295
Chapter 18: Making Smart Ordering Decisions ............................................................................317
Chapter 19: Quality: Building a Better Mousetrap ......................................................................337
Part VI: The Part of Tens ......................................................... 355
Chapter 20: Ten Common Costing Mistakes and How to Avoid Them ............357
Chapter 21: Ten Ways to Increase Profits Using Costing ..............................363

## Table of Contents

**Introduction** ........................................................................................................... 1  
About This Book ........................................................................................................... 1  
Conventions Used in This Book .................................................................................... 1  
What You’re Not to Read ............................................................................................. 2  
Foolish Assumptions .................................................................................................... 3  
How This Book Is Organized ......................................................................................... 3  
  Part I: Understanding the Fundamentals of Costs .................................................. 4  
  Part II: Planning and Control .................................................................................... 4  
  Part III: Making Decisions ....................................................................................... 4  
  Part IV: Allocating Costs and Resources ................................................................ 4  
  Part V: Considering Quality Issues ......................................................................... 5  
  Part VI: The Part of Tens ......................................................................................... 5  
Icons Used in This Book .............................................................................................. 5  
Where to Go from Here .................................................................................................. 6  

**Part I: Understanding the Fundamentals of Costs** ............................................. 7  

**Chapter 1: So You Want to Know about Cost Accounting** ................................. 9  
Comparing Accounting Methods .................................................................................... 9  
  Using management accounting .................................................................................. 11  
  Fitting in cost accounting ......................................................................................... 12  
Using Cost Accounting to Your Advantage .................................................................. 13  
  Starting with cost-benefit analysis ............................................................................ 13  
  Planning your work: Budgeting ................................................................................ 14  
  Controlling your costs ............................................................................................. 14  
  Setting a price .......................................................................................................... 15  
  Improving going forward ......................................................................................... 16  

**Chapter 2: Brushing Up on Cost Accounting Basics** ........................................... 19  
Understanding the Big Four Terms ............................................................................. 19  
  Comparing direct and indirect costs ........................................................................ 19  
  Mulling over fixed and variable costs ...................................................................... 21  
  Fitting the costs together ......................................................................................... 22  
Covering Costs in Different Industries ........................................................................ 23  
  Reviewing manufacturing costs ............................................................................... 24  
  Considering costs for retailers ................................................................................. 24  
  Finding costs most companies incur ....................................................................... 24  
Why Are You Spending?: Cost Drivers ....................................................................... 25  
  Pushing equipment too hard and relevant range ...................................................... 25  
  Previewing inventoriable costs ............................................................................... 26
Following the Rules of the Cost Accounting Road ........................................ 27
Deciding on accrual basis or cash basis ....................................................... 27
Finishing with conservatism ....................................................................... 29

**Chapter 3: Using Cost-Volume-Profit Analysis to Plan Your Business Results** .................................................. 31
Understanding How Cost-Volume-Profit Analysis Works ............................. 32
Calculating the breakeven point .................................................................. 32
Financial losses: The crash of your cash .................................................... 34
Contribution margin: Covering fixed costs .................................................. 34
Lowering the breakeven point to reach profitability sooner ....................... 35
Target net income: Setting the profit goal ................................................. 36
Using operating leverage ............................................................................. 38
Timing is everything when it comes to costs ............................................. 39
Using Cost-Volume-Profit Analysis to Make Savvy Business Decisions ... 40
Pitching the product: Deciding to advertise .............................................. 40
Pricing magic: Lowering your price without losing your profit .................. 41
Sales mix: Combining the results of two products .................................... 43
The Tax Man Cometh, the Profits Goeth .................................................... 45
Understanding pre-tax dollars .................................................................... 45
Adjusting target net income for income taxes ........................................... 46

**Chapter 4: Estimating Costs with Job Costing** .......................................... 47
Understanding How Job Costing Works ...................................................... 48
Cost objects: The sponges that absorb money .......................................... 49
Charging customers for direct and indirect costs ....................................... 50
Implementing job costing in manufacturing: An example ......................... 51
Taking a Closer Look at Indirect Costs using Normal Costing .................. 55
Budgeting for indirect costs ....................................................................... 56
Following a normal job costing system ...................................................... 57
Following the Flow of Costs through a Manufacturing System .................. 58
Control starts with control accounts ......................................................... 58
Explaining the debit and credit process .................................................... 59
Walking through a manufacturing cost example ...................................... 61
Applying the methodology to other control accounts ............................... 63

