abdominal wall, Prune Belly Syndrome (PBS)
  electromyographic mapping, 33
  “pot belly”, 34, 34
  sitting process, 33, 33
abnormal bladders/reservoirs
  transplantation in, 47
acute pyelonephritis, 64–6, 109
adolescent clinic, 5–7
adolescent sexuality and counseling
  age of puberty, 233
  dating, 233
  drug abuse
    pregnancy, 234–5
    sexual dysfunction, 234
  genito-urinary anomalies, 232, 235
  inheritance, 234
  “internal” anomalies, 232
  pregnancy testing, 110, 234
  sex and fertility, 232
  sexually transmitted disease (STD), 233
adolescent urology
  acquired disease, 8
  adolescent clinic, 5–7
  definition, 1
  dischargeable patients, 7
  drug abuse, 8, 234, 234
  obesity and, 3
  publications on, 2
  staffing, 3, 4, 6, 6
  training requirements, 5
  transition process, 2–5
  unresolved follow-up problems, 7–8
Americans with Disabilities Act (ADA), 88
ammonium chloride and hydrogen ions, absorption, 94–5
anastomotic cancer, 97, 99
androgen insensitivity syndromes (AIS), 221–3
angiotensin, 43
antibiotics
  nephrotoxic, 45
  prophylaxis, 47
  therapy, 45
antimuscarinic medications, 78, 122, 133
  5-α reductase deficiency (5αRD), 223–4
  artificial bladders, 100–101
  artificial urinary sphincters (AUS)
    extrophy, 134–5
    with intestinal reservoir, 135
  lower urinary tract reconstruction, 103–4
  spina bifida, 78
  artificial urine, 94
  auto augmentation, 99–100
balanitis xerotica obliterans (BXO), 181, 182
bicarbonate
  and ammonia level, 94
  in colon, 95
  hyperchloremic acidosis (HCA), 94
bilateral synchronous pyelonephritis, 109
bladder
  acontractile, 78
  antimuscarinic drugs, 78
  augmentation, 78
  cancer see cancer, bladder
  “dry interval”, 131
  early management, extrophy and epispadias, 131–2
  enuresis, 123–4
  inflammation, 125, 126, 136
  ketamine, 124–6
late function
  extrophy, 132–3
  hypospadias, 180
  posterior urethral valves, 167–9, 168
  spina bifida, 78
microarray analysis, 130
non-neuropathic neuropathic bladder, 122–3
reconstruction and incontinence, 133
and renal function, 44, 78, 79
stones, 22
and urinary reservoir, 46
bladder function
  extrophy, 130–131
  posterior urethral valves, 167–9
  prune belly syndrome, 31–2
  spina bifida, 779
Boyce–Vest (or Mauclaire) diversion, 98
calciuria, 24
cancer, bladder, 136–7
circumcision, 63
clean intermittent catheterization (CIC), 78, 79, 91
clitoroplasty
amputation, 204
ethical issues, 206–7
feminizing genitoplasty, 204–5
“nonspecific” gender registration, 207
patient support groups, 204
psychosexual aspects, 205–6
surgical results, 205
cloaca, 214
cloacal exstrophy
bladder, 155–6
gender assignment, 156–8
genital reconstruction, 160–161
kidneys, 155
mortality, 154–5
penile reconstruction see penile reconstruction
quality of life, 161–2
colon, urinary reservoir
gastro-intestinal consequences, 94
genoplasia in, 98, 110
storage consequences, 94–6
complete androgen insensitivity (CAIS), 221–2
congenital adrenal hyperplasia (CAH)
anus and rectum, 202–3
ethical issues, 206
feminizing genitoplasty, 203
gender assignment, 202
congenital anomalies of the kidneys and urinary tract
(CAKUT), 41, 42
continence
in adolescent practice, 103
artificial urinary sphincters (AUS), 103–4
definition, 103
“dry interval”, 103
Indiana pouch, 103
Kock nipple, 103
Mainz II, rectum
anastomotic cancer, 97
anus self-catheterization, 97
maximum anal closing pressure (MACP), 97
presentation and management, 99, 99
neuropathic bladder, hour-glass deformity, 104, 104
practice of self-catheterization, 103
suprapubic continent diversions, 103
continuous ambulatory peritoneal dialysis (CAPD), 46
CPEX testing, neuropathic bladder, 80
cutaneous ureterostomy, 116, 119, 121
cystinuria, 24
desalination, 45
detrusor contraction, spina bifida (SB), 78
detrusor myomectomy, 100
detrusor-sphincter dyssynergia (DSD), 64, 77
diabetes, 3, 244
dimethylhydrazine, 98
Eagle–Barrett syndrome see prune-belly syndrome (PBS)
ectopic ureters
in adults, 53–4
dysplastic, 54
imaging, 54, 54
urinary infection, 54
end-stage renal failure and transplantation
abnormal bladders/reservoirs, 47
antibiotic prophylaxis, 47
continuous ambulatory peritoneal dialysis (CAPD), 46
intermittent self-catheterization, 47
urinary tract infections detection, 47
videocystometrogram, 47
examination under anesthetic (EUA), 79–80, 211
exstrophy and epispadias
bladder see bladder continence, 131–2, 131, 131
females
fertility, pregnancy and delivery, 147–8
genital anatomy, 144–5
procedentia repair, 147, 147
reconstruction, genitalia, 146, 145, 146
histology and neoplasia; 136, 136, 137
inheritance, 149
injected bulking agents, 133–4
kidneys, 137–8
male sexual function, 143–4
medical management, 133
monsplasty, 148, 146
mortality, 128, 130
paternity, 144, 144
pelvis, 138, 145
pelvic floor musculature, 130
penis
anatomy, 138–40
erectile deformity, 140
reconstruction, 140–143
pelvis, 138, 138, 145, 145
psychological issues, 149–50
pubic hair, 139–40, 146
sacro-iliac osteotomy, 128
sexual health
contraception, 148
infections, 148–9
surgical management
artificial urinary sphincter (AUS), 134–5
bladder neck reconstruction, 134
principles, 128
feminizing genitoplasty, 203
gender assignment
in cloacal exstrophy, 156–8
in disorders of sex development, 202, 221–4
Index

