Contributors ix
Preface xiii

1 Evolution of DNA Marker Technology in Plants 3
   Robert J. Henry
   Introduction 4
   Early Marker Technologies 4
   Evolving Range of Applications of DNA Markers in Plants 12
   Applications 13
   Future Developments 15
   References 15

2 Whole-Genome Sequencing for Marker Discovery 21
   Mark Edwards
   Sequencing Strategies 22
   Sequencing Technologies 23
   Epigenetic Markers 31
   Genome-Wide Selection 32
   Data Analysis Resources 32
   References 33

Color plate section located between pages 34 and 35.

3 Amplicon Sequencing for Marker Discovery 35
   Timothy R. Sexton and Frances M. Shapter
   Introduction 36
   Background 36
   Maximizing Efficiency Through Sample Pooling 38
   Limitations of Amplicon-Based MPS 44
   Bioinformatics 51
   Concluding Remarks 52
   Acknowledgments 52
   References 53

4 Transcriptome Sequencing for Marker Discovery 57
   Susan Gillies
   Introduction 58
   Basic Approach
Contents

Conclusions 64
References 64

5 Molecular Markers in Plant Improvement 67
Peter J. Prentis, Edward K. Gilding, Ana Pavasovic, Celine H. Frere, and Ian D. Godwin
Introduction 68
Plant Domestication and Traditional Breeding 68
Application of Molecular Markers to Breeding 70
Next-Generation Approaches to QTL Discovery 75
Conclusion 77
References 78

6 Applications of Molecular Markers in Plant Conservation 81
Maurizio Rossetto and Paul D. Rymer
Introduction 82
Traditional Approaches 86
The Way Forward 91
Conclusion 95
References 96

7 Molecular Markers for Plant Biosecurity 99
Andrew D.W. Geering
Introduction 100
The Present—PCR for Specific Diagnosis and for DNA Barcoding 101
The Future—Next-Generation Sequencing Methods to Revolutionize Plant Quarantine Diagnostics 105
Conclusions 110
Acknowledgments 111
References 111

8 Molecular Markers for Harnessing Heterosis 119
Gopala S. Krishnan, A.K. Singh, Daniel L.E. Waters, and Robert J. Henry
Introduction 120
Molecular Markers for Understanding the Genetic Basis of Heterosis 122
Molecular Diversity and Heterosis—Molecular Markers for Predicting Heterosis 123
Conclusion 131
References 132
