# CONTENTS

Preface ix  
Acknowledgments xi  

1 Introduction to Practical Functional Group Synthesis 1  
1.1 General Approaches for Designing Syntheses, 1  
1.2 New Versions of “Classic” Organic Reactions, 6  
1.3 Solvent Selection and Solvent-Free Reactions, 7  
1.4 Operational Simplicity, 11  
1.5 Metal-Catalyzed Transformations, 12  
1.6 Organocatalysis, 16  
1.7 Microwave- and Ultrasound-Assisted Chemistry, 17  
1.8 Sustainability, 25  
1.9 Asymmetric Synthesis, 32  
References, 33  

2 Preparation of Alcohols, Ethers, and Related Compounds 37  
2.1 Preparation of Alcohols, Ethers, and Related Compounds through the Formation of Oxygen–Carbon(sp³) Bonds, 37  
2.2 Preparation of Phenols, Aryl Ethers, and Related Compounds through the Formation of Oxygen–Carbon(sp²) Bonds, 57  
2.3 Preparation of Vinyl Ethers and Related Compounds through the Formation of Oxygen–Carbon(sp²) Bonds, 84  
2.4 Preparation of Alkynyl Ethers and Related Compounds through the Formation of Oxygen–Carbon(sp) Bonds, 114  
References, 117
3 Synthesis of Amines, Amides, and Related Compounds

Alkylamines, 123
3.1 Synthesis of Alkylamines and Related Compounds through Nitrogen–Carbon(sp³) Bond-Forming Reactions, 123
3.2 Synthesis of Arylamines and Related Compounds through Nitrogen–Carbon(sp²) Bond-Forming Reactions, 150
3.3 Synthesis of Vinylamines and Related Compounds through Nitrogen–Carbon(sp²) Bond-Forming Reactions, 191
3.4 Synthesis of Ynamides and Related Compounds through Nitrogen–Carbon(sp) Bond-Forming Reactions, 207
References, 213

4 Synthesis of organophosphines, Phosphonates, and Related Compounds

4.1 Introduction to the Synthesis of Organophosphorus Compounds Generated through the Formation of Phosphorus–Carbon Bonds, 219
4.2 Synthesis of Alkylphosphines and Related Compounds through the Formation of Phosphorus–Carbon(sp³) Bonds, 220
4.3 Synthesis of Arylphosphines and Related Compounds through the Formation of Phosphorus–Carbon(sp²) Bonds, 338
4.4 Synthesis of Vinylphosphines and Related Compounds through the Formation of Phosphorus–Carbon(sp²) Bonds, 398
4.5 Synthesis of Alkynylphosphines and Related Compounds through the Formation of Phosphorus–Carbon(sp) Bonds, 441
References, 454

5 Synthesis of Thioethers, Sulfones, and Related Compounds

5.1 Synthesis of Thioethers and Related Compounds through the Formation of Sulfur–Carbon(sp³) Bonds, 471
5.2 Synthesis of Aryl Thioethers and Related Compounds through the Formation of Sulfur–Carbon(sp³) Bonds, 481
5.3 Synthesis of Vinyl Thioethers and Related Compounds through the Formation of Sulfur–Carbon(sp²) Bonds, 498
5.4 Synthesis of Thioethers and Related Compounds through the Formation of Sulfur–Carbon(sp) Bonds, 506
References, 510

6 Synthesis of organoboronic Acids, organoboronates, and Related Compounds

6.1 Synthesis of Alkylboronates and Related Compounds through the Formation of Boron–Carbon(sp³) Bonds, 515
6.2 Synthesis of Arylboronates and Related Compounds through the Formation of Boron–Carbon(sp²) Bonds, 526
6.3 Synthesis of Vinylboronates and Related Compounds through the Formation of Boron–Carbon(sp²) Bonds, 538
6.4 Synthesis of Alkynylboronates and Related Compounds through the Formation of Boron–Carbon(sp) Bonds, 549
References, 552
7 Synthesis of Organohalides 557

7.1 Synthesis of Alkyl Halides through the Formation of Halogen–Carbon(sp³) Bonds, 557
7.2 Synthesis of Aryl Halides through the Formation of Halogen–Carbon(sp²) Bonds, 590
7.3 Synthesis of Vinyl Halides through the Formation of Halogen–Carbon(sp²) Bonds, 628
7.4 Synthesis of Alkynyl Halides through the Formation of Halogen–Carbon(sp) Bonds, 655

References, 670
