- Angle, of vertebrae, 80–81
- Angiotensin II, 74
- Angiotensin, 70

Antibiotics
- amoxicillin, 173t, 175
- Ampicillin, 173t, 175
- aminoglycoside, 173t, 175
- b-lactam, 172
- broad spectrum, 171
- carbapenem, 173t, 174
- cephalosporin, 172, 173t, 174
- chloramphenicol, 174t, 177
- commonly used in equine medicine, summary of, 173–174t
- fluoroquinolone, 173t, 175–176
- infusion of, into uterus, 124t
- macrolide, 174t, 176
- nitroimidazole, 174t, 177
- penicillin, 172, 173t
- systemic administration of, 124t
- tetracycline, 174t, 176–177
- trimethoprim-sulfonamide, 173t, 175
- Antibodies
  - production of, 48
  - types of, 48
- Antibody levels, specific measurement of, 198–199
- Antibody titer, 213
- Antidiuretic hormone, 69, 72
- Antigen, 48
- Antimicrobials, 171–172
- bacterial infection treatment with, 171–172
- b-lactam antibiotics, 172
- Antiseptic ointments, 259, 260
- Antispasmodics, 183
- ATN. See Autonomic nervous system
- Anterior chamber, 78, 272
- Anterior pituitary, 71
- Anterior portion of the eye, 78
- Appetite, stimulating in sick horses, 38
- Arachidonic acids, 18
- Arches, of vertebrae, 80–81
- Arterioles, 51
- Arteries, 51
- Articular cartilage, 83, 84
- Arthrocentesis, 314–316, 315
- atrial premature contractions
- Apex
  - of cecum, 62
  - of tongue, 60
- Atrioventricular (AV) valves, 50
- Atria, 50
- Autosomal recessive inheritance, 177
- Autolysis, 188
- Autocrine growth factor, 177
- Axon, 64, 65
- Axon, 64, 65

Artificial vagina, 127
- Arytenoid cartilages, 54, 55
- Arytenoids, 56
- Ascarids, 138, 139
- Atipamezole (Antisedan), 220, 221
- Ascending colon, 62
- Ascending placenta, 105
- abortion in mare and, 107t
- fetal membranes from mare with, 110
- Ascending portion, of duodenum, 62
- Aseptic preparation, 251–252
- of surgical site, 250–251
- Aspartate aminotransferase, 200–201
- Aspergillus, 178
- Ataxia, evaluating for, 276
- Atlas, 81
- ATP. See Adenosine triphosphate
- Autolysis, 188
- Autocrine growth factor, 177
- Autotransfusion, 176
- Autoveterinarian (AV) valves, 50

Sensitivity testing, 216
Technical procedures, Continued
  equipment and supplies, 307–308
  evaluation of transtracheal wash fluid, 309–310
  indications for, 310
  urinary catheterization, 314
  complications with, 314
  for females, 314
  for males, 314
  whole blood transfusion, 310–314, 313
  administering blood to the patient, 313
  collecting blood from the donor, 312–313
  complications with, 313–314
  cross-matching, 311–312
  donor selection, 313
  indications for, 310–311
  wound care, 259–260
  skin grafting, 258
  Towel clamps, 254
  Stay apparatus of, 88
  tendons of, 86
  Thoracic radiography, 163
  Thoracic region, of vertebral column, 80
  Thoracic ultrasonography, 163, 330
  Thorax
  muscle function in, 85t
  transverse section of, at level of heart, 56
  Thoroughbred industry, tattoos and, 7
  Thoroughbreds, double ovulation in, 132
  Thyroid cartilage, 54, 55, 56
  Thyroid gland, 74
  Thyroid-stimulating hormone, 72
  Thyrotropin, 72
  Thyrotropin-releasing hormone, 43
  Thyroxine (T₄), 74
  Tibia, immature equine, 82
  Ticarcillin, 172
  Tidal volume, 57, 59
  Tilt table induction, 223–224
  Tissue biopsy, 207–209
  endometrial biopsy, 208
  intestinal biopsy, 209
  liver biopsy, 208
  muscle biopsy, 207–208
  pulmonary biopsy, 208–209
  renal biopsy, 208
  skin biopsy, 207
  Tissue forceps, 254
  Tissue injury, 256–260
  closure, 257
  healing phases, 257–258
  initial assessment and preparation, 256–257
  skin grafting, 258
  wound care, 259–260
  TIVA. See Total intravenous anesthesia
  T lymphocytes, 48
  To-and-fro system, 233
  Toe, 87
  Tolazoline (Priscoline), 220
  Tongue, 60
  Tonopen, 273
  Topical ointments, 259
  Top-read reflectance
  spectrophotometry (dry reagent strips), 230
  Torbugesic, 183
  Total fluid deficit, calculating, 285
  Total globulin count, 198

