Symbols

~ Syntax, 256

A

absolute expiration date, 598
absolute URLs, 254, 256–257
abstract classes, 199
access, user
  authorization rules, 605
  blocked to Management folder, 632
  and identity authentication, 604
  and rule satisfaction, 635
access modifiers, 178, 200
AccessKey property, 114
accounts
  managing with WSAT, 628–632
  signup pages, 607–612
active item tracking, 406
Active Server Pages (ASP), 1
ActiveStepIndex, 129
Add New Item dialog, 210, 228
addClass method, 404
<a> element, 645, 651
Add/Edit pages, 579, 588
AddEditReview.aspx page, 580
ADO.NET Entity Framework
  for data access, 580
  Data Model, 44, 552
  defined, 552
  introduction to, 500–501
  lazy loading, 505
  LINQ overlap with, 499
  LINQ to, 499–500
  mapping data models, 501
  practical tips for, 550
  use of data controls with, 517
  use of LINQ, 497–498
AdRotator control, 131
Advanced SQL Generation Options, 474
advertisers' cookies, 239
<a> element, 254, 281
aggregation operators, 509
Ajax. see also ASP.NET AJAX
code in form animation, 412
creating flicker-free pages with, 358–362
defined, 383
Extensions, 134
framework, 351
ScriptManager control, 356–357, 372–373
spelling of, 350
summary of, 382
UpdatePanel control, 352–356
UpdateProgress control, 358
web services, 363–378
AjaxFrameworkMode property, 357
albums, photo
  inserting new, 524
  login controls to manage, 609
  photo deletion from, 637
  profile of album creator, 673
allowAnonymous attribute

–

ASP.NET Instant Results

user creation of, 518
user management of, 665–670
viewing photos in, 544
allowAnonymous attribute, 646
AllowCustomErrorsRedirect property, 356
AlternateText property, 310
<AlternatingItemTemplate>, 525
AlternatingRowStyle, 556
And operator, 164
AND operator, 430
 AndAlso operator, 164
animate() effect, 409
animation
contact form, 410–414
jQuery, 399, 409
anonymous identification, 670–671
anonymous profiles, 671–672
anonymous types, 511–517, 552
ANSI 92 SQL standard, 425
App_Code folder, 180, 221
App_Data folder, 754
AppConfiguration class, 737
AppendAllText method, 340
Application Mapping, 10
Application Pool, 466, 766
application services, 642
applicationName attribute, 625
ApplicationPoolIdentity, 753
Apply Styles window, 87, 98, 100
args.AnonymousID, 671
arithmetic operators, 158
ArrayList, 155, 156
arrays, 153–154
<article> element, 12
.ascx extension, 286
Combine with next aside element, 84
<aside> element, 12
ASMX web services, 364
<asp:ListItem> elements, 122
ASP.NET

App_Code folder, 401
application services, 605–607
authentication mechanism, 613
caching mechanism, 590
code compilation, 146
control life cycle, 564–569
controls to render jQuery, 418
database use, 421
development, 1
4.0, 218
4.5, 10–11, 112, 517, 606, 750
informational windows, 22–23
installing/configuring, 748–749
markup, 16
1.0, 1
page life cycle, 219–220
pre-2.0 user controls, 285
previous versions, 2
Profile service, 644–645
programmatic redirection, 276
resources on, 764–765
role of server controls in, 107
routing support, 281
2.0, 605
validation controls, 312
web page tracing, 718–725
website, 765
ASP.NET AJAX, 349–383. see also Ajax
creating flicker-free pages with, 352–357
exercises with, 382
Extensions Timer control, 362–363
introduction to, 350–351
pageLoad, 413
practical tips for, 381
spelling of, 350
summary of, 382
web service creation, 369
ASP.NET Dynamic Data Entities
Web Sites, 36
ASP.NET Instant Results, 549
ASP.NET Server Controls, 107–144
  applying CSS to, 103
  in ASP.NET 4.5, 10
  common properties of, 113–116
  creating a web page with, 20
  defining on a page, 113
  EnableViewState property, 140
  exercises with, 142
  introduction to, 108–112
  for login page, 611
  markup, 16
  on master pages, 212
  practical tips for, 141–142
  state engine, 134–141
  summary of, 142
  types of, 116–132
  use with LINQ queries, 517–550
ASP.NET web applications. see web applications
ASP.NET Web Forms Site, 36
ASP.NET Web Site (Razor v1 / Razor v2), 36
AspNetCompatibilityRequirements
  attribute, 365
<asp:Table> control, 132
ASPX pages
  accessibility of, 603
  AddEditReview.aspx page, 580
  creating templates for, 225
  CSS on, 67
  display process, 9
  dynamic files, 711
  events raised by, 564
  Response property, 276
  and review retrieval, 664
  SQL for database access in, 421
  testing code examples with, 146
  user control similarities with, 286
  assemblies, 745, 766
  assignment operators, 158
  asynchronous calls, 349, 377
Asynchronous JavaScript And XML. see Ajax
AsyncPostBackErrorMessage property, 357
@Register directive, 290, 294, 310
duplicate of <a> element
Atkinson, Paul, 436
AttachDbFileName, 466
Attachment class, 334
[attribute] filter, 403
attr(attributeName, value) method, 405
attr(attributeName) method, 405
attributes
  <add> element, 645
  defined, 365, 383
  HTML, 14, 15, 60, 319
  Membership provider, 624
  tracing, 720
[attribute=value] filter, 403
<audio> element, 14
authentication, identity, 604–605, 642
authentication element, 611
authorization rules, 605, 642
Authorized column, 445
AutoID property, 296
automatic properties, 193
AutoPostBack, 125, 242, 548
Autos window, 704
Average operator, 509
a:visited selector, 92
Aziz, Atif, 697

