About the Authors ix
Preface xi
List of Symbols xiii

1 Introduction 1

2 Fundamentals of Acoustic Wave Motion 3
2.1 Fundamental Acoustic Concepts 3
2.2 The Wave Equation 5
References 10

3 Simple Sound Fields 11
3.1 Plane Waves 11
3.2 Sound Transmission Between Fluids 18
3.3 Simple Spherical Waves 22
References 24

4 Basic Acoustic Measurements 25
4.1 Introduction 25
4.2 Frequency Analysis 25
4.3 Levels and Decibels 29
4.4 Noise Measurement Techniques and Instrumentation 32
References 40

5 The Concept of Impedance 41
5.1 Mechanical Impedance 41
5.2 Acoustic Impedance 43
5.3 Specific Impedance, Wave Impedance and Characteristic Impedance 46
References 48
### Contents

6  **Sound Energy, Sound Power, Sound Intensity and Sound Absorption**  49
6.1 Introduction  49
6.2 Conservation of Sound Energy  50
6.3 Active and Reactive Intensity  55
6.4 Measurement of Sound Intensity
   6.4.1 Errors Due to the Finite Difference Approximation  63
   6.4.2 Errors Due to Scattering  64
   6.4.3 Errors Due to Phase Mismatch  64
6.5 Applications of Sound Intensity
   6.5.1 Sound Power Determination  68
   6.5.2 Noise Source Identification and Visualisation of Sound Fields  70
   6.5.3 Transmission Loss of Structures and Partitions  70
   6.5.4 Measurement of the Emission Sound Pressure Level  71
6.6 Sound Absorption  71
References  72

7  **Duct Acoustics**  75
7.1 Introduction  75
7.2 Plane Waves in Ducts with Rigid Walls
   7.2.1 The Sound Field in a Tube Terminated by an Arbitrary Impedance  75
   7.2.2 Radiation of Sound from an Open-ended Tube  82
7.3 Sound Transmission Through Coupled Pipes  86
   7.3.1 The Transmission Matrix  87
   7.3.2 System Performance  92
   7.3.3 Dissipative Silencers  97
7.4 Sound Propagation in Ducts with Mean Flow  99
7.5 Three-dimensional Waves in Ducts with Rigid Walls
   7.5.1 The Sound Field in a Duct with Rectangular Cross Section  101
   7.5.2 The Sound Field in a Duct with Circular Cross Section  107
   7.5.3 The Sound Field in a Duct with Arbitrary Cross-sectional Shape  114
7.6 The Green’s Function in a Semi-infinite Duct  116
7.7 Sound Propagation in Ducts with Walls of Finite Impedance
   7.7.1 Ducts with Nearly Hard Walls  122
   7.7.2 Lined Ducts  125
References  125

8  **Sound in Enclosures**  127
8.1 Introduction  127
8.2 The Modal Theory of Sound in Enclosures
   8.2.1 Eigenfrequencies and Mode Shapes  128
   8.2.2 The Modal Density  132
   8.2.3 The Green’s Function in an Enclosure  133
8.3 Statistical Room Acoustics  137
   8.3.1 The Perfectly Diffuse Sound Field  139
   8.3.2 The Sound Field in a Reverberation Room Driven with a Pure Tone  142