400

Total intravenous anesthesia, 234
Total parenteral nutrition, 289, 290
  double-lumen catheters and, 280
  guidelines for administration of, 290
  Total solids, 217
  Towel clamps, 254
  nonperforating, 255
  penetrating, 254, 255, 255
  Toxicity, central nervous system and, 166
  Toxin exposure, reducing, 36
  TPN. See Total parenteral nutrition
  TPR. See Temperature, Pulse, Respiration
  Trabeculae, 49
  Trabecular bone, 82

Vitamin A, for horses, 21
Vitamin C, 21
Vitamin D
for horses, 21
skin and, 76
Vitamin E, for horses, 21
Vitamin K, 21
Vitamins, 20–21
fat-soluble, 17–18, 21
performance horses and, 29
stallion fertility and, 27
water-soluble, 21
Vitreal floaters, 273
Vitreous chamber, 78
Vocal folds, 54, 56
Vocal ligaments, 54, 56
Volatile fatty acids, 17, 28, 62
Volume of distribution, 165
Voriconazole, 178
Vulva, 93, 95
red velvety bag protruding out of, for foaling, 108
washing, before passing hand into vagina, 113
Vulvar seal, 93
Vusellum forceps, 255
W
Wall, 87
Warm weather feeding, 33–34
Water
cold weather feeding and, 33
intake requirement for, in horses, 13–14, 14
in isolation stalls, 5
Watering systems, in stables, 3
Water-soluble vitamins, 21
Weanlings
with enlarged lymph nodes due to strangles, 135
with large burden of ascarids, 139
WEE. See Western equine encephalomyelitis
Weighing horse, anesthetic preparation, 218
Weight loss, obesity management and, 38–39
Western equine encephalomyelitis, 132, 133
West Nile virus, 132, 133, 213
horse infected with, 133
vaccinations for, 133
Wet-to-dry bandages, 259, 349
Wet-to-wet bandages, 259
WhirlPak bags, 211
White blood cell count, preanesthetic assessment, 217
White blood cells (leukocytes), 47, 189, 193
types and functions of, 193–194
urine sediment and, 205
White matter, 65, 66
White pulp, in spleen, 49
Whole blood transfusion, 310–314
administering blood to patient, 313
collecting blood from donor, 312–313
common indications for, 310–311
complications with, 313–314
cross-matching, 311–312
donor selection, 313
incompatibility agglutination, 312
pulling donor blood into evacuated container, 312
Winking, 93
Winstrol, 182
Winter rations, 31–33
WNV. See West Nile virus
“Wolf” tooth, 59
Wood shavings, for bedding, 3
Workers compensation, 357
Wound care, 259–260
Wound closure, methods of, 257
Wounds, swabs from, 216
Wright stains, 196
X
Xenografts, 258
X-ray generator
ceiling-mounted, 322
portable, 322
Xylazine aggression, 318
Xylazine-ketamine, 227–228
Xylazine (Rompun), 182–183, 240, 242
bronchoalveolar lavage and sedation with, 305
colic treatment and, 345
tracheal wash and sedation with, 307
Y
Yearlings, crude protein requirements for, 23
Yohimbine, 220
Yolk sac remnant, 103
Y piece, in circle systems (rebreathing systems), 232
Z
Zero energy balance, 14