**Chapter 5: More Activity, More Cost: Activity-Based Costing** .................... 65
Avoiding the Slippery Peanut Butter Costing Slope .................................. 65
Recognizing a single indirect cost allocation ............................................. 66
A fly in the peanut butter: Dealing with different levels of client activity ................................................................. 67
Missing the mark: Undercosting and overcosting ..................................... 69
Designing an Activity-Based Costing System ........................................... 71
Refining your approach ............................................................................. 71
Grouping costs using a cost hierarchy ..................................................... 72
Testing your ABC design .......................................................................... 73
# Table of Contents

Using Activity-Based Costing to Compute Total Cost, Profit, and Sale Price ........................................................... 76
  Allocating indirect costs evenly by product ........................................ 77
  Analyzing and realocating cost activities ........................................ 78
  Changing allocations to cost pools .................................................. 79
  Changing prices after ABC ............................................................. 80

## Part II: Planning and Control ............................................. 81

### Chapter 6: What's the Plan, Stan? Budgeting for a Better Bottom Line ....................................................... 83

  Brushing Up on Budgeting Basics .................................................. 83
  Seeing the master budget and its component parts ....................... 84
  Why budgeting is important ......................................................... 85
  Planning strategically ................................................................. 86

  Planning How to Plan: Factors That Impact Your Budgeting Process ... 87
  Experience counts ........................................................................ 87
  Timing is everything ..................................................................... 88
  People get you headed in the right direction ............................... 89
  Sales projections pay off .............................................................. 89

  The Nuts and Bolts (and Washers) of Budgeting ........................... 91
  Understanding the budgeting financials ....................................... 91
  Reviewing revenue and production budgets ................................ 94

  Budgeting with Cash Accounting or Accrual Accounting .............. 97
  Cash basis accounting: Using your checkbook to budget .......... 97
  I accrue, you accrue, we all accrue with accrual accounting ...... 99

  Budgeting to Produce the Income Statement and Balance Sheet ...... 100
  The well-balanced balance sheet ................................................ 100
  The incredible income statement ................................................. 101

### Chapter 7: Constant Change: Variance Analysis .................. 103

  Variance Analysis and Budgeting ............................................... 104
  Using management by exception to recognize large variances... 104
  Seeing the problem in using a static budget ............................. 105
  Opting for a flexible budget ....................................................... 109
  Investigating budget variances .................................................. 111

  Analyzing in Material Price and Efficiency Variances ................. 113
  Applying price variances to direct materials ............................ 114
  Applying efficiency variances to direct materials ..................... 114
  Implementing price variances for direct labor ......................... 116
  Sizing up efficiency variances for direct labor ....................... 117

  Using Your Findings to Make Decisions .................................... 118
  Following up on variances ......................................................... 118
  Judging the effectiveness of your employees .......................... 120
  Tying supply chain concepts to variance analysis .................. 122
  Attaching ABC costing concepts to variance analysis ............ 122
Chapter 8: Focusing on Overhead Costs ................................. 125
   Using Cost Allocation to Minimize Overhead .................. 125
   Paying for the Security Guard: Fixed Overhead Costs ... 126
   Planning fixed overhead costs .................................... 127
   Allocating fixed overhead costs .................................. 128
   Assessing potential causes of fixed overhead variances ... 131
   Those Vexing Variable Manufacturing Costs ............... 131
   Working with variable overhead costs ......................... 131
   Implementing variance analysis .................................. 134

