Contributors, vii  
Foreword, xii  
Preface, xiv  
About the companion website, xv  

1 Tissues and organs of the immune system, 1  
   Isam W. Nasr, Qiang Zeng, and Fadi G. Lakkis  

2 Cells of the immune system, 25  
   Jason R. Lees, Agnes M. Azimzadeh, Yaozhong Ding,  
   Tonya J. Webb, and Jonathan S. Bromberg  

3 Soluble mediators in the immune system, 48  
   Charles A. Su, William M. Baldwin III, and Robert L. Fairchild  

4 Costimulatory molecules, 65  
   Maria-Luisa Alegre and Anita S. Chong  

5 Major histocompatibility complex, 85  
   Raja Rajalingam, Qiuheng Zhang, J. Michael Cecka, and Elaine F. Reed  

6 T cells and the principles of immune responses, 103  
   Jonathan S. Maltzman, Angus Thomson, and David M. Rothstein  

7 Ischemia and reperfusion injury, 128  
   Yuan Zhai, Yoichiro Uchida, Bibo Ke, Haofeng Ji, and Jerzy W. Kupiec-Weglinski  

8 Immune responses to transplants, 142  
   Denise J. Lo and Allan D. Kirk  

9 Principles of hematopoietic cell transplantation, 164  
   Sung Choi and Pavan Reddy  

10 Therapeutic approaches to organ transplantation, 184  
    Philip F. Halloran, Chatchai Kreepala, Gunilla Einecke,  
    Alexandre Loupy, and Joana Sellarés  

11 Organ-specific features in clinical transplantation, 217  
    Roslyn B. Mannon  

12 Transplant-related complications, 237  
    Leonardo V. Riella and Anil Chandraker
13 Biomarkers of allograft rejection and tolerance, 259
   Choli Hartono, Thangamani Muthukumar, and Manikkam Suthanthiran

14 Emerging issues in transplantation, 280
   Rupert Oberhuber, Guangxiang Liu, Timm Heinbokel, and Stefan G. Tullius

15 New frontiers and new technologies, 297
   Haval Shirwan, Yiming Huang, Kadiyala Ravindra, and Suzanne T. Ildstad

16 Experimental models in discovery and translational studies, 316
   Andrew B. Adams, William H. Kitchens, and Kenneth A. Newell

Index, 337
