  – backscatter factors 721
  – discovery of 31
  – energies 678, 682
  – equipment techniques 687
  – exposure guides 725
  – exposure rate(s) 722
  – film/screen systems 707–710, 722
  – filters 691–695
  – generators 677–679
  – H&D curve(s) 711
  – heel effect 685
  – image formation 697–699, 702
  – image processing 710–716
  – mammography 696, 716, 677
  – production of 148, 677
  – radiation protection for 717–724
  – rotating anodes 686
  – shielding calculations 726–733
  – three-phase 691
  – x-ray tubes 682–684
  – x-ray yield 679–681
Xenon-135 243–245
