A
Absentmindedness, 122, 297
Abstraction, 166, 178–179
Abstract reasoning tasks, 264
INDEX

Confidence
- decision making, 280–282
- eyewitness testimony, 99–102
- flashlight memories, 97–98
- foresight bias, 124
- hindsight bias, 282–283
- memory confidence and memory accuracy, 101–102
- confidence intervals, 276–277, 280
- confirmation bias, 265–268, 275
- conjugate reinforcement technique, 289–291
- conjunction fallacy and representativeness, 271–272
- conjunction rule, 271, 272
- connection weights, 172
- consciousness
  - blindsight, 61–62
  - definition of, 59
  - inability to bring certain thoughts into, 60
  - mind wandering, 60
  - thought suppression, 61
- consequent, logical reasoning and, 264
- consistency bias, 96, 101
- constructor view of inferences, 209
- constructive memory, 177, 179
- constructive model of memory, 178
- constructivist approach, 101
- context
  - encoding specificity and, 90–92
  - expertise and, 102–104
  - physical versus mental context and encoding specificity, 91
  - situated cognition approach to problems, 155
  - speech perception and, 39–43
  - word identification and, 33
- contextual-cues hypothesis, 300
- control processes, 70
- cooling, during infancy, 307
- Cook, S. W., 221
- correlation, 79, 101n, 102
- Cote, N., 249
- counting tasks, 74. See also Numbers
- Coupe, P., 152
- Cowan, M., 38
- Cowan, N., 48
- Cowan, Nelson, 66n
- Cox, J. R., 267
- Craighero, L., 203
- Craik, F. I. M., 87, 88, 91
- Crandall, C. S., 251
- creativity
  - definition of, 255
  - divergent production and, 255
  - extrinsic motivation and, 256–257
  - intrinsic motivation and, 256–257
  - introduction to, 255
  - nature of, 255–256
- critical period hypothesis, 232
- cross-race effect. See Own-ethnicity bias
- Crystal-ball technique, 281–282
- curves and cognitive maps, 152

D
- Dalezman, R. E., 69
- Daneman, M. F., 227
- Danziger, S., 230
- data-driven processing. See Bottom-up processing
- Davidson, D., 175
- daydreaming, 77
- dear community, 128
- deaf individuals and mental rotation, 138
- decision making. See also Problem solving
  - anchoring and adjustment heuristic, 275–277
  - availability heuristic, 272–275
  - conjunction fallacy, 271–272
  - current status, 277–278
  - definition of, 268, 277
  - ecological rationality, 277
  - framing effect, 278–280
  - hindsight bias, 282–283
  - introduction to, 268, 277
  - overconfidence about decisions, 280–282
  - political decision making, 281–282
  - psychological well-being and, 283–284
  - representativeness heuristic, 268–272
  - style of, 283–284
- declarative knowledge, 167
- deductive reasoning
  - applications in medicine, 267
  - belief-bias effect, 265–266
  - conditional reasoning, 263–264
  - confirmation bias, 265–268
  - definition of, 262–263
  - difficulty, factors, 264–265
  - introduction to, 261–262
- wason selection tasks, 266–267
- deep structure (language), 191
- default assignment, 171
- default heuristic, 277
- defining features, 162
- De Groot, A. M. B., 234
- Dell, G. S., 217
- DeLoache, J. S., 308
- demand characteristics, 145
- Dementia, 172, 231
- denying the antecedent, 263–265
- denying the consequent, 263–265
- depression, 135
- long-term memory and, 106–107
- psychotherapy and, 122
- working memory and, 80–81
- depth-of-processing approach, 87
- desirable difficulties, 116
- development. See Lifespan approach to development
- diagrams and problem solving, 241–242
- dichotic listening, 48–49
- direct-access route (to reading), 205
- directive, 224
- direct request, 224
- discourse. See also Language
  - definition of, 207–208
  - drawing inferences during reading, 209–211
  - forming integrated representation of text, 208
  - metacomprehension and, 211
  - production of, 219
- Dijkstha, R. K., 122
- dissociative, 93
- distal stimulus, 24, 25, 27
- distance
  - cognitive maps and, 150–152
  - visual imagery and, 136
- distinctive feature, 27–29
- distinctiveness, 88, 98, 103, 114–115
- distributed attention, 57–58, 57n
- distributed-practice effect, 116
- distributed processing. See Parallel distributed processing (PDP) approach
- divergent production, 255
- divided-attention task, 47–48
- Dwydikar, V. A., 151
- Dohner, S., 209, 210
- dual-process theory, 264
- dual-route approach to reading, 205
- Duncan’s candle problem, 250
- Dunham, D., 125, 181
- Dutch language, 234–235
- Dweck, Carol, 250