Chapter 9: What’s on the Shelf? Inventory Costing .............. 139
   Working with Inventoriable Costs ............................... 140
      Using the matching principle to calculate profit on sale ... 140
      Erring on the conservative side ................................ 142
   Costing Methods for Inventory .................................... 142
      Using the first-in, first-out (FIFO) method ................. 144
      Accounting with the last-in, first-out (LIFO) method ... 145
      Weighing the merits of weighted-average cost ........... 146
      Considering specific identification method .............. 147
      Analyzing profit using FIFO and LIFO ..................... 147
   Using Variable and Absorption Costing to Allocate
      Fixed Manufacturing Costs ....................................... 149
      Defining period costs and product costs ................. 150
      Applying variable and absorption costing ............... 151
   Relating Capacity Issues to Inventory .......................... 153
      Reviewing theoretical and practical capacity ........... 153
      Using normal and master-budget capacity ............... 154
      Choosing a capacity level ...................................... 156

Part III: Making Decisions .............................................. 159

Chapter 10: Cost Drivers and Cost Estimation Methods .......... 161
   Working with Cost Behavior ....................................... 161
      Understanding linear and nonlinear cost functions ... 162
      Discovering how cost drivers determine total costs ... 163
   Considering Cost Estimation Methods ......................... 164
      Walking through the industrial engineering method ... 164
      Agreeing on the conference method ....................... 164
      Reviewing the account analysis method ................. 165
      Checking out the quantitative analysis method ........ 166
      Choosing a cost estimation method ....................... 169
   Exploring Nonlinear Cost Functions ............................ 171
      Changing cost functions and slope coefficients ...... 171
      Understanding the impact of quantity discounts ....... 171
      Assessing the Impact of Learning Curves .............. 172
### Chapter 11: Making Smart Business Decisions with Relevant Information .......................... 173
- Navigating the Geography of Relevance .......................................................... 174
- Introducing the decision model ............................................................................ 174
- Applying a model to an equipment decision .................................................... 175
- Considering relevant qualitative factors in decision-making ............................ 178
- Special Orders Don’t Upset Us, Do They? ........................................................ 179
- Deciding between Outsourcing and In-house Production .................................. 181
- Weighing opportunity costs .............................................................................. 184
- Contemplating the carrying cost of inventory ................................................... 186
- Maximizing Profit When Capacity Is Limited .................................................... 188
- Managing capacity and product mix .................................................................. 188
- Analyzing customer profit and capacity ............................................................. 190

### Chapter 12: Making Smart Pricing Decisions: Figuring Total Costs ...................... 193
- Understanding Influences on Prices ................................................................. 193
  - Customers ........................................................................................................ 194
  - Competitors ................................................................................................... 194
  - Suppliers ......................................................................................................... 194
  - Special orders ................................................................................................. 195
- Pricing for Profits Down the Road ................................................................. 197
  - Reviewing market-based and cost-based pricing ........................................... 197
  - Aiming at the target: Target costing ............................................................. 198
- Arriving at a Reasonable Profit ........................................................................... 202
  - Using cost-plus pricing .................................................................................. 202
  - Using product life-cycle budgeting .............................................................. 204

### Part IV: Allocating Costs and Resources .............................................. 211

### Chapter 13: Analysis Methods to Improve Profitability ................................. 213
- Processing Cost Allocation ................................................................................ 213
  - Why bother? Purposes of cost allocation ..................................................... 214
  - Justifying cost allocation decisions .............................................................. 215
- Implementing Cost Allocation .......................................................................... 216
  - Using cost hierarchy to allocate costs .......................................................... 216
  - Allocating tricky corporate costs .................................................................. 217
  - Keeping track of customer revenues and costs ............................................ 222
- Going Over Sales Mix and Sales Quantity Variances ..................................... 225
  - Remembering variances and contribution margin ...................................... 225
  - Getting the story about sales mix variance ................................................. 226
  - Calculating sales quantity variance .............................................................. 229
Chapter 14: Behind the Scenes: Accounting for Support Costs and Common Costs ........................................ 231
Not Everyone Generates Revenue: Support Costs .............................................. 232
Introducing single rate cost allocation method .............................................. 232
Checking out dual rate cost allocations ...................................................... 235
Using practical capacity to determine cost allocation rates ........................ 237
Going Over Variance Analysis and Department Costs .................................. 240
Choosing budgeted versus actual rate of usage .............................................. 241
Implications for the rate of usage selected ................................................. 244
Allocating to multiple departments .............................................................. 245
Focusing on Common Costs .......................................................................... 249
Mulling over stand-alone cost allocation ...................................................... 249
Stepping up to incremental cost allocation ................................................. 251
Making a Commitment: Contracts ............................................................... 251
Contracting with the government ................................................................. 251
Thinking about reasonable and fair costs .................................................. 252