Gillick competence, 6
Golombok–Rust Inventory of Sexual Satisfaction (GRISS), 222

horseshoe kidney (HSK), 15–16
hydronephrosis
  fetal obstruction, 13, 42, 167, 169–71
  pelvi ureteric junction obstruction (PUJ), 7, 14
  pyonephrosis, 14, 109
  and renal function, 13, 78
  ureteroceles, 53
hypercholeemia, 94
hypercholemic acidosis (HCA)
  ammonia production, 94
  ammonium chloride and hydrogen ions, 94–5
  artificial urine, 94
  with ileo-cystoplasty, 95
  osteomalacia, 96
  and potassium, 95
  with ureterosigmoidostomy, 94–5
  and vitamin D-resistant rickets, 95
  in Wistar rats, 95
hyperlipidemia/statins, 46
hypertension,
  borderline, 61
  spina bifida (SB), 77
vesico-ureteric reflux
  age of onset, 59
  centile charts, 60
  effect on credit risk, 60
  prehypertension, 60
  pyelonephritis/scarring, 59
hypospadias
  in adults
    balanitis xerotica obliterans (BXO), 181, 182
    failed reconstruction, 184–5
    hair ball, 183, 184
    spongiosum, 182, 182
    urethrogram, 183, 183
  fertility, 185
  follow up, 7
  inheritance, 185–6
  measurement, 177–8
  micturition, 179–80
  psychological outcomes, 186
  sexuality, 180–181
  surgical outcomes, 178–9

ileum, urinary reservoir
  construction, 92
  defecation, effect on, 93
  “hour-glass deformity”, 104
  linear growth, effect on, 93
  storage consequences, 93–4
  vitamin B₁₂ deficiency, 93
INTEGRA® Dermal Regeneration Template, 100

