example, 123
frequencies, 124
–suspended body, 111–112

suspended system see also cables;
pendulum
bodies, 94, 112
chain, 124

symbols
discussion, 8
nomenclature, 9–10

Tacoma Narrows bridge, ix
tank see cavity under acoustic; sloshing
Timoshenko, S.P., ix, 134, 167
tone, 8
torque, 8, 134
torsion see also rotation
beam, 179–182
cone, 253
cylindrical shell, 238, 244
coefficient, 8, 180
kinematics
pendulums, 110, 111
ring, 185, 188
spherical cap, 251
spring–mass system, 104–107
transmission loss, 8 see also acoustic
transient vibration, 359–374 see also
beam, flexure; beam, shear;
cylindrical shell; plate
definition, 8
trajectory, 53–58
tube, 29, 151 see also added mass; beam;
pipe
tuned mass damper, 379

U–bend, 194
units
consistent (table), 11
conversions factors (table), 13–17
discussion, 11–12
example, 12
U–tube, 316

vector
cross product, 40
definition, 8
discussion, 37–41
dot product, 40
geometry (table), 37–38
line, equation of, 41
plane, equation of, 41

velocity potential see potential function

vessel see cavity under acoustic; ships;
sloshing

vibration see acoustic; forced vibration;
natural frequency; mode shape;
system of interest
definition, 8

vibration reduction, ix

virtual mass see added mass

viscosity
added mass effect, 329
definition, 8
tables of, 402–403, 406–407, 409

water see liquids

wave length, 8
wave propagation, also see acoustic,
sloshing
acoustic, 261
beam, 183–184, 262
surface, 317

wave, surface see sloshing

whirling, 81

white noise, 8

wood see solids
work, 8, 64

Young’s modulus see modulus