Chapter 15: Joint Costs, Separable Costs, and Using Up the Leftovers .......... 255
Working with Joint Costs ........................................................................... 256
Explaining joint cost terms ....................................................................... 256
Appreciating the importance of allocating joint costs ................................. 257
Considering joint cost allocation methods .................................................... 258
Continuing Production: Computing Separable Costs After Splitoff .......... 260
Exploring the net realizable value method .................................................... 261
Introducing the constant gross margin percentage NRV method .................. 263
Choosing a Joint Cost Allocation Method .................................................... 267
Making the case for sales value at splitoff ................................................. 268
 Falling back to other joint costing methods ............................................... 268
Deciding to sell or process further ............................................................. 269
Holding a Garage Sale: Making the Most of Byproducts ............................. 270

Chapter 16: Tracing Similar Products with Process Costing ...................... 271
Process Costing: Presenting the Basic Approach .......................................... 272
Leading off with direct material costs ......................................................... 272
Following up with conversion costs ............................................................. 273
Sitting on the Factory Floor: Dealing with Work in Process ......................... 273
Using Equivalent Units to Compare Apples to Apples ............................... 274
Counting the units for equivalent units ....................................................... 274
Hunting down the total costs of production ................................................ 275
Putting units and costs together ................................................................. 276
Seeing different percentages of completion .............................................. 279
Using the Weighted Average Method for Process Costing ....................... 282
Handling beginning work in process ......................................................... 283
Continuing with equivalent units ............................................................... 283

Chapter 19: Quality: Building a Better Mousetrap ...................... 337
  Considering Quality Benefits and Costs .......................................... 338
  Listing the benefits of quality .......................................................... 338
  Listing the costs of quality ............................................................... 339
  Taking steps to ensure quality ......................................................... 340
Compiling a Cost of Quality Report .................................................... 341
Putting Quality Practices in Place .......................................................... 342
  Quality in job costing ........................................................................ 343
  Taking a spin through inventory ..................................................... 343
Customer Satisfaction: Measuring and Improving It ....................... 344
  Customer satisfaction’s non-financial measurements .................. 345
  Is measuring customer satisfaction worth the effort? ................. 347
Doing More in Less Time ................................................................. 347
  Analyzing performance related to time ............................................. 348
  Calculating average waiting time ..................................................... 349
  Adding in manufacturing lead-time ................................................. 350
Eliminating the Constraint of the Bottleneck ................................... 351
  Fewer bottlenecks mean increased contribution margin ............. 351
  Clearing bottlenecks ........................................................................ 352

Part VI: The Part of Tens ................................................................. 355

Chapter 20: Ten Common Costing Mistakes and How to Avoid Them .................................................. 357
  Pricing a Product Incorrectly .............................................................. 357
  Listing Fixed Costs As Variable Costs ............................................. 357
  Labeling Period Costs As Product Costs .......................................... 358
  Misusing Target Net Income ............................................................ 358
  Forgetting About Taxes ..................................................................... 359
  Assigning Costs to the Wrong Product ............................................. 359
  Not Reviewing Variances Correctly .................................................. 360
  Redlining: Pushing Production Activity Above Relevant Range ...... 360
  Ignoring the Timing of Costs ........................................................... 361
  Not Implementing Activity-Based Costing ........................................ 361

Chapter 21: Ten Ways to Increase Profits Using Costing ................ 363
  Selling More Of The Right Products ................................................ 363
  Implementing Sales Mix Analysis to Increase Total Profits .......... 363
  Building a Higher Margin of Safety .................................................. 364
  Deciding How Much You Need: Production and Scheduling Issues .... 364
  Who Does What: Handling Costs and Employee Issues ............... 364
  Reducing and Managing Scrap ......................................................... 365
  Moving It off the Shelf: Inventory Issues ........................................ 365
  Effectively Taking Special Orders ................................................... 365
  Making Accurate Cost Allocations .................................................. 366
  Addressing the Issue of Spoilage ...................................................... 366

Index ................................................................................................. 367