B

BackColor property, 114, 555
backing variables, 191
backward-compatibility, 386
banner display, 288, 298
base pages
  creating, 221–225
  defined, 252
implementing, 221

inheritance from, 218–219

Basic Settings mode, 17

BegASPNET folder, 37

Beginning ASP.NET Web Pages with WebMatrix, 36

Beginning CSS: Cascading Style Sheets for Web Design (Pouncey and York), 87

Beginning Microsoft SQL Server 2012 Programming (Atkinson and Vieira), 436

Beginning Microsoft Visual C#, 146

Beginning Visual Basic 2012, 146

Beginning Web Programming with HTML, XHTML, and CSS, 16

BETWEEN operator, 430

bigint data type, 442

binary/varbinary data type, 442

Bind, 491

binding

control, 465
data, 465, 478, 491
expression, 478
outer Repeater, 665
two-way, 535

Bind(PropertyName), 535, 538

bit data type, 441

bloat, page, 559, 562

Block Format, 55

<body> element, 12, 396

Body column, 444

BodyContent, 7

Boolean types, 147, 151

boolean values, 513

border, 78

border property, 94

BorderColor property, 114, 555

BorderStyle property, 114, 555

BorderWidth property, 114, 555

bound fields, 461

BoundField, 473

box model, CSS, 78

breadcrumb, 259, 274–276

break loop, 176

breakpoints

client-side JavaScript, 710
defined, 698, 728
execution of, 708
hitting and code stoppage, 701

Breakpoints window, 704

browsers

directing tools, 354, 709–712
image re-sizing, 549
interaction with the server, 10, 350
sending cookies to, 238
settings for cookies, 242
viewing pages in different, 92
work with outdated CSS, 360

bulleted lists, 60

BulletedList control, 118, 513

bundling, 738–740

Button control

adding a, 109–113

CommandName, 534

postback from, 138

skin for, 247–248

Toolbox, 21

:button filter, 403

ButtonField, 473

buttons, 20

C

access modifiers, 200
array instantiation, 153
attributes, 365
caching with, 593
cross-language communication, 149
declaring variables in, 147
default examples as given in, 50
LINQ syntax, 498
methods, 178
parameter lists, 179
resources on, 146
as strongly typed, 506
type casting, 152
VB.NET code similarities, 53
web application projects with, 38
cache dependency, 590
cache invalidation, 590
cached copies, 67
caching, 589–599
API, 594–599
derived, 589, 602
drawbacks of, 589–590
invalidation, 590, 602
options, 590–594
output, 502, 591
calculator
creating, 170–173
optimizing, 181–183
Calculator class, 379
Calculator instance, 183
Calendar control, 131
Call Stack window, 704
callback method, 366
CallerMemberName attribute, 567
camel case, 148
case, type
camel case, 148
Pascal case, 366
case sensitivity
do C, 69, 70
JavaScript, 375
do jQuery, 393
and SQL language, 429
case statement, 173
casting data types, 151–152
Catch block, 683, 688
C:\BegASPNET\Site, 37, 39

