Index

Absorption, of wave energy, 67, 191, 197, 202
AC electricity, 130–141
  apparent power, 137
  balanced load, 140
  frequency, 132
  impedance, 137
  j-notation, 136
  linear circuit elements (RLC), 132–5
  phase, 132, 134, 137
  power factor, 138
  reactance, 135
  reactive power, 134, 137, 147
  real power, 134, 137
  three-phase, 139
  transformer, 131
  volt-amperes (VA), 137
Airy waves, 39, 44
Angle of attack, of a blade, 99, 249
Array, of marine energy devices, 34, 193–4, 226–9
Array losses, 107
Bathymetry, 13, 15
Bay of Fundy, 13, 23, 242
Bernoulli’s equation, 72
Betz Limit, 93–5, 104
Boundary layer, 99
Bristol Channel, 13, 82
Buoys, for wave measurement, 57
Capacity credit, 180, 182
Capacity factor, 29, 125
Capture width, 69–70, 188, 213
Carbon emissions, 4, 34
Cavitation, 104
Contouring raft, 21
Cook Strait, New Zealand, 84
Coriolis effect, 8
Cumulative installed capacity, 35
Damping, of a WEC, 65–7
  and energy capture, 67, 69
DC power transmission, 131
Doodson Numbers, 83
Drag, 96–102
Edison, Thomas, 130
Efficiency, of a tidal turbine, 90
Energy, units of measurement, 27–31
Energy period, 52
Energy yield, of a tidal turbine, 91–2
Environmental Impact Assessment (EIA), 120

European Marine Energy Centre (EMEC), 16, 111–24
Billia Croo wave test site, 112–14
Fall of Warness tidal test site, 114–16
research and environmental activities, 120, 121–4
tests of tidal stream energy converters, 224, 230, 241, 251, 258
tests of wave energy converters, 186, 193, 216

Falnes, Johannes, 22
Faraday, Michael, 141
Fatigue, 70–71, 106
Fetch, 5, 39
Formzahl number, 82
Fossil fuels, 1
Fourier analysis, 48, 56, 80
Frequency converter, 149
Friction velocity, 74
Froude Number, 76, 111
Fully-developed sea, 49

Generators, 141–66
asynchronous, 144, 146, 151–62
doubly-fed induction, 157–62
induction, 144
linear-motion, 162–6
number of poles of, 144
permanent magnet synchronous, 151, 241
power converters used with, 149–50
separate excitation of, 143
simple AC type, 141
slip, 146, 151–3, 156
squirrel-cage, 151–5
synchronous, 144, 145, 147–51
three-phase, 143
wound-rotor induction, 155

Global warming, 1
Gore, Al, 2
Gravitational effects, on tides, 11, 12

Grid electricity
balancing reserves, 180
base load, 180
capacity credit, 180, 182
connection of marine energy devices, 170–172
conventional power plants, 166–7, 177
demand curve, 178
fault level, 171–2
grid integration, 169, 175–6
grid strength, 173
intermittency, 176–9
planning reserve, 181
reliability, 181–2
renewable, 176, 178
UK grid layout, 166–8
voltage flicker, 173
waveform distortion, 174–5
Group velocity, 41

Harmonic constituents, 81–2
Harmonic distortion, 174–5
Horizontal-axis turbine, 87, 93
Household electricity consumption, 29–33, 125, 227

Impedance, 137
Intermittency, 176–9
Inverter, 149
Islay, 17, 31–2, 82, 199, 226
Kelvin, 80
Kinematic viscosity, 76
Knot (nautical mph), 14, 86
Kyle Rhea, 17, 237
La Rance tidal barrage, 23
Laminar flow, 75
Laplace tidal equations, 78
Lift, 96–102
Lift-to-drag ratio, 99–100, 101
Load factor, 29
Masuda, Yoshio, 20

Natural frequency, 65, 190
Neap tide, 12
Newton, Isaac, 77
laws of motion, 78
Nodding Duck, 20–21
Nuclear power, 2, 4, 167, 182
Numerical modelling, 109

Orkney Islands, 16, 111, 125
Oscillating hydrofoil, 88
Oscillating water column (OWC), 19, 128–30