kidney
  agenesis, 16–17
  autosomal dominant polycystic kidney disease (ADPKD), 17–18
  autosomal recessive polycystic kidney disease (ARPKD), 18
  dilated
    in prune belly syndrome, 29–30
  fetal, 13, 19–20, 50, 51, 52, 58
    with reservoirs, 118
  gene defects, 41
  glomerular hyperfiltration, 46
  horseshoe kidney (HSK), 15–16
  hydronephrosis, assessment, 13–14
  multi cystic dysplastic kidney (MCDK), 17–18
  pelvi-ureteric junction (PUJ) obstruction, 13–15
  polycystic kidneys, 18
  scarring, 41, 118
  kypho-scoliosis, 79, 81

latex allergy
  children, 81–2
  coughing/sneezing, 82
  surgery in adulthood, 79

lower urinary tract replacement and reconstruction
  artificial bladders, 100–101
  auto augmentation, 99–100
  biochemical changes, 92–6
  clean intermittent self-catheterization (CIC), 91
  components, 91, 92
  conduits, 101–2
  continence, 103–4
  histological changes, 107–8
  infection, 109, 109–10
  mucus, 105–6
  neoplasia, 97–9, 110
  perforation, 108–9
  pregnancy, 111
  renal function, 104–5
  reservoirs
    colon, 94–6
    ileum, 92–4
    rectum, 97–9
    stomach, 91–2
  stomas, 102
  stones, 105–7
  urine testing for pregnancy, 110–111
  urodynamic findings, 102–3
  luteinizing hormone (LH), 195–6

Mainz II see under rectum
maximum anal closing pressure (MACP), 97

megareters
  bilateral megareters, 50, 51
  congenital megareter, 50, 50
  definitions, 49–50
  fetal ultrasound, 50
fusiform dilatation, 50
hematuria, 51
lower ureter, reconstruction, 51
pelvis ultrasound, characteristic appearance, 51, 52
refluxing and obstructed, 52
reimplanted, 50
methyl malonic acid (MMA), 93
monsplasty (both sexes) see extrophy
Monti tube, 101, 102
neoplasia, 110, 196–7
neoplastic disease
adolescents
  chemotherapy, 245
  morbidity, 244
  premature death, 245–6
  radiotherapy, 244–5
bladder, 136–7
gonadal (including UDT), 33, 196–7, 213
in reservoirs, 97–9, 110
rhabdomyosarcoma see rhabdomyosarcoma
survival rates, 239, 244
vaginal, 212
Wilm’s tumor, 239–41
nephron mass
hyperfiltration models, 42–3
proteinuria and progressive renal failure, 43
nephro-urology clinical practice
antibiotic therapy, 45
desalination, 45
diet, 46
follow up, 45
hyperlipidemia/statins, 46
hypertension and glomerular hyperfiltration, 46
renal bone disease, 46
renal function, preservation, 44–5
transition process, 44
urinary tract infections (UTIs), 45
neural tube defects (NTD), 85, 85–6
adolescent urology, 3
NTD see neural tube defect (NTD) and spina bifida
obstruction, urinary-tract
anatomy and assessment, 44
fetal, 42
pelvi-ureteric junction (PUJ) see pelvi-ureteric junction
  obstruction
occupations, 8
orchiopexy, 193
Oxalobacter formigenes, 23, 79
oxaluria, 24
pelvi-ureteric junction (PUJ) obstruction
  in adults, 14–15, 14
  ante natal diagnosis, 13, 15
  fetal ultrasound, 13
  renal function, 13, 15
Society of Fetal Urology grading, 13
surgery, 14–15
urinary tract infections, 14
penis
Cantwell–Ransley procedure, 142
in cloacal extrophy, 158–60, 158
condoms, bespoke, 148
in extrophy see extrophy
forearm phalloplasty, 159–60
in hypospadias see hypospadias
small see undervirilized males
plasma and total body potassium, 95
polycystic kidneys, 18
polyuria, 45
posterior urethral valves
  bladder management
    intrauterine treatment, 168
  urinary incontinence, 167