centralized base pages, 218–219
chaining, 420
ChangePassword control, 621
char/nchar data type, 441
Chart control, 456
CheckBox control, 135
:checkbox filter, 403
CheckBoxField, 473
CheckBoxList control, 122, 656, 660
child elements, 259, 260
ChildrenAsTriggers property, 355
class attributes, 268
Class selector, 73, 398, 400
classes
abstract, 199
App_Code folder for files of, 180
defined, 151, 190
event argument, 201
EventArgs, 574
files, 43, 146
inheritance in, 197
instances of, 183
namespaces of, 186
with properties from Web.config file, 733
static methods, 379
System.Net.Mail namespace, 334
classic ASP, 1
Clear Styles button, 99
click events, 396, 405
client IDs
controls, 217
passing to JavaScript, 331
understanding/managing, 295
client side
Ajax script library, 349
code, 373–378, 379, 709–712
JavaScript files, 372
page communication with web service,
369
validation, 314, 327, 347
ClientId property, 330
ClientIdMode property, 218, 296, 331
ClientIdRowSuffix property, 455

code
  added to Toolbox, 26
  addition of handler code to, 125
  aid IntelliSense, 51
  for anonymous profile cleanup, 672
BodyContent, 7–8
bugs in, 680
calling services from client-side, 365–366
Code Behind vs. inline, 49
compilation, 146
for cookies, 238
effects on page display, 10
executing, 700
experimenting with, 146
files, 43
hand-coding data access, 579–588
hard-coded settings, 730–731
highlighted, 224
HTML. see HTML (HyperText Markup Language)
JavaScript shortcoming, 385
jQuery, 392, 396, 406, 408
moving in debugged, 701–702
organizing, 177–188
style sheet, 72
for text formatting, 57
typos in, 242
using minimal, 203
Code Behind files
  adding to site, 49–53
  caching code, 598
  in code compilation, 146
  code handler addition in, 125
  hand-coding, 585
  vs. inline, 49, 62
  namespace viewing through, 184
  storage of class, 504
Code Only profile, 17
code snippets
  ease of adding CSS, 67
  for inserting validation controls, 315
  for linking web pages, 62
  LoginView control, 614
  rules, 71
  usefulness of, 68
CodeBehind.aspx page, 51
CodeInline.aspx, 52

  configuring, 473
  ID storage of user profile, 651
  styling, 562
Combined selector, 73, 398, 400
CommandField column, 461, 473
CommandName, 534
commands
  keyboard shortcuts for, 27
  package, 389
comments
  C#, 186
  VB.NET, 186
  CSS, 90
  HTML, 14
  writing, 186–188, 203
Common Type System (CTS), 149
CompareValidator control, 322
comparison operators, 161
compatibility, backward, 161
compilation
  code, 146
  errors, 680
  recompilation, 649
compiler, 680
complex events, 564
CompositeScript property, 357
concatenation operators, 163
conditions, 157
confirmation email, 619–621
connection strings, 465, 495, 611, 650
ConnectionString attribute, 523
connectionStringName attribute, 624
constructors, 195–197
contact form animation, 410–414
ContactForm user control, 341–345
ContactForm.ascx, 315, 358
container controls, 122, 143
:contains(text) filter, 403
content
  HTML tags for rendering, 11
  personalized, 643
  user controls to manage, 286
Content block, 401
Content control, 216, 218
Content Delivery Network (CDN), 387, 392
content pages
  adding user controls to, 290–293
  ContentPlaceHolder, 212–215
  defined, 208, 252
  user controls to manage, 285
ContentPlaceHolder control, 211–212, 216, 218, 398
ContentTemplate property, 355
ContextTypeName property, 518
Continue For loop, 177
continue loop, 177
ControlParameter, 466
controls. see also ASP.NET Server Controls;
data controls
  bind, 465
  client ID of, 217
  ClientIDMode property, 296
  ContactForm user, 341–345
  content, 212
data source, 456, 494, 495, 574–579, 592
events, 572
formatting with styles, 554–555
hand-coding form, 585
HTML vs. Standard, 132–133
life cycle of, 564–569
login. see login controls
relative URLs in server-side, 256
state storage for, 135
style declarations, 563
user. see user controls
using navigation, 257–276
validation, 313–314
and View State reliance, 140
Web.sitemap file for, 258
Controls folder, 46
ControlsDemo.aspx page, 25
ControlToCompare property, 323
ControlToValidate property, 314, 317, 320, 654
Convert class, 151
converting data types, 150–152
CookieParameter, 466
cookies
  added to debugging code, 697
  authentication, 612
