wrestlers, weight-loss strategies, 584–5
zone of proximal development, 411, 601
BPS Textbooks in Psychology

The only series to be approved by the British Psychological Society

BPS Blackwell presents a comprehensive and authoritative series covering everything a student needs in order to complete an undergraduate degree in psychology. Refreshingly written to consider more than North American research, this series is the first to give a truly international perspective. Every title fully complies with the BPS syllabus in the topic.

Each book is supported by a companion website, featuring additional resource materials for both instructors and students.

For further information and to view our entire list of BPS Textbooks in Psychology, go to:
