# Table of Contents

Planning Your Handling Facilities ...............................................................65  
Selecting a site for your handling facilities.......................................65  
Designing your handling facilities......................................................66  
Selecting a head gate and holding chute ..........................................69  

Sheltering Your Cattle ...................................................................................70  
Going with the tried and true: Pole barns ........................................71  
Checking out the latest in barnyard architecture:  
Hoop barns............................................................................................72  
Making do with what you have: Repurposing  
eexisting structures.............................................................................72  
Providing shade sources and wind breaks........................................73  
Choosing bedding for your cattle shelter .........................................75  

Preventing Mud and Muck with a HUAP Zone...........................................76

## Chapter 5: Chow Time: Planning Your Feeding Program ...........79

Understanding the Nutrients Cattle Need ..................................................80  
Starting with protein ...........................................................................80  
Harnessing the nutritional power of energy: Carbs,  
fats, and proteins .............................................................................83  
Mighty minerals: Finding the right balance........................................84  
Cooking up an alphabet soup of vital vitamins...............................89  
Water: Providing the ever-important liquid ..................................91  

Comparing Feeds and Choosing the Best for Your Cattle...............92  
Feeding forages ....................................................................................93  
Adding to the cattle diet with concentrates .................................94  
Considering nontraditional feedstuffs ............................................95  

Doling Out the Proper Feed for All Types of Cattle.........................95  
Nourishing the newborn ....................................................................96  
Providing for the growing calf.................................97  
Balancing the diet for a finishing animal.........................................98  
Maintaining the dry cow .................................................................98  
Keeping your pregnant or lactating cows fed.................................99  
Meeting the dietary needs of your bull .............................................99  

Deciding on a Feeding Schedule ..........................................................100  
Opting for limit feeding ......................................................................100  
Allowing cattle to free-choice feed .................................................101  
Introducing new feeds to the diet ......................................................101  

Purchasing the Basic Supplies: Fine China Not Required ..............102  
Getting excited about grain feeders .................................................102  
Relying on hay rings .........................................................................104  
Ensuring proper water sources .........................................................104  

## Chapter 6: Exploring Pasture, Manure, and Water Management ..107

Pasture Basics: The Forage Elements that Make for Good Grazing.....108  
Characterizing quality forages ..........................................................108  
Looking at the types of forages that are available  
for your pastures.............................................................................109  

Seeking Greener Pastures: Improving or Establishing  
Your Grazing Land .............................................................................111
Evaluating and perfecting an existing pasture ........................................ 112
Preparing a new pasture ......................................................................... 113
Improving your pasture by fertilizing and feeding the soil .................. 114
Making manure a nutrient for your pasture, not a nuisance ............... 115
Optimizing Pasture Productivity ............................................................... 118
Matching the number of cattle to the amount of available pasture .......... 119
Giving your pastures a rest with rotational grazing ............................ 121
Creating a yearlong forage chain ......................................................... 122
Protecting Your Water Resources ............................................................. 124
Building a stream crossing and drinking area ...................................... 124
Managing your ponds and cattle together ............................................ 125
Protecting riparian areas with flash grazing ........................................ 126

Chapter 7: Choosing and Buying Cattle ............................................... 127
Selecting the Right Cattle for You ............................................................. 127
Early start: Considering the fun and commitment of a bottle calf ............ 128
Ready to grow: Exploring the benefits of a weaned calf ...................... 130
Blue ribbons: Enjoying the rewards of a show calf .............................. 130
A bun in the oven: Pondering the promise of a bred cow .................. 131
Deciding Where to Buy Your Cattle: A Bovine Shopper’s Paradise ...... 132
Going to the farm .................................................................................. 133
Checking out consignment sales ............................................................ 134
Taking advantage of test stations ......................................................... 135
Visiting the local sale barn ................................................................. 135
Surfing the Internet .............................................................................. 136
Making a Wise Purchase: What to Look For Before You Buy ............ 136
Noticing signs of a healthy versus unhealthy animal ......................... 137
Avoiding genetic and bloodborne diseases ......................................... 138
Assessing animal disposition .............................................................. 138
Judging conformation .......................................................................... 139
Understanding performance measurements and pedigrees ............ 140
Evaluating customer service ............................................................... 141
Arriving Home and Settling In ............................................................. 142
Transporting your cattle ...................................................................... 142
Adjusting cattle to their surroundings and feedstuffs ....................... 143

Part III: Cattle Handling, Health, and Breeding ......................... 145

Chapter 8: Understanding and Properly Handling Cattle .................. 147
Getting Acquainted with Bovine Behavior ............................................ 148
Recognizing cattle preferences ............................................................ 148
Expecting cattle fighting ...................................................................... 149
Dealing with riding or mounting cattle ................................................ 150
Table of Contents

Determining Whether Your Cattle Are Content .................................................. 150
  Deciphering body language: The head, the tail, and the stuff in between .......... 151
  Translating the moo ......................................................................................... 153
Taking Advantage of Your Cattle’s Natural Behaviors ..................................... 154
  Managing the predator-prey relationship .......................................................... 154
  Using the flight zone to move cattle ............................................................... 155
  Working with cattle in a handling facility ...................................................... 158
  Training your cattle .......................................................................................... 160
Safely Handling Breeding Stock ......................................................................... 160
  Selecting the right equipment ........................................................................ 161
  Evaluating a bull’s attitude and handling him .............................................. 161
  Working with mothers and baby calves ....................................................... 163

Chapter 9: Keeping Your Cattle Healthy ............................................................... 165
  Observing Your Cattle to Recognize Illness Early ......................................... 165
    Keeping an eye on appetite and behavior .................................................... 166
    Checking urine and feces .......................................................................... 167
  Get His Vitals, Stat: Measuring Physical Vital Signs ....................................... 168
    Checking body temperature ...................................................................... 168
    Taking the pulse ......................................................................................... 170
    Observing respiration ............................................................................... 171
    Deciding what to do for a sick animal ....................................................... 171
  Vaccinating Your Animals ............................................................................ 174
  Creating an Annual Healthcare Calendar ...................................................... 175
    Starting in pre-calving and calving season ................................................ 175
    Moving on to breeding season .................................................................. 176
    Entering into the preweaning and weaning season .................................... 177
  Preventing Seasonal Diseases and Issues ...................................................... 178
    Being a bad host to internal and external parasites ................................... 178
    Controlling pinkeye .................................................................................... 181
    Beefing up seasonal nutritional needs .......................................................... 181
    Keeping cattle comfortable during extreme weather .................................. 182
  Mastering Basic Animal Husbandry Skills ..................................................... 183
    First things first: Stocking your first-aid kit ............................................. 183
    Making injections a breeze ....................................................................... 185
    Hi! My name is Daisy: Attaching identifying ear tags .............................. 187
    Treating your cattle’s wounds ..................................................................... 189

Chapter 10: Addressing Common Cattle Ailments ............................................. 191
  Understanding Respiratory Diseases .............................................................. 191
    Infectious bovine rhinotracheitis (IBR), or red nose .................................. 194
    Bovine virus diarrhea (BVD) ....................................................................... 194
    Bovine respiratory syncytial virus (BRSV) ................................................. 195
    Parainfluenza-3 (PI-3) ............................................................................... 195
    Pasteurella .................................................................................................. 196
    Haemophilus somnus (H. somnus) ................................................................ 196
Closing In on Clostridial Diseases .............................................................196
Dealing with Reproductive Diseases .........................................................199
  Brucellosis ..........................................................................................199
  Leptospirosis ......................................................................................200
  Vibriosis ..............................................................................................200
  Trichomoniasis ...................................................................................201
Contending with Other Infectious Diseases .............................................201
  Pinkeye ................................................................................................201
  Johne’s disease ..................................................................................202
  Tuberculosis .......................................................................................203
  Scours ..................................................................................................203
Looking Out for External Parasites ...........................................................204
  Flies ......................................................................................................204
  Grubs ...................................................................................................206
  Lice ......................................................................................................207
  Ringworm ............................................................................................207
  Mites ....................................................................................................208
Controlling Internal Parasites ....................................................................209
Preventing Feed-Related Problems ...........................................................210
  Moldy feed ..........................................................................................210
  Poisonous plants ................................................................................210
  Founder ...............................................................................................211
  Bloat .....................................................................................................211
  Sweet clover poisoning .....................................................................212

Chapter 11: Breeding Cows and Caring for Pregnant Females . . . . . .213
  Preparing Your Cow for a Successful Pregnancy .................................213
    Assessing body condition scores .........................................................214
    Providing extra preparations for cows at either end of the age spectrum .............................................217
    Administering reproductive vaccines ..................................................219
    Determining a due date after conception .............................................220
  Tending to the Male Side of the Reproductive Equation .........................221
    Selecting the right bull for your cows ................................................221
    Understanding the breeding soundness exam .......................................223
    Caring for your bull ...........................................................................224
  Getting Cows Pregnant without Owning a Bull ........................................225
    Opting for artificial insemination .........................................................225
    Leasing a bull ......................................................................................229
  Planning for the Big Delivery ................................................................230
    Setting up the birthing spaces ...........................................................230
    Gathering your calving supplies .........................................................231
  Monitoring the Stages of Labor .............................................................233
    Gearing up for pre-delivery ...............................................................233
    Progressing into active labor .............................................................233
    Watching for postpartum actions .......................................................237
  Managing Potential Issues during Pregnancy and after Delivery ..........237
    Coping with abortions ......................................................................237
    Being aware of milk fever ...............................................................239

Chapter 15: Managing Your Beef Business

Covering the Legalities of Selling Beef
- Understanding governmental rules regarding processing facilities
- Obtaining permits and licenses
- Protecting yourself with proper insurance coverage

Exploring and Pricing the Meat a Market Animal Produces
- Selling the whole animal on the hoof
- Providing freezer beef
- Marketing your meat by the individual cut
- Setting your prices

Finding and Working with Your Butcher
- Checking out the facilities and personnel
- Considering your animals’ well-being
- Deciding on packages and labels
- Maintaining a good relationship with your chosen meat cutter

Exploring Your Different Selling Options
- Selling direct off the farm
- Participating in farmers’ markets
- Harnessing the power of the Internet
- Working with restaurants

Promoting and Marketing Your Beef
- Beefing up on cattle-selling terminology
- Spreading the word about your products