Passive stall, 157
Pentland Firth, 16, 233
Period, of random waves, 52
Phase angle, 132–7
Phase velocity, 41–2
Pitched blades, 105
Power, of ocean waves, 9–11
  intercepted by tidal turbine, 89
  rated, 29, 89–90
  units of measurement, 27–31
Power coefficient, 89, 95–6
Power converter, 149–50
Power factor, 138
Power take-off, 126–30
  hydraulic, 127–8, 188, 193
  Wells turbine, 128–30, 200, 202

Random sea, 48
Rated power, of a device, 29, 89–90
Rayleigh distribution, of wave heights, 45
Reactance, 135
Rectifier, 149
Reluctance, of magnetic circuit, 142
Renewable energy, 5
Reynolds Number, 75–6, 111
Rogue wave, 47, 59
Roughness height, 74
Royal Society of London, 78
Run-of-river schemes, 25

Salter, Stephen, 20, 68, 109, 127
Sampling, of wave height, 56
Satellite altimeter, for wave measurement, 57
Scheer, Herman, 3
Schumacher, E.F., 2

Scotland, tidal stream resources of, 15, 18
Severn Estuary tidal barrage, 25
Shear velocity, 74
Shoaling, of waves, 42
Significant wave height, 45–7, 113, 203, 212
  in the frequency domain, 48
  of a random sea, 51
Significant wave period, 47, 52, 203
Sihwa Lake tidal barrage, 23
Sound of Islay, 17, 226
Spectral density, of a random sea, 48
Spring tide, 12
Standing wave, 53, 68
Steepness, of a wave, 47
Sustainability, 2, 3
Swell, 5, 44, 49–50
Swept area, 89, 91
Synchronous speed, 147

Tank testing, 76, 109–11, 208, 216
Tapchan, 22
Tapered duct, 91, 241
Tapering channel, 22
Tesla, Nikola, 130, 144
Three-phase circuit, 139
Tidal barrage, 23–5
Tidal Diamond, 85
Tidal mill, 23
Tidal prediction machine, 81
Tidal stream energy
  characteristics of, 13, 84
  global resources, 15
Tidal stream energy converters, 224–62
  advantages of, 26–7
  array of, 226–9
  device specifications, 224–5, 230, 234–6, 247–8, 261
  electrical output, 227, 236–7, 252
  environmental protection, 236, 241
  foundations, 106, 224, 235, 241, 260
  maintenance, 106–7, 230, 242, 252
  oscillating hydrofoil device, 245–51
Tidal stream energy converters
(Continued)
siting, 228–9
survivability, 248, 252
tow-testing of, 229, 251
turbine design, 31–2
blade pitching, 105
blade twist, 102
forces, 106
power coefficient, 104
rotor speed, 102–4
tip-speed ratio, 104
Tide, types of, 11, 12, 78, 82
harmonic constituents, 80–82
Tip-speed ratio, 104
Transformer, 131, 169
Tuning, of a WEC, 64
Turbulence, 75, 76, 99, 108
Twist, of a rotor blade, 102
Variability, of wave and tidal devices,
27, 29, 34
Vertical-axis turbine, 87–8
Volt amperes (VA), 137
von Karman’s equation, 73–4, 107
Wake, of a turbine, 95–6
Water particles, in waves, 42
Wave climate, 62, 68, 203
Wave diffraction, 55
Wave energy
global resources, 9–11
transport of, 43
Wave energy converters (WEC’s),
186–221
attenuator, 187–92
capture width, 69–70, 188, 191, 213
diversity of, 59
electrical output of, 192, 197, 204,
209, 214, 218
energy absorption by, 67, 191, 197,
202
oscillating water column, 199–205
oscillating wave surge converter,
192–9
overtopping device, 205–11
point absorber, 211–15
survivability, 191, 200, 210, 213,
220
tuning, 64, 164, 190, 197, 210, 213,
291
types of, 60–61, 185
Wave focussing, 22
Wave frequency, 47–8
Wave packet, 41
Wave reflection, 53, 68
Wave refraction, 54
Wave rose, 51, 61
Wildlife protection, 122
Wind patterns, 7–9
