Index

resist printing (Continued)
  sulphamic acid, 409–411
  Thiotan WS, 412
reverse tippiness, 88
role of fibre structure in wool dyeing, 60–66
salt linkages, 11, 34
scouring, 2, 99
  non-ionic surfactants, 100
  Siroscour Process, 100
  solvents, 100
S-cysteinyl DOPA, 362
S-cysteinyl dopaquinone, 362
semipermanent hair dyes, 375–384
  acid and basic dyes, 375
  anthraquinone dyes, 375
  application, 383–384
  cationic dyes, 382
  nitro dyes, 375–383
  nonionic derivatives, 381
tone-on-tone colouring, 375, 383
sequestering agents, 96
Sercurlana, 397, 401, 425, 275
serine, 4, 7, 8, 12, 13, 17, 18
shrink-resist processing, 102–108
  cationic surfactant plus sulphite, 107
  chlorine-resin processes, 80, 87, 94, 103, 262, 396
effect on dyeing, 103
garment form, 105–106
piece form, 106–107
plasma, 107
potassium t-butoxide, 107
top form, 102–105
Sirolan LTD Process, 92
sodium bisulphite, 131, 139, 142, 143, 145
sodium borohydride, 139
sodium dithionite, 139, 371
sodium dodecyl sulphate, 18
sodium formaldehyde sulphoxylate, 139, 405–407
sodium hydrosulphite, see sodium dithionite
sodium thiosulphate, 94
solvent assisted dyeing, 91
spin-lubricants, 100
sterols, 13
stilbene quinones, 150, 151
structure and morphology of human hair, 359, 360
substantivity of dyes, 50, 51, 68
sunlight, 146, 148
Syntans, 77, 88
Synthappret BAP, 65, 107, 397, 401, 425
tactile properties, 3, 16
temporary hair dyes, 384–386
  application, 386
  colour rinse, 384
dyes used, 384
tetraacetylthylene diamine (TAED), 143
thiol-disulphide interchange, 117, 120, 276, 278
thiourea, 59
dioxide, 139, 140, 405–407
threonine, 4, 7, 8, 12, 13, 17, 18
titration curve of wool, 48
top dyeing, 158–162
  bump tops, 158–161
  Longclose large bump tops, 160–161
  Obem Big Form machine, 161, 162
toxicology of hair dyes, 365–366
transfer printing, 421–425
  benzoylated wool, 424, 425
  sublimation, 422–424
  wet, 421, 422
trichloroacetate and trichloroacetic acid in reactive dyeing, 267, 269–270
trifunctional ligands, 231
tryptophan, 5, 7, 8, 12, 33, 135–137, 148, 150
tyrosinase, 363, 374
tyrosine, 4, 8, 12, 13, 17–19, 29, 137, 148, 149, 361, 363, 374
UV Fast W, 152
Vigoreaux printing, 161–162
  CSIRO/OMP Siroprint, 162
  Sirosteam, 162
visible chromophores in wool, 136, 137, 141, 145
wet fastness properties, 77, 82, 83, 88, 90
aftertreatments to improve, 93, 94
wettability, 16, 21
whiteness index, 134, 137
wool colour, 132–137
    compared to other fibres, 135
    heritability, 134
    improvement by selection, 134
    improvement in scour, 134
    measurement, 132
wool protective agents, 89, 90, 95, 96,
    118–120, 276–279
wool structure, 1–40
wool-water system, 44
X-ray diffraction, 3, 8
X-ray photoelectron spectroscopy, 22
yarn hank dyeing, 166–171
    Biella Fancy Yarns space dyeing
    machine, 170
cabinet machines, 168
carpet yarn dyeing, 167
circular hank carriers, 169
    Flainox carrier, 167, 168
    Galvannin robotic handling of hanks,
        169
hand and machine knitting yarn,
    167–169
Hussong machine, 166
IWS/SWA Spraychromatic space
dyeing machine, 171
Minetti robotic handling of hanks,
    169
Superba space dyeing machine, 171
Thies Hank Master, 167
yarn package dyeing, 171–178
    Biko and Eisbar package centres, 172
    Flainox tube-type machine, 175
    Obem horizontal tube machine, 176
    package preparation, 172–174
    Pegg and Thies horizontal spindle
    machines, 175
    press packing, 172, 174
    Thies and Loris Bellini vertical spindle
    machines, 175, 177
yellowing, 134–137, 145–148
    non-scourable, 135
yellowness index, 133, 137, 140–142,
    147
yellowness (Y-Z), 133–135, 137
zinc formaldehyde sulphoxylate, 139,
    405–407
