Index

A, C
allocation method, 41, 53
classical scheduling, 200, 201, 215

D, F
data modeling, 12
Dijkstra dynamic distributed algorithm (D3A), 41, 42
distributed physical (dynamic) architecture, 10
DOMARTiC, 50, 51, 57, 66
dynamic car-pooling, 1, 2, 9, 10, 28, 34, 38, 49
flexible system scheduling, 202
formulation operator, 221

G, H, I
geographical network subdivision, 27
guided transport system, 78
hybrid architecture, 51, 69
integer mathematical models, 224

L, M
layered architecture, 53
macrosimulation, 82
matrix representation, 17, 18, 37, 208
matrix structure, 15
mesoscopic simulation, 82
microscopic simulation, 82, 83, 87, 131, 133, 137
modeling approaches, 83, 87
modeling car-pooling offers, 17
modeling constraints, 22
multi agent concept, 34, 50
multi-agent architecture, 38
| N, O  | network modeling, 95, 104  
|       | non-guided transport system, 77  
|       | ODA Ve (Optimized Distributed Allocation of Vehicle to users), 45, 46, 63, 68  
|       | ODCCA, 34, 38, 39, 50, 51, 52, 57, 68, 69  
|       | optimized dynamic car-pooling problem, 8  
| P, Q, R | particle swarm optimization (PSO), 73, 174, 179, 182–184, 187, 190, 191, 198, 199  
|       | place/transition Petri nets (P/T PN), 207  
|       | QUEST software, 87, 88, 93, 108  
|       | railway junction saturation problem, 201, 204  
|       | resource sharing, 230, 231, 233, 235, 237, 243, 248  
|       | route planning, 156, 160, 164, 165, 167, 168, 176  
|       | routing management, 146, 147  
|       | RTFMP (real-time fleet management problem), 140–142  
| S  | scheduling approaches, 199  
|    | classical scheduling, 200, 201, 215  
|    | flexible system scheduling, 202  
|    | scheduling Petri nets, 207  
|    | software tools, 72, 87  
| T, U, V | timed Petri nets, 137, 199, 200, 201, 206, 210, 215, 224, 248  
|       | transport plan, 71, 73, 167, 168  
|       | urban transport system, 71, 72, 74–76, 81, 83, 84, 87  
|       | vehicle routing problem, 9, 10, 71, 73, 141, 144–147, 151, 154, 157, 166, 169, 170–172, 174, 177, 178, 199, 200  
|       | DVRP (dynamic vehicle routing problem), 144, 145, 170, 174, 176, 177, 184, 187–189, 192, 198–200  
|       | vehicles’ allocation, 4
