legal access to abortion, 140, 141, 411
“legally defensive medicine,” 63

Leibbrand, Werner, 473

letting die
killing and allowing to die moral distinction, 268–71
severely disabled newborns, 280–1
newborn infants
and personhood, 138
severely disabled newborns, 274, 280–1, 548–9

liberalism
and ethics committees and consultants, 574
and global health care ethics, 395–6, 397, 399
and HIV transmission as harm to others, 443, 444, 445
liberal model of health law, 61–3
and religious views, 54

libertarianism
and HIV transmission as harm to others, 443–4, 445
objection to global health ethics, 395–6
and right to health care, 364
liberty and quarantine restrictions, 434–6

life see human life
life expectancy and resource allocation decisions, 338, 347–8

life-support technology: end-of-life decisions
and killing/allowing to die distinction, 269–71

lifestyle and health see behavior

Light, Donald, 400

Little, M. O., 556
“living wills” see advance directives

Locke, Alain, 24

“locked in” state, 291, 297

logical positivism and animal research, 500

Long, Crawford, 471
INDEX

long-acting reversible contraception (LARC), 174–5
longevity and resource allocation, 338, 354
Louden, Robert, 99
Love, James, 418–19
Love, R. R., 460–1
lying
  principles and rule against, 70, 72, 524–6
departures from, 525–6, 527, 528
Lyons, Nona, 109

McCormick, Richard, 46
McCullough, L., 157

McKibben, B., 226
Maimonides, Moses, 4
Maitland, Sir Frederick, 327
male contraception, 174
Malthus, Thomas, 163, 164
marginal humans see incompetent and marginally competent patients
Mars-Jones J., 340–1
Martial, 313
maternal behavior and prenatal harm to fetus, 149–58
and HIV testing, 443
“maternalism” and ethic of care, 107, 108, 112
Meaney, M. J., 223
meaning of life
  and profoundly damaged children, 548–9
  sterility of genetic enhancement, 230–1
medical decisions: see also newborn infants:
  medical decisions on severely disabled newborns
medical decisions at end of life see end-of-life decisions: medical decisions
medical ethics
  historical context, 4–6
  virtue ethics approach, 98–9
medical humanities and teaching of ethics, 591
medical migration problem, 404–5, 405–8, 565–6
medical profession see doctors; health-care professions and practice; nurses
medical technology
  historical development, 8–9, 552
  and nursing
    de-emphasis on caring, 555–6
    extended role of nurses, 563–4
  religion and bioethics, 48–9, 51–2
medicines see pharmaceutical industry and access to medicines
mental health services and right to health care, 368
mentally ill and disabled patients and consent, 542, 544, 547
meta-ethics and teaching of ethics, 586, 589–90
micro-organisms and genetic engineering, 236–8
patenting new life forms, 242
MicroSort, 179, 189
mid-level principles and case studies, 16–19, 22
migration of health workers, 404–5, 405–8, 565–6
Miles, S. H., 451, 590
Mill, J. S., 318, 524
mind see brain; consciousness
mitochondrial disease and germline therapy, 210
Mohammed, Ibrahim, 404–5
Mohr, Richard, 443–4
moral absolutes see absolutes and principle-based approach
moral attention and ethic of care, 106
moral change and slippery slope argument, 328–31
moral communities and nursing, 559
moral deliberations and gender, 39, 40, 41–2
moral dilemmas see ethical dilemmas
moral distress and nursing, 556–7, 560, 566, 568
moral equals and ethical principles, 19
moral evaluation and resource allocation decisions, 342, 344–6, 349, 355
moral obligations
  duty to care of health professionals, 451
duty to rescue and pharmaceutical industry, 419–20
and global health ethics, 395–400
and mother–fetus conflict, 153–5, 186
moral philosophy
bioethics and practical applications, 7–8
and teaching of ethics in health professions, 586–7
moral rights to health care, 362–3, 421–2
scope of, 363–7
moral sentimentalism, 110–12
moral space for ethical discussion, 558
moral status
of animals as research subjects, 238–9, 495–508
and personhood, 134–8
of preimplantation embryo, 489–93
right to life and abortion debate, 142–4
moralistic-paternalistic model of health law, 61
mother–fetus conflict, 149–58
and contract pregnancy, 186
and HIV testing, 442–3
and pre-birth testing procedures, 188
motive
care ethics and obligation, 110, 114–15
parents motivation for cloning, 199
and virtue ethics, 93–5
multi-drug-resistant TB (MDRTB), 434
multiple pregnancies and IVF treatment, 183
murder see killing
