Abstinence Violation Effect (AVE), 102–5, 132, 144, 180
acamprosate, 32, 239, 243
acquired drive, 121–2
acquired emotion regulation cycles, 144
acquired need theories, 155
action stage, 81
addiction
abnormalities underlying, 241–4
addictive potential, 34, 35, 241
addict's eye view, 42–3, 60
assessment, 6, 145, 193
comprehensive theories of, 139–49
as consumption behaviour, 73
core, 141
as cost–benefit analysis, 41
definition of, 2, 4, 10–12, 15–18, 20, 229
and dependence, 12–13
and desire-based choice, 88
development of, 56–7, 235
diagnosis of, 21–3
environmental factors and, 176, 234–5, 242
experience of, 236
interventions, 244–9
and intoxication, 13–14
measuring, 21–3
and motivation, 4
myth of, 44–5
pathologies underlying, 7, 230
patterning of, 176–7
in populations, 136–9
prevalence of, 31, 36, 240–41
recovery from, 80–86, 238–9
as reflective choice, 41–60
as shift in demand curve, 73–4
susceptibility to, 31, 96, 98, 150, 175, 234, 235, 237, 242
symptoms with, 235–6
testing theory, 250–51
theories, classification of, 153, 153, 154–7
treatment of, 6, 239–40, 244, 247–9
typologies of, 98–100
usage of, 14–15
addictive drugs, effect of, 31
addictive goods, 46
aesthetic evaluations, 201
alcohol, 2, 13, 14, 19–22, 30–33, 35, 36
and dependence, 99, 242–3
expectancies, 62
use disorders, 31
alcoholics, 33, 62, 99–100, 103–6
Alcoholics Anonymous, 107
amphetamines, 32, 35, 36, 76, 119, 141, 173
amplification, 144, 207
amygdala, 121, 125
analytical reasoning, 203
analytic judgements, 68
anterior cingulate cortex (ACC), 106
antisocial personality disorder (ASPD), 99