E
- eating Attitudes Test, 50
- eating disorders, 6, 50, 135
- Ebbinghaus, Hermann, 5, 7
- ecological rationality, 277
- ecological validity, 8, 35, 37–49, 95, 109, 121, 148, 244
- efficiency. See Theme 2 (efficiency and accuracy)
- Eggermeier, F. T., 69
- Ehrlinger, J., 125
- einstein, baby, 308
- einstein, G. O., 114
- elaboration, 88, 89, 98, 114
- elderly people
  - attention in, 300
  - cognitive slowing and, 300
  - contextual-cues hypothesis and, 300
  - dementia and, 304
  - explicit recall memory in, 299
  - implicit memory in, 299
  - long-term memory in, 298–300
  - memory in, 297–301
  - memory self-efficacy and, 304
  - memory strategies of, 297
  - mental rotation in, 138
  - metamemory in, 304–305
  - neurocognitive changes in, 300
  - prospective memory in, 298
  - recognition memory in, 299
  - working memory in, 298
- El Salvador, 273
- elves-and-goblins problem, 246, 247
- embodied cognition, 219–222
- emotion. See also headings beginning with Mood
  - accuracy in judging facial emotion, 39
  - definition of, 105
  - emotional Stroop effect, 49–50
  - infants’ perception of, 306
  - long-term memory and, 104–107
  - memory and, 104–107
  - mood compared with, 105
  - Pollyanna Principle, 105
  - recall of pleasant items, 105
- emotional Stroop task, 49–50
- empirical evidence, 4
- encoding
  - context and encoding-specificity principle, 90–92
  - definition of, 89, 87
  - levels of processing, 87–90
  - levels of processing and encoding specificity, 91–92
  - in long-term memory, 87–92
  - self-reference effect and, 88–90
- encoding-specificity principle, 90–92, 115
- England, 50, 151, 297
- English, B., 276
- English language. See Language
- episodic buffer, 79–80
- episodic memory, 86. See also Autobiographical memory; Semantic memory
- ERP. See Event-related potential (ERP) technique
- ethnicity. See and specific groups, such as Blacks; Stereotypes
- event-related potential (ERP) technique
- executive attention network, 56–57, 230
- exemplar, 164
- exemplar approach, 164–166
- exhaustive search, 244
- experimenter expectancy, 145
- expertise, 37, 102–104, 166
- explicit memory tasks, 92–94, 181, 299
of experts versus novices, 248–249
flashbulb memory, 97–98
iconic memory, 25
in infants, 288–291
integration in, 179–183
lifespan approach to development of, 288–301
pragmatic view of memory, 179
procedural memory, 86
prospective memory, 121–123, 298–300
relationship between memory confidence and memory accuracy, 101–102
retroactive memory, 121
schemata and memory selection, 174–176
sensory memory, 25, 70–71
verbatim memory, 178–179
visual sensory memory, 25, 70
Memory strategies
memory of children, 294–295
chunking, 119–120
definition of, 113, 294
distributed-practice effect (spacing effect), 116
divided attention, 113
development of, 123
of elderly people, 297
coding specificity, 115
external memory aid, 122
first-letter technique, 120
hierarchy technique, 120
imagination used with, 118–119
introduction to, 112–113
keyword method, 118
levels of processing and, 114–115
narrative technique, 120
organization used in, 119–121, 294, 295
overconfidence and, 115
practice and, 116–118
prospective memory, 121–123, 298–299, 300
self-reference effect and, 114
spacing effect, 116
summary table on, 123
testing effect, 116–117
total-time hypothesis, 116
Mental imagery, 113, 135–136.

My-platform bias, 282
My-side bias, 282
Moody Property, 101–102
Motor activities, 59, 222
Motor cortex, 139, 203
Motor imagery, 139
Multilingual speaker, 227
Multitasking, 47
Murphy, G. L., 210, 211
Myers, J. L., 210, 211
Myself bias, 282
N
Narrative, 219
Narrative technique, 120
Negative information, 264, 265
Negatives in language, 192–193
Nettenlo, N. C., 205
Network models of semantic memory, 167–172
Neural networks, 12, 169. See also Parallel distributed processing (PDP) approach
Neurolinguistics, 198, 199, 203. See also headings beginning with Language
Neurons, 12–14, 25, 26, 28, 169, 170, 172, 188, 203
Neuroscience. See Brain; Cognitive Neuroscience News media. See Media
Neuroscience of Attention, 55–56
Newcombe, Nora, 135
Newell, A., 247
Nicaragua, 118
Nieto-Castanon, A., 201
Node, 167–168, 170
Noninsight problem, 253–255
Attention-deficit/hyperactivity disorder (ADHD) and, 80–81
in children, 301–304
definition of, 124, 301
in elderly people, 304–305
on item-by-item basis, 304
and regulation of study strategies, 127
Metcalf, J., 254
Metzler, J., 137–140
Mexico, 150
Miller, D. G., 100
Miller, G. A., 73, 74
Miller, George, 66, 73, 74
Mindless reading, 60
Mind wandering, 60
Minority People. See and specific groups, such as Blacks; Stereotypes
Mirror system, 203
